GENERAL EXPLANATORY NOTES

GENERAL EXPLANATORY NOTES

GN.1.1 The Medicare Benefits Schedule - Introduction

Schedules of Services

Each professional service contained in the Schedule has been allocated a unique item number. Located with the item number and description for each service is the Schedule fee and Medicare benefit, together with a reference to an explanatory note relating to the item (if applicable).

If the service attracts an anaesthetic, the word (Anaes.) appears following the description. Where an operation qualifies for the payment of benefits for an assistant, the relevant items are identified by the inclusion of the word (Assist.) in the item description. Medicare benefits are not payable for surgical assistance associated with procedures which have not been so identified.

Higher rates of benefits are provided for consultations by a recognised consultant physician where the patient has been referred by another medical practitioner or an approved dental practitioner (oral surgeons).

Differential fees and benefits also apply to services listed in Category 5 (Diagnostic Imaging Services). The conditions relating to these services are set out in Category 5.

Explanatory Notes

Explanatory notes relating to the Medicare benefit arrangements and notes that have general application to services are located at the beginning of the schedule, while notes relating to specific items are located at the beginning of each Category. While there may be a reference following the description of an item to specific notes relating to that item, there may also be general notes relating to each Group of items.

GN.1.2 Medicare - an outline

The Medicare Program ('Medicare') provides access to medical and hospital services for all Australian residents and certain categories of visitors to Australia. The Department of Human Services administers Medicare and the payment of Medicare benefits. The major elements of Medicare are contained in the Health Insurance Act 1973, as amended, and include the following:

- a. Free treatment for public patients in public hospitals.
- b. The payment of 'benefits', or rebates, for professional services listed in the Medicare Benefits Schedule (MBS). In general, the Medicare benefit is 85% of the Schedule fee, otherwise the benefits are
 - i. 100% of the Schedule fee for services provided by a general practitioner to non-referred, non-admitted patients;
 - ii. 100% of the Schedule fee for services provided on behalf of a general practitioner by a practice nurse or Aboriginal and Torres Strait Islander health practitioner;
 - iii. 75% of the Schedule fee for professional services rendered to a patient as part of an episode of hospital treatment (other than public patients);
 - iv. 75% of the Schedule fee for professional services rendered as part of a privately insured episode of hospital-substitute treatment.

Medicare benefits are claimable only for 'clinically relevant' services rendered by an appropriate health practitioner. A 'clinically relevant' service is one which is generally accepted by the relevant profession as necessary for the appropriate treatment of the patient.

When a service is not clinically relevant, the fee and payment arrangements are a private matter between the practitioner and the patient.

Services listed in the MBS must be rendered according to the provisions of the relevant Commonwealth, State and Territory laws. For example, medical practitioners must ensure that the medicines and medical devices they use have been supplied to them in strict accordance with the provisions of the Therapeutic Goods Act 1989.

Where a Medicare benefit has been inappropriately paid, the Department of Human Services may request its return from the practitioner concerned.

GN.1.3 Medicare benefits and billing practices

Key information on Medicare benefits and billing practices

The *Health Insurance Act 1973* stipulates that Medicare benefits are payable for professional services. A professional service is a clinically relevant service which is listed in the MBS. A medical service is clinically relevant if it is generally accepted in the medical profession as necessary for the appropriate treatment of the patient.

Medical practitioners are free to set their fees for their professional service. However, the amount specified in the patient's account must be the amount charged for the service specified. The fee may not include a cost of goods or services which are not part of the MBS service specified on the account.

Billing practices contrary to the Act

A *non-clinically relevant service* must not be included in the charge for a Medicare item. The non-clinically relevant service must be separately listed on the account and not billed to Medicare.

Goods supplied for the patient's home use (such as wheelchairs, oxygen tanks, continence pads) must not be included in the consultation charge. Medicare benefits are limited to services which the medical practitioner provides at the time of the consultation - any other services must be separately listed on the account and must not be billed to Medicare.

Charging part of all of an episode of hospital treatment or a hospital substitute treatment to a non-admitted consultation is prohibited. This would constitute a false or misleading statement on behalf of the medical practitioner and no Medicare benefits would be payable.

An account may not be re-issued to include charges and out-of-pocket expenses excluded in the original account. The account can only be reissued to correct a genuine error.

Potential consequence of improperly issuing an account

The potential consequences for improperly issuing an account are

- (a) No Medicare benefits will be paid for the service;
- (b) The medical practitioner who issued the account, or authorised its issue, may face charges under sections 128A or 128B of the *Health Insurance Act 1973*.
- (c) Medicare benefits paid as a result of a false or misleading statement will be recoverable from the doctor under section 129AC of the *Health Insurance Act 1973*.

Providers should be aware that the Department of Human Services is legally obliged to investigate doctors suspected of making false or misleading statements, and may refer them for prosecution if the evidence indicates fraudulent charging to Medicare. If Medicare benefits have been paid inappropriately or incorrectly, the Department of Human Services will take recovery action.

The Department of Human Services (DHS) has developed a [Health Practitioner Guideline for responding to a request to substantiate that a patient attended a service](#). There is also a [Health Practitioner Guideline for substantiating that a specific treatment was performed](#). These guidelines are located on the DHS website.

GN.2.4 Provider eligibility for Medicare

To be eligible to provide medical service which will attract Medicare benefits, or to provide services for or on behalf of another practitioner, practitioners must meet one of the following criteria:

- (a) be a recognised specialist, consultant physician or general practitioner; or
- (b) be in an approved placement under section 3GA of the *Health Insurance Act 1973*; or
- (c) be a temporary resident doctor with an exemption under section 19AB of the *Health Insurance Act 1973*, and working in accord with that exemption.

Any practitioner who does not satisfy the requirements outlined above may still practice medicine but their services will not be eligible for Medicare benefits.

NOTE: New Zealand citizens entering Australia do so under a special temporary entry visa and are regarded as temporary resident doctors.

NOTE: It is an offence under Section 19CC of the *Health Insurance Act 1973* to provide a service without first informing a patient where a Medicare benefit is not payable for that service (i.e. the service is not listed in the MBS).

Non-medical practitioners

To be eligible to provide services which will attract Medicare benefits under MBS items 10950-10977 and MBS items 80000-88000 and 82100-82140 and 82200-82215, allied health professionals, dentists, and dental specialists, participating midwives and participating nurse practitioners must be

- (a) registered according to State or Territory law or, absent such law, be members of a professional association with uniform national registration requirements; and
- (b) registered with the Department of Human Services to provide these services.

GN.2.5 Provider Numbers

Practitioners eligible to have Medicare benefits payable for their services and/or who for Medicare purposes wish to raise referrals for specialist services and requests for pathology or diagnostic imaging services, may apply *in writing* to the Department of Human Services for a Medicare provider number for the locations where these services/referrals/requests will be provided. The form may be downloaded from [the Department of Human Services website](#).

For Medicare purposes, an account/receipt issued by a practitioner must include the practitioner's name and *either* the provider number for the location where the service was provided *or* the address where the services were provided.

Medicare provider number information is released in accord with the secrecy provisions of the *Health Insurance Act 1973* (section 130) to authorized external organizations including private health insurers, the Department of Veterans' Affairs and the Department of Health.

When a practitioner ceases to practice at a given location they must inform Medicare promptly. Failure to do so can lead to the misdirection of Medicare cheques and Medicare information.

Practitioners at practices participating in the Practice Incentives Program (PIP) should use a provider number linked to that practice. Under PIP, only services rendered by a practitioner whose provider number is linked to the PIP will be considered for PIP payments.

GN.2.6 Locum tenens

Where a locum tenens will be in a practice for more than two weeks *or* in a practice for less than two weeks but on a regular basis, the locum should apply for a provider number for the relevant location. If the locum will be in a practice for less than two weeks and will not be returning there, they should contact the Department of Human Services (provider liaison - 132 150) to discuss their options (for example, use one of the locum's other provider numbers).

A locum must use the provider number allocated to the location if

- (a) they are an approved general practice or specialist trainee with a provider number issued for an approved training placement; or
- (b) they are associated with an approved rural placement under Section 3GA of the *Health Insurance Act 1973*; or
- (c) they have access to Medicare benefits as a result of the issue of an exemption under section 19AB of the *Health Insurance Act 1973* (i.e. they have access to Medicare benefits at specific practice locations); or
- (d) they will be at a practice which is participating in the Practice Incentives Program; or
- (e) they are associated with a placement on the MedicarePlus for Other Medical Practitioners (OMPs) program, the After Hours OMPs program, the Rural OMPs program or Outer Metropolitan OMPs program.

GN.2.7 Overseas trained doctor

Ten year moratorium

Section 19AB of the Health Insurance Act 1973 states that services provided by overseas trained doctors (including New Zealand trained doctors) and former overseas medical students trained in Australia, will not attract Medicare benefits for 10 years from either

- a. their date of registration as a medical practitioner for the purposes of the Health Insurance Act 1973; or
- b. their date of permanent residency (the reference date will vary from case to case).

Exclusions - Practitioners who before 1 January 1997 had

- a. registered with a State or Territory medical board and retained a continuing right to remain in Australia; or
- b. lodged a valid application with the Australian Medical Council (AMC) to undertake examinations whose successful completion would normally entitle the candidate to become a medical practitioner.

The Minister of Health and Ageing may grant an overseas trained doctor (OTD) or occupational trainee (OT) an exemption to the requirements of the ten year moratorium, with or without conditions. When applying for a Medicare provider number, the OTD or OT must

- a. demonstrate that they need a provider number and that their employer supports their request; and
- b. provide the following documentation:
 - i. Australian medical registration papers; and
 - ii. a copy of their personal details in their passport and all Australian visas and entry stamps; and
 - iii. a letter from the employer stating why the person requires a Medicare provider number and/or prescriber number is required; and
 - iv. a copy of the employment contract.

GN.2.8 Contact details for the Department of Human Services **Changes to Provider Contact Details**

It is important that you contact the Department of Human Services promptly of any changes to your preferred contact details. Your preferred mailing address is used to contact you about Medicare provider matters. We require requests for changes to your preferred contact details to be made by the provider in writing to the Department of Human Services at:

Medicare

GPO Box 9822

in your capital city

or

By email: medicare.prov@medicareaustralia.gov.au

You may also be able to update some provider details through HPOS
<http://www.medicareaustralia.gov.au/hpos/index.jsp>

MBS Interpretations

The day-to-day administration and payment of benefits under the Medicare arrangements is the responsibility of the Department of Human Services. Inquiries concerning matters of interpretation of MBS items should be directed to the Department of Health at Email: askmbs@health.gov.au

or by phone on 132 150

GN.3.9 Patient eligibility for Medicare

An "eligible person" is a person who resides permanently in Australia. This includes New Zealand citizens and holders of permanent residence visas. Applicants for permanent residence may also be eligible persons, depending on circumstances. Eligible persons must enrol with Medicare before they can receive Medicare benefits.

Medicare covers services provided only in Australia. It does not refund treatment or evacuation expenses overseas.

GN.3.10 Medicare cards

The **green** Medicare card is for people permanently in Australia. Cards may be issued for individuals or families.

The **blue** Medicare card bearing the words "INTERIM CARD" is for people who have applied for permanent residence.

Visitors from countries with which Australia has a Reciprocal Health Care Agreement receive a card bearing the words "RECIPROCAL HEALTH CARE"

GN.3.11 Visitors to Australia and temporary residents

Visitors and temporary residents in Australia are not eligible for Medicare and should therefore have adequate private health insurance.

GN.3.12 Reciprocal Health Care Agreements

Australia has Reciprocal Health Care Agreements with New Zealand, Ireland, the United Kingdom, the Netherlands, Sweden, Finland, Norway, Italy, Malta, Belgium and Slovenia.

Visitors from these countries are entitled to medically necessary treatment while they are in Australia, comprising public hospital care (as public patients), Medicare benefits and drugs under the Pharmaceutical Benefits Scheme (PBS). Visitors must enroll with the Department of Human Services to receive benefits. A passport is sufficient for public hospital care and PBS drugs.

Exceptions:

- Visitors from Ireland and New Zealand are entitled to public hospital care and PBS drugs, and should present their passports before treatment as they are not issued with Medicare cards.
- Visitors from Italy and Malta are covered for a period of six months only.

The Agreements do not cover treatment as a private patient in a public or private hospital. People visiting Australia for the purpose of receiving treatment are not covered.

GN.4.13 General Practice

Some MBS items may only be used by general practitioners. For MBS purposes a general practitioner is a medical practitioner who is

- (a) vocationally registered under section 3F of the *Health Insurance Act 1973* (see General Explanatory Note below); or
- (b) a Fellow of the Royal Australian College of General Practitioners (FRACGP), who participates in, and meets the requirements for the RACGP Quality Assurance and Continuing Medical Education Program; or
- (c) a Fellow of the Australian College of Rural and Remote Medicine (FACRRM) who participates in, and meets the requirements for the ACRRM Quality Assurance and Continuing Medical Education Program; or
- (d) is undertaking an approved general practice placement in a training program for *either* the award of FRACGP *or* a training program recognised by the RACGP being of an equivalent standard; or
- (e) is undertaking an approved general practice placement in a training program for *either* the award of FACRRM *or* a training program recognised by ACRRM as being of an equivalent standard.

A medical practitioner seeking recognition as an FRACGP should apply to the Department of Human Services, having completed an application form available from the Department of Human Services's website. A general practice trainee should apply to General Practice Education and Training Limited (GPET) for a general practitioner trainee placement. GPET will advise the Department of Human Services when a placement is approved. General practitioner trainees need to apply for a provider number using the appropriate provider number application form available on the Department of Human Services's website.

Vocational recognition of general practitioners

The only qualifications leading to vocational recognition are FRACGP and FACRRM. The criteria for recognition as a GP are:

- (a) certification by the RACGP that the practitioner
 - is a Fellow of the RACGP; and
 - practice is, or will be within 28 days, predominantly in general practice; and
 - has met the minimum requirements of the RACGP for taking part in continuing medical education and quality assurance programs.
- (b) certification by the General Practice Recognition Eligibility Committee (GPREC) that the practitioner
 - is a Fellow of the RACGP; and
 - practice is, or will be within 28, predominantly in general practice; and
 - has met minimum requirements of the RACGP for taking part in continuing medical education and quality assurance programs.
- (c) certification by ACRRM that the practitioner
 - is a Fellow of ACRRM; and
 - has met the minimum requirements of the ACRRM for taking part in continuing medical education and quality assurance programs.

In assessing whether a practitioner's medical practice is predominantly in general practice, the practitioner must have at least 50% of clinical time and services claimed against Medicare. Regard will also be given as to whether the

practitioner provides a comprehensive primary medical service, including treating a wide range of patients and conditions using a variety of accepted medical skills and techniques, providing services away from the practitioner's surgery on request, for example, home visits and making appropriate provision for the practitioner's patients to have access to after hours medical care.

Further information on eligibility for recognition should be directed to:

QI&CPD Program Administrator, RACGP

How to apply for vocational recognition

Medical practitioners seeking vocational recognition should apply to the Department of Human Services using the approved Application Form available on the the Department of Human Services website: www.humanservices.gov.au. Applicants should forward their applications, as appropriate, to

The Secretariat

The General Practice Recognition Eligibility Committee

National Registration and Accreditation Scheme Policy Section

MDP 152

Department of Health

GPO Box 9848

CANBERRA ACT 2601

email address: gprec@health.gov.au

The Secretariat

The General Practice Recognition Appeal Committee

National Registration and Accreditation Scheme Policy Section

MDP 152

Department of Health

GPO Box 9848

CANBERRA ACT 2601

email address: gprac@health.gov.au

The relevant body will forward the application together with its certification of eligibility to the Department of Human Services CEO for processing.

Continued vocational recognition is dependent upon:

- (a) the practitioner's practice continuing to be predominantly in general practice (for medical practitioners in the Register only); and
- (b) the practitioner continuing to meet minimum requirements for participation in continuing professional development programs approved by the RACGP or the ACRRM.

Further information on continuing medical education and quality assurance requirements should be directed to the RACGP or the ACRRM depending on the college through which the practitioner is pursuing, or is intending to pursue, continuing medical education.

Medical practitioners refused certification by the RACGP, the ACRRM or GPREC may appeal in writing to The Secretariat, General Practice Recognition Appeal Committee (GPRAC), National Registration and Accreditation Scheme Policy Section, MDP 152, Department of Health, GPO Box 9848, Canberra, ACT, 2601.

Removal of vocational recognition status

A medical practitioner may at any time request the Department of Human Services to remove their name from the Vocational Register of General Practitioners.

Vocational recognition status can also be revoked if the RACGP, the ACRRM or GPREC certifies to the Department of Human Services that it is no longer satisfied that the practitioner should remain vocationally recognised. Appeals of the decision to revoke vocational recognition may be made in writing to GPRAC, at the above address.

A practitioner whose name has been removed from the register, or whose determination has been revoked for any reason must make a formal application to re-register, or for a new determination.

GN.5.14 Recognition as a Specialist or Consultant Physician

A medical practitioner who:

- is registered as a specialist under State or Territory law; or
- holds a fellowship of a specified specialist College and has obtained, after successfully completing an appropriate course of study, a relevant qualification from a relevant College

and has formally applied and paid the prescribed fee, may be recognised by the Minister as a specialist or consultant physician for the purposes of the *Health Insurance Act 1973*.

A relevant specialist College may also give the Department of Human Services' Chief Executive Officer a written notice stating that a medical practitioner meets the criteria for recognition.

A medical practitioner who is training for a fellowship of a specified specialist College and is undertaking training placements in a private hospital or in general practice, may provide services which attract Medicare rebates. Specialist trainees should consult the information available at the [Department of Human Services' Medicare website](#).

Once the practitioner is recognised as a specialist or consultant physician for the purposes of the *Health Insurance Act 1973*, Medicare benefits will be payable at the appropriate higher rate for services rendered in the relevant speciality, provided the patient has been appropriately referred to them.

Further information about applying for recognition is available at the [Department of Human Services' Medicare website](#).

The Department of Human Services (DHS) has developed an [Health Practitioner Guideline to substantiate that a valid referral existed \(specialist or consultant physician\)](#) which is located on the DHS website.

GN.5.15 Emergency Medicine

A practitioner will be acting as an emergency medicine specialist when treating a patient within 30 minutes of the patient's presentation, and that patient is

- (a) at risk of serious morbidity or mortality requiring urgent assessment and resuscitation; or
- (b) suffering from suspected acute organ or system failure; or
- (c) suffering from an illness or injury where the viability or function of a body part or organ is acutely threatened; or
- (d) suffering from a drug overdose, toxic substance or toxin effect; or
- (e) experiencing severe psychiatric disturbance whereby the health of the patient or other people is at immediate risk; or
- (f) suffering acute severe pain where the viability or function of a body part or organ is suspected to be acutely threatened; or
- (g) suffering acute significant haemorrhage requiring urgent assessment and treatment; and
- (h) treated in, or via, a bona fide emergency department in a hospital.

Benefits are not payable where such services are rendered in the accident and emergency departments or outpatient departments of public hospitals.

GN.6.16 Referral Of Patients To Specialists Or Consultant Physicians

For certain services provided by specialists and consultant physicians, the Medicare benefit payable is dependent on acceptable evidence that the service has been provided following referral from another practitioner.

A reference to a referral in this Section does not refer to written requests made for pathology services or diagnostic imaging services. Information about the form of a diagnostic imaging request can be found in **Note IN.0.1** of the Diagnostic Imaging Services Table (Category 5) and information about the form of a pathology request can be found in **Note PN.2.1** of the Pathology Services Table (Category 6).

What is a Referral?

A "referral" is a request to a specialist or a consultant physician for investigation, opinion, treatment and/or management of a condition or problem of a patient or for the performance of a specific examination(s) or test(s).

Subject to the exceptions in the paragraph below, for a valid "referral" to take place

- (i) the referring practitioner must have undertaken a professional attendance with the patient and turned his or her mind to the patient's need for referral and have communicated relevant information about the patient to the specialist or consultant physician (this need not mean an attendance on the occasion of the referral);

- (ii) the instrument of referral must be in writing as a letter or note to a specialist or to a consultant physician and must be signed and dated by the referring practitioner; and
- (iii) the specialist or consultant physician to whom the patient is referred must have received the instrument of referral on or prior to the occasion of the professional service to which the referral relates.

The exceptions to the requirements in paragraph above are that

(a) sub-paragraphs (i), (ii) and (iii) do not apply to

- a pre-anaesthesia consultation by a specialist anaesthetist (items 16710-17625);

(b) sub-paragraphs (ii) and (iii) do not apply to

- a referral generated during an episode of hospital treatment, for a service provided or arranged by that hospital, where the hospital records provide evidence of a referral (including the referring practitioner's signature); or
- an emergency where the referring practitioner or the specialist or the consultant physician was of the opinion that the service be rendered as quickly as possible; and

(c) sub-paragraph (iii) does not apply to instances where a written referral was completed by a referring practitioner but was lost, stolen or destroyed.

Examination by Specialist Anaesthetists

A referral is not required in the case of pre-anaesthesia consultation items 17610-17625. However, for benefits to be payable at the specialist rate for consultations, other than pre-anaesthesia consultations by specialist anaesthetists (items 17640 -17655) a referral is required.

Who can Refer?

The general practitioner is regarded as the primary source of referrals. Cross-referrals between specialists and/or consultant physicians should usually occur in consultation with the patient's general practitioner.

Referrals by Dentists or Optometrists or Participating Midwives or Participating Nurse Practitioners

For Medicare benefit purposes, a referral may be made to

(i) a recognised specialist:

(a) by a registered dental practitioner, where the referral arises from a dental service; or

(b) by a registered optometrist where the specialist is an ophthalmologist; or

(c) by a participating midwife where the specialist is an obstetrician or a paediatrician, as clinical needs dictate. A referral given by a participating midwife is valid until 12 months after the first service given in accordance with the referral and for 1 pregnancy only or

(d) by a participating nurse practitioner to specialists and consultant physicians. A referral given by a participating nurse practitioner is valid until 12 months after the first service given in accordance with the referral.

(ii) a consultant physician, by an approved dental practitioner (oral surgeon), where the referral arises out of a dental service.

In any other circumstances (i.e. a referral to a consultant physician by a dentist, other than an approved oral surgeon, or an optometrist, or a referral by an optometrist to a specialist other than a specialist ophthalmologist), it is not a valid referral. Any resulting consultant physician or specialist attendances will attract Medicare benefits at unreferral rates.

Registered dentists and registered optometrists may refer themselves to specialists in accordance with the criteria above, and Medicare benefits are payable at the levels which apply to their referred patients.

Billing

Routine Referrals

In addition to providing the usual information required to be shown on accounts, receipts or assignment forms, specialists and consultant physicians must provide the following details (unless there are special circumstances as indicated in paragraph below):-

- name and either practice address or provider number of the referring practitioner;
- date of referral; and
- period of referral (when other than for 12 months) expressed in months, eg "3", "6" or "18" months, or "indefinitely" should be shown.

Special Circumstances

(i) Lost, stolen or destroyed referrals.

If a referral has been made but the letter or note of referral has been lost, stolen or destroyed, benefits will be payable at the referred rate if the account, receipt or the assignment form shows the name of the referring medical practitioner, the practice address or provider number of the referring practitioner (if either of these are known to the consultant physician or specialist) and the words 'Lost referral'. This provision only applies to the initial attendance. For subsequent attendances to attract Medicare benefits at the referred rate a duplicate or replacement letter of referral must be obtained by the specialist or the consultant physician.

(ii) Emergencies

If the referral occurred in an emergency, benefit will be payable at the referred rate if the account, receipt or assignment form is endorsed 'Emergency referral'. This provision only applies to the initial attendance. For subsequent attendances to attract Medicare benefits at the referred rate the specialist/consultant physician must obtain a letter of referral.

(iii) Hospital referrals.

Private Patients - Where a referral is generated during an episode of hospital treatment for a service provided or arranged by that hospital, benefits will be payable at the referred rate if the account, receipt or assignment form is endorsed 'Referral within (name of hospital)' and the patient's hospital records show evidence of the referral (including the referring practitioner's signature). However, in other instances where a medical practitioner within a hospital is involved in referring a patient (e.g. to a specialist or a consultant physician in private rooms) the normal referral arrangements apply, including the requirement for a referral letter or note and its retention by the specialist or the consultant physician billing for the service.

Public Hospital Patients

State and Territory Governments are responsible for the provision of public hospital services to eligible persons in accordance with the National Healthcare Agreement.

Bulk Billing

Bulk billing assignment forms should show the same information as detailed above. However, faster processing of the claim will be facilitated where the provider number (rather than the practice address) of the referring practitioner is shown.

Period for which Referral is Valid

The referral is valid for the period specified in the referral which is taken to commence on the date of the specialist's or consultant physician's first service covered by that referral.

Specialist Referrals

Where a referral originates from a specialist or a consultant physician, the referral is valid for 3 months, except where the referred patient is an admitted patient. For admitted patients, the referral is valid for 3 months or the duration of the admission whichever is the longer.

As it is expected that the patient's general practitioner will be kept informed of the patient's progress, a referral from a specialist or a consultant physician must include the name of the patient's general practitioners and/or practice. Where a patient is unable or unwilling to nominate a general practitioner or practice this must be stated in the referral.

Referrals by other Practitioners

Where the referral originates from a practitioner other than those listed in *Specialist Referrals*, the referral is valid for a period of 12 months, unless the referring practitioner indicates that the referral is for a period more or less than 12 months (eg. 3, 6 or 18 months or valid indefinitely). Referrals for longer than 12 months should only be used where the patient's clinical condition requires continuing care and management of a specialist or a consultant physician for a specific condition or specific conditions.

Definition of a Single Course of Treatment

A single course of treatment involves an initial attendance by a specialist or consultant physician and the continuing management/treatment up to the stage where the patient is referred back to the care of the referring practitioner. It also includes any subsequent review of the patient's condition by the specialist or the consultant physician that may be necessary. Such a review may be initiated by either the referring practitioner or the specialist/consultant physician.

The presentation of an unrelated illness, requiring the referral of the patient to the specialist's or the consultant physician's care would initiate a new course of treatment in which case a new referral would be required.

The receipt by a specialist or consultant physician of a new referral following the expiration of a previous referral for the same condition(s) does not necessarily indicate the commencement of a new course of treatment involving the itemisation of an initial consultation. In the continuing management/treatment situation the new referral is to facilitate the payment of benefits at the specialist or the consultant physician referred rates rather than the unreferral rates.

However, where the referring practitioner:-

- (a) deems it necessary for the patient's condition to be reviewed; and
- (b) the patient is seen by the specialist or the consultant physician outside the currency of the last referral;
and
- (c) the patient was last seen by the specialist or the consultant physician more than 9 months earlier

the attendance following the new referral initiates a new course of treatment for which Medicare benefit would be payable at the initial consultation rates.

Retention of Referral Letters

The prima facie evidence that a valid referral exists is the provision of the referral particulars on the specialist's or the consultant physician's account.

A specialist or a consultant physician is required to retain the instrument of referral (and a hospital is required to retain the patient's hospital records which show evidence of a referral) for 2 years from the date the service was rendered.

A specialist or a consultant physician is required, if requested by the Department of Human Services CEO, to produce to a medical practitioner who is an employee of the Department of Human Services, the instrument of referral within seven days after the request is received. Where the referral originates in an emergency situation or in a hospital, the specialist or consultant physician is required to produce such information as is in his or her possession or control relating to whether the patient was so treated.

Attendance for Issuing of a Referral

Medicare benefit is attracted for an attendance on a patient even where the attendance is solely for the purpose of issuing a referral letter or note. However, if a medical practitioner issues a referral without an attendance on the patient, no benefit is payable for any charge raised for issuing the referral.

Locum-tenens Arrangements

It should be noted that where a non-specialist medical practitioner acts as a locum-tenens for a specialist or consultant physician, or where a specialist acts as a locum-tenens for a consultant physician, Medicare benefit is only payable at the level appropriate for the particular locum-tenens, eg, general practitioner level for a general practitioner locum-tenens and specialist level for a referred service rendered by a specialist locum tenens.

Medicare benefits are not payable where a practitioner is not eligible to provide services attracting Medicare benefits acts as a locum-tenens for any practitioner who is eligible to provide services attracting Medicare benefits.

Fresh referrals are not required for locum-tenens acting according to accepted medical practice for the principal of a practice ie referrals to the latter are accepted as applying to the former and benefit is not payable at the initial attendance rate for an attendance by a locum-tenens if the principal has already performed an initial attendance in respect of the particular instrument of referral.

Self Referral

Medical practitioners may refer themselves to consultant physicians and specialists and Medicare benefits are payable at referred rates.

GN.7.17 Billing procedures

The Department of Human Services website contains information on Medicare billing and claiming options. Please visit the [Department of Human Services](#) website for further information.

Bulk billing

Under the *Health Insurance Act 1973*, a bulk billing facility for professional services is available to all persons in Australia who are eligible for a benefit under the Medicare program. If a practitioner bulk bills for a service the practitioner undertakes to accept the relevant Medicare benefit as full payment for the service. Additional charges for that service cannot be raised. This includes but is not limited to:

- any consumables that would be reasonably necessary to perform the service, including bandages and/or dressings;
- record keeping fees;
- a booking fee to be paid before each service, or;
- an annual administration or registration fee.

Where the patient is bulk billed, an additional charge can **only** be raised against the patient by the practitioner where the patient is provided with a vaccine or vaccines from the practitioner's own supply held on the practitioner's premises. This exemption only applies to general practitioners and other non-specialist practitioners in association with attendance items **3 to 96, 179 to 212, 733 to 789 and 5000 to 5267** (inclusive) and only relates to vaccines that

are not available to the patient free of charge through Commonwealth or State funding arrangements or available through the Pharmaceutical Benefits Scheme. The additional charge must only be to cover the supply of the vaccine.

Where a practitioner provides a number of services (excluding operations) on the one occasion, they can choose to bulk bill some or all of those services and privately charge a fee for the other service (or services), in excess of the Medicare rebate. The privately charged fee can only be charged in relation to said service (or services). Where two or more operations are provided on the one occasion, all services must be either bulk billed or privately charged.

It should be noted that, where a service is not bulk billed, a practitioner may privately raise an additional charge against a patient, such as for a consumable. An additional charge can also be raised where a practitioner does not bulk bill a patient but instead charges a fee that is equal to the rebate for the Medicare service. For example, where a general practitioner provides a professional service to which item 23 relates the practitioner could, in place of bulk billing the patient, charge the rebate for the service and then also raise an additional charge (such as for a consumable).

GN.8.18 Provision for review of individual health professionals

The Professional Services Review (PSR) reviews and investigates service provision by health practitioners to determine if they have engaged in inappropriate practice when rendering or initiating Medicare services, or when prescribing or dispensing under the PBS.

Section 82 of the *Health Insurance Act 1973* defines inappropriate practice as conduct that is such that a PSR Committee could reasonably conclude that it would be unacceptable to the general body of the members of the profession in which the practitioner was practicing when they rendered or initiated the services under review. It is also an offence under Section 82 for a person or officer of a body corporate to knowingly, recklessly or negligently cause or permit a practitioner employed by the person to engage in such conduct.

The Department of Human Services monitors health practitioners' claiming patterns. Where the Department of Human Services detects an anomaly, it may request the Director of PSR to review the practitioner's service provision. On receiving the request, the Director must decide whether to conduct a review and in which manner the review will be conducted. The Director is authorized to require that documents and information be provided.

Following a review, the Director must:

decide to take no further action; or

enter into an agreement with the person under review (which must then be ratified by an independent Determining Authority); or

refer the matter to a PSR Committee.

A PSR Committee normally comprises three medically qualified members, two of whom must be members of the same profession as the practitioner under review. However, up to two additional Committee members may be appointed to provide wider range of clinical expertise.

The Committee is authorized to:

investigate any aspect of the provision of the referred services, and without being limited by the reasons given in the review request or by a Director's report following the review;

hold hearings and require the person under review to attend and give evidence;

require the production of documents (including clinical notes).

The methods available to a PSR Committee to investigate and quantify inappropriate practice are specified in legislation:

(a) Patterns of Services - The *Health Insurance (Professional Services Review) Regulations 1999* specify that when a general practitioner or other medical practitioner reaches or exceeds 80 or more attendances on each of 20 or more days in a 12-month period, they are deemed to have practiced inappropriately.

A professional attendance means a service of a kind mentioned in group A1, A2, A5, A6, A7, A9, A11, A13, A14, A15, A16, A17, A18, A19, A20, A21, A22 or A23 of Part 3 of the General Medical Services Table.

If the practitioner can satisfy the PSR Committee that their pattern of service was as a result of exceptional circumstances, the quantum of inappropriate practice is reduced accordingly. Exceptional circumstances include, but are not limited to, those set out in the *Regulations*. These include:

an unusual occurrence;

the absence of other medical services for the practitioner's patients (having regard to the practice location); and

the characteristics of the patients.

(b) Sampling - A PSR Committee may use statistically valid methods to sample the clinical or practice records.

(c) Generic findings - If a PSR Committee cannot use patterns of service or sampling (for example, there are insufficient medical records), it can make a 'generic' finding of inappropriate practice.

Additional Information

A PSR Committee may not make a finding of inappropriate practice unless it has given the person under review notice of its intention to review them, the reasons for its findings, and an opportunity to respond. In reaching their decision, a PSR Committee is required to consider whether or not the practitioner has kept adequate and contemporaneous patient records (See general explanatory note G15.1 for more information on adequate and contemporaneous patient records).

The practitioner under review is permitted to make submissions to the PSR Committee before key decisions or a final report is made.

If a PSR Committee finds that the person under review has engaged in inappropriate practice, the findings will be reported to the Determining Authority to decide what action should be taken:

(i) a reprimand;

(ii) counselling;

(iii) repayment of Medicare benefits; and/or

(iv) complete or partial disqualification from Medicare benefit arrangements for up to three years.

Further information is available from the PSR website - www.psr.gov.au

GN.8.19 Medicare Participation Review Committee

The Medicare Participation Review Committee determines what administrative action should be taken against a practitioner who:

(a) has been successfully prosecuted for relevant criminal offences;

(b) has breached an Approved Pathology Practitioner undertaking;

(c) has engaged in prohibited diagnostic imaging practices; or

(d) has been found to have engaged in inappropriate practice under the Professional Services Review scheme and has received Final Determinations on two (or more) occasions.

The Committee can take no further action, counsel or reprimand the practitioner, or determine that the practitioner be disqualified from Medicare for a particular period or in relation to particular services for up to five years.

Medicare benefits are not payable in respect of services rendered by a practitioner who has been fully disqualified, or partly disqualified in relation to relevant services under the *Health Insurance Act 1973* (Section 19B applies).

GN.8.20 Referral of professional issues to regulatory and other bodies

The *Health Insurance Act 1973* provides for the following referral, to an appropriate regulatory body:

- i. a significant threat to a person's life or health, when caused or is being caused or is likely to be caused by the conduct of the practitioner under review; or
- ii. a statement of concerns of non-compliance by a practitioner with 'professional standards'.

GN.8.21 Comprehensive Management Framework for the MBS

The Government announced the Comprehensive Management Framework for the MBS in the 2011-12 Budget to improve MBS management and governance into the future. As part of this framework, the Medical Services Advisory Committee (MSAC) Terms of Reference and membership have been expanded to provide the Government with independent expert advice on all new proposed services to be funded through the MBS, as well as on all proposed amendments to existing MBS items. Processes developed under the previously funded MBS Quality Framework are now being integrated with MSAC processes under the Comprehensive Management Framework for the MBS.

GN.8.22 Medical Services Advisory Committee

The Medical Services Advisory Committee (MSAC) advises the Minister on the strength of evidence relating to the safety, effectiveness and cost effectiveness of new and emerging medical services and technologies and under what circumstances public funding, including listing on the MBS, should be supported.

MSAC members are appointed by the Minister and include specialist practitioners, general practitioners, health economists, a health consumer representative, health planning and administration experts and epidemiologists.

For more information on the MSAC refer to their website - www.msac.gov.au or email on msac.secretariat@health.gov.au or by phoning the MSAC secretariat on (02) 6289 7550.

GN.8.23 Pathology Services Table Committee

This Pathology Services Table Committee comprises six representatives from the interested professions and six from the Australian Government. Its primary role is to advise the Minister on the need for changes to the structure and content of the Pathology Services Table (except new medical services and technologies) including the level of fees.

GN.9.25 Penalties and Liabilities

Penalties of up to \$10,000 or imprisonment for up to five years, or both, may be imposed on any person who makes a statement (oral or written) or who issues or presents a document that is false or misleading in a material particular and which is capable of being used with a claim for benefits. In addition, any practitioner who is found guilty of such offences by a court shall be subject to examination by a Medicare Participation Review Committee and may be counselled or reprimanded or may have services wholly or partially disqualified from the Medicare benefit arrangements.

A penalty of up to \$1,000 or imprisonment for up to three months, or both, may be imposed on any person who obtains a patient's signature on a direct-billing form without the obligatory details having been entered on the form before the person signs, or who fails to cause a patient to be given a copy of the completed form.

GN.10.26 Schedule fees and Medicare benefits

Medicare benefits are based on fees determined for each medical service. The fee is referred to in these notes as the "Schedule fee". The fee for any item listed in the MBS is that which is regarded as being reasonable on average for that service having regard to usual and reasonable variations in the time involved in performing the service on different occasions and to reasonable ranges of complexity and technical difficulty encountered.

The Schedule fee and Medicare benefit levels for the medical services contained in the MBS are located with the item descriptions. Where appropriate, the calculated benefit has been rounded to the nearest higher 5 cents. However, in no circumstances will the Medicare benefit payable exceed the fee actually charged.

There are presently three levels of Medicare benefit payable:

- a. 75% of the Schedule fee:
 - i. for professional services rendered to a patient as part of an episode of hospital treatment (other than public patients). Medical practitioners must indicate on their accounts if a medical service is rendered in these circumstances by placing an asterisk '*' or the letter 'H' directly after an item number where used; or a description of the professional service and an indication the service was rendered as an episode of hospital treatment (for example, 'in hospital', 'admitted' or 'in patient');
 - ii. for professional services rendered as part of an episode of hospital-substitute treatment, and the patient who receives the treatment chooses to receive a benefit from a private health insurer. Medical practitioners must indicate on their accounts if a medical service is rendered in these circumstances by placing the words 'hospital-substitute treatment' directly after an item number where used; or a description of the professional service, preceded by the words 'hospital-substitute treatment'.
- b. 100% of the Schedule fee for non-referred attendances by general practitioners to non-admitted patients and services provided by a practice nurse or Aboriginal and Torres Strait Islander health practitioner on behalf of a general practitioner.
- c. 85% of the Schedule fee, or the Schedule fee less \$83.40 (indexed annually in November), whichever is the greater, for all other professional services.

Public hospital services are to be provided free of charge to eligible persons who choose to be treated as public patients in accordance with the National Healthcare Agreement.

A medical service rendered to a patient on the day of admission to, or day of discharge from hospital, but prior to admission or subsequent to discharge, will attract benefits at the 85% or 100% level, not 75%. This also applies to a pathology service rendered to a patient prior to admission. Attendances on patients at a hospital (other than patients covered by paragraph (i) above) attract benefits at the 85% level.

The 75% benefit level applies even though a portion of the service (eg. aftercare) may be rendered outside the hospital. With regard to obstetric items, benefits would be attracted at the 75% level where the confinement takes place in hospital.

Pathology tests performed after discharge from hospital on bodily specimens taken during hospitalisation also attract the 75% level of benefits.

It should be noted that private health insurers can cover the "patient gap" (that is, the difference between the Medicare rebate and the Schedule fee) for services attracting benefits at the 75% level. Patients may insure with private health insurers for the gap between the 75% Medicare benefits and the Schedule fee or for amounts in excess of the Schedule fee where the doctor has an arrangement with their health insurer.

GN.10.27 Medicare safety nets

The Medicare Safety Nets provide families and singles with an additional rebate for out-of-hospital Medicare services, once annual thresholds are reached. There are two safety nets: the original Medicare safety net and the extended Medicare safety net.

Original Medicare Safety Net:

Under the original Medicare safety net, the Medicare benefit for out-of-hospital services is increased to 100% of the Schedule Fee (up from 85%) once an annual threshold in gap costs is reached. Gap costs refer to the difference between the Medicare benefit (85%) and the Schedule Fee. The threshold from 1 January 2019 is \$470.00. This threshold applies to all Medicare-eligible singles and families.

Extended Medicare Safety Net:

Under the extended Medicare safety net (EMSN), once an annual threshold in out-of-pocket costs for out-of-hospital Medicare services is reached, Medicare will pay for 80% of any future out-of-pocket costs for out-of-hospital Medicare services for the remainder of the calendar year. However, where the item has an EMSN benefit cap, there is a maximum limit on the EMSN benefit that will be paid for that item. Further explanation about EMSN benefit caps is provided below. Out-of-pocket costs refer to the difference between the Medicare benefit and the fee charged by the practitioner.

In 2019, the threshold for singles and families that hold Commonwealth concession card, families that received Family Tax Benefit Part (A) (FTB(A)) and families that qualify for notional FTB (A) is \$680.70. The threshold for all other singles and families in 2019 is \$2,133.00.

The thresholds for both safety nets are usually indexed on 1 January each year.

Individuals are automatically registered with the Department of Human Services for the safety nets; however couples and families are required to register in order to be recognised as a family for the purposes on the safety nets. In most cases, registered families have their expenses combined to reach the safety net thresholds. This may help to qualify for safety net benefits more quickly. Registration forms can be obtained from the Department of Human Services offices, or completed online at <http://www.humanservices.gov.au/customer/services/medicare/medicare-safety-net>.

EMSN Benefit Caps:

The EMSN benefit cap is the maximum EMSN benefit payable for that item and is paid in addition to the standard Medicare rebate. Where there is an EMSN benefit cap in place for the item, the amount of the EMSN cap is displayed in the item descriptor.

Once the EMSN threshold is reached, each time the item is claimed the patient is eligible to receive up to the EMSN benefit cap. As with the safety nets, the EMSN benefit cap only applies to out-of-hospital services.

Where the item has an EMSN benefit cap, the EMSN benefit is calculated as 80% of the out-of-pocket cost for the service. If the calculated EMSN benefit is less than the EMSN benefit cap; then calculated EMSN rebate is paid. If the calculated EMSN benefit is greater than the EMSN benefit cap; the EMSN benefit cap is paid.

For example: Item A has a Schedule fee of \$100, the out-of-hospital benefit is \$85 (85% of the Schedule fee). The EMSN benefit cap is \$30. Assuming that the patient has reached the EMSN threshold:

- o If the fee charged by the doctor for Item A is \$125, the standard Medicare rebate is \$85, with an out-of-pocket cost of \$40. The EMSN benefit is calculated as $\$40 \times 80\% = \32 . However, as the EMSN benefit cap is \$30, only \$30 will be paid.

- o If the fee charged by the doctor for Item A is \$110, the standard Medicare rebate is \$85, with an out-of-pocket cost of \$25. The EMSN benefit is calculated as $\$25 \times 80\% = \20 . As this is less than the EMSN benefit cap, the full \$20 is paid.

GN.11.28 Services not listed in the MBS

Benefits are not generally payable for services not listed in the MBS. However, there are some procedural services which are not specifically listed because they are regarded as forming part of a consultation or else attract benefits on an attendance basis. For example, intramuscular injections, aspiration needle biopsy, treatment of seborrheic keratoses and less than 10 solar keratoses by ablative techniques and closed reduction of the toe (other than the great toe).

Enquiries about services not listed or on matters of interpretation should be directed to the Department of Human Services on 132 150.

GN.11.29 Ministerial Determinations

Section 3C of the *Health Insurance Act 1973* empowers the Minister to determine an item and Schedule fee (for the purposes of the Medicare benefits arrangements) for a service not included in the health insurance legislation. This provision may be used to facilitate payment of benefits for new developed procedures or techniques where close monitoring is desirable. Services which have received section 3C approval are located in their relevant Groups in the MBS with the notation "**(Ministerial Determination)**".

GN.12.30 Professional services

Professional services which attract Medicare benefits include medical services rendered by or "on behalf of" a medical practitioner. The latter include services where a part of the service is performed by a technician employed by or, in accordance with accepted medical practice, acting under the supervision of the medical practitioner.

The following medical services will attract benefits only if they have been personally performed by a medical practitioner on not more than one patient on the one occasion (i.e. two or more patients cannot be attended simultaneously, although patients may be seen consecutively), unless a group session is involved (i.e. Items 170-172). The requirement of "personal performance" is met whether or not assistance is provided, according to accepted medical standards:-

- (a) Category 1 (Professional Attendances) items except 170-172, 342-346, 820-880, 6029-6042, 6064-6075;
- (b) Each of the following items in Group D1 (Miscellaneous Diagnostic):- 11012, 11015, 11018, 11021, 11304, 11600, 11627, 11701, 11712, 11722, 11724, 11728, 11921, 12000, 12003;
- (c) All Group T1 (Miscellaneous Therapeutic) items (except 13020, 13025, 13200-13206, 13212-13221, 13703, 13706, 13709, 13750-13760, 13915-13948, 14050, 14053, 14218, 14221 and 14245);
- (d) Item 15600 in Group T2 (Radiation Oncology);
- (e) All Group T3 (Therapeutic Nuclear Medicine) items;
- (f) All Group T4 (Obstetrics) items (except 16400 and 16514);
- (g) All Group T6 (Anaesthetics) items;
- (h) All Group T7 (Regional or Field Nerve Block) items;
- (i) All Group T8 (Operations) items;
- (j) All Group T9 (Assistance at Operations) items;
- (k) All Group T10 (Relative Value Guide for Anaesthetics) items.

For the group psychotherapy and family group therapy services covered by Items 170, 171, 172, 342, 344 and 346, benefits are payable only if the services have been conducted personally by the medical practitioner.

Medicare benefits are not payable for these group items or any of the items listed in (a) - (k) above when the service is rendered by a medical practitioner employed by the proprietor of a hospital (not being a private hospital), except where the practitioner is exercising their right of private practice, or is performing a medical service outside the hospital. For example, benefits are not paid when a hospital intern or registrar performs a service at the request of a staff specialist or visiting medical officer.

Medicare benefits are only payable for items 12306 - 12322 (Bone Densitometry) when the service is performed by a specialist or consultant physician in the practice of his or her specialty where the patient is referred by another medical practitioner.

GN.12.31 Services rendered on behalf of medical practitioners

Medical services in Categories 2 and 3 not included in GN.12.30 and Category 5 (Diagnostic Imaging) services continue to attract Medicare benefits if the service is rendered by:-

- (a) the medical practitioner in whose name the service is being claimed;
- (b) a person, other than a medical practitioner, who is employed by a medical practitioner or, in accordance with accepted medical practice, acts under the supervision of a medical practitioner.

See Category 6 Notes for Guidance for arrangements relating to Pathology services.

So that a service rendered by an employee or under the supervision of a medical practitioner may attract a Medicare rebate, the service must be billed in the name of the practitioner who must accept full responsibility for the service. All practitioners should ensure they maintain adequate and contemporaneous records. All elements of the service must be performed in accordance with accepted medical practice.

Supervision from outside of Australia is not acceptable.

While the supervising medical practitioner need not be present for the entire service, they must have a direct involvement in at least part of the service. Although the supervision requirements will vary according to the service in question, they will, as a general rule, be satisfied where the medical practitioner has:-

- (a) established consistent quality assurance procedures for the data acquisition; and
- (b) personally analysed the data and written the report.

Benefits are not payable for these services when a medical practitioner refers patients to self-employed medical or paramedical personnel, such as radiographers and audiologists, who either bill the patient or the practitioner requesting the service.

GN.12.32 Medicare benefits and vaccinations

Where a medical practitioner administers an injection for immunisation purposes on his or her own patient, Medicare benefits for that service would be payable on a consultation basis, that is, for the attendance at which the injection is given. However, the cost of the vaccine itself does not attract a Medicare rebate. The Medicare benefits arrangements cover only the professional component of the medical practitioner's service. There are some circumstances where a Medicare benefit is not payable when a medical practitioner administers an injection for immunisation purposes – please refer to example 3 below for further details.

Example 1

A patient presents to a GP to receive the influenza vaccination. The patient is not in the cohort of patients which is covered for the influenza vaccine under the NIP.

After taking a short patient history, the GP administers the vaccine to the patient. The GP has met the requirements of a level A consultation and claims item 3. The GP can bulk bill the patient for the cost of the MBS service and can charge a separate amount for the cost of the vaccine, which is not covered under the NIP.

If a patient presented to a GP to receive a vaccine and to enquire about a medical condition, the GP may claim the appropriate item (such as item 23).

Example 2

A patient presents to a GP to receive the influenza vaccination. The patient is in the cohort of patients which is covered for the influenza vaccine under the NIP.

After taking a short patient history, the GP administers the vaccine to the patient. The GP has met the requirements of a level A consultation and claims item 3. The GP can bulk bill the patient but does not need to charge a separate amount for the cost of the vaccine, which is covered under the NIP.

If a patient presented to a GP to receive a vaccine and to enquire about a medical condition, the GP may claim the appropriate item (such as item 23).

Example 3

A GP is employed by a State or Territory community health centre to administer vaccines and provides no additional medical services.

A Medicare benefit is not payable as the GP is providing the service under an arrangement with the State or Territory, which is prohibited under subsection 19(2) of the Health Insurance Act 1973. The service is also prohibited on the basis that it is a mass immunisation which is prohibited under subsection 19(4).

A mass immunisation is a program to inoculate people that is funded by the Commonwealth or State Government, or through an international or private organisation.

GN.13.33 Services which do not attract Medicare benefits **Services not attracting benefits**

- (a) telephone consultations;
- (b) issue of repeat prescriptions when the patient does not attend the surgery in person;
- (c) group attendances (unless otherwise specified in the item, such as items 170, 171, 172, 342, 344 and 346);
- (d) non-therapeutic cosmetic surgery;
- (e) euthanasia and any service directly related to the procedure. However, services rendered for counselling/assessment about euthanasia will attract benefits.

Medicare benefits are not payable where the medical expenses for the service

- (a) are paid/payable to a public hospital;
- (b) are for a compensable injury or illness for which the patient's insurer or compensation agency has accepted liability. (Please note that if the medical expenses relate to a compensable injury/illness for which the insurer/compensation agency is disputing liability, then Medicare benefits are payable until the liability is accepted.);
- (c) are for a medical examination for the purposes of life insurance, superannuation, a provident account scheme, or admission to membership of a friendly society;
- (d) are incurred in mass immunisation (see General Explanatory Note 12.3 for further explanation).

Unless the Minister otherwise directs

Medicare benefits are not payable where:

- (a) the service is rendered by or on behalf of, or under an arrangement with the Australian Government, a State or Territory, a local government body or an authority established under Commonwealth, State or Territory law;

- (b) the medical expenses are incurred by the employer of the person to whom the service is rendered;
- (c) the person to whom the service is rendered is employed in an industrial undertaking and that service is rendered for the purposes related to the operation of the undertaking; or
- (d) the service is a health screening service.
- (e) the service is a pre-employment screening service

Current regulations preclude the payment of Medicare benefits for professional services rendered in relation to or in association with:

- (a) chelation therapy (that is, the intravenous administration of ethylenediamine tetra-acetic acid or any of its salts) other than for the treatment of heavy-metal poisoning;
- (b) the injection of human chorionic gonadotrophin in the management of obesity;
- (c) the use of hyperbaric oxygen therapy in the treatment of multiple sclerosis;
- (d) the removal of tattoos;
- (e) the transplantation of a thoracic or abdominal organ, other than a kidney, or of a part of an organ of that kind; or the transplantation of a kidney in conjunction with the transplantation of a thoracic or other abdominal organ, or part of an organ of that kind;
- (f) the removal from a cadaver of kidneys for transplantation;
- (g) the administration of microwave (UHF radio wave) cancer therapy, including the intravenous injection of drugs used in the therapy.

Pain pumps for post-operative pain management

The cannulation and/or catheterisation of surgical sites associated with pain pumps for post-operative pain management cannot be billed under any MBS item.

The filling or re-filling of drug reservoirs of ambulatory pain pumps for post-operative pain management cannot be billed under any MBS items.

Non Medicare Services

No MBS item applies to a service mentioned in the item if the service is provided to a patient at the same time as, or in connection with, an injection of blood or a blood product that is autologous.

No MBS item applies to a service mentioned in the item if the service is provided to a patient at the same time as, or in connection with, the harvesting, storage, in vitro processing or injection of non-haematopoietic stem cells.

An item in the range 1 to 10943 does not apply to the service described in that item if the service is provided at the same time as, or in connection with, any of the services specified below:

- (a) endoluminal gastroplication, for the treatment of gastro-oesophageal reflux disease;
- (b) gamma knife surgery;
- (c) intradiscal electro thermal arthroplasty;
- (d) intravascular ultrasound (except where used in conjunction with intravascular brachytherapy);
- (e) intro-articular viscosupplementation, for the treatment of osteoarthritis of the knee;

- (f) low intensity ultrasound treatment, for the acceleration of bone fracture healing, using a bone growth stimulator;
- (g) lung volume reduction surgery, for advanced emphysema;
- (h) photodynamic therapy, for skin and mucosal cancer;
- (i) placement of artificial bowel sphincters, in the management of faecal incontinence;
- (j) selective internal radiation therapy for any condition other than hepatic metastases that are secondary to colorectal cancer;
- (k) specific mass measurement of bone alkaline phosphatase;
- (l) transmyocardial laser revascularisation;
- (m) vertebral axial decompression therapy, for chronic back pain.
- (n) autologous chondrocyte implantation and matrix-induced autologous chondrocyte implantation.
- (o) vertebroplasty

Health Screening Services

Unless the Minister otherwise directs Medicare benefits are not payable for health screening services. A health screening service is defined as a medical examination or test that is not reasonably required for the management of the medical condition of the patient. Services covered by this proscription include such items as:

- (a) multiphasic health screening;
- (b) mammography screening (except as provided for in Items 59300/59303);
- (c) testing of fitness to undergo physical training program, vocational activities or weight reduction programs;
- (d) compulsory examinations and tests to obtain a flying, commercial driving or other licence;
- (e) entrance to schools and other educational facilities;
- (f) for the purposes of legal proceedings;
- (g) compulsory examinations for admission to aged persons' accommodation and pathology services associated with clinical ecology.

The Minister has directed that Medicare benefits be paid for the following categories of health screening:

- (a) a medical examination or test on a symptomless patient by that patient's own medical practitioner in the course of normal medical practice, to ensure the patient receives any medical advice or treatment necessary to maintain their state of health. Benefits would be payable for the attendance and tests which are considered reasonably necessary according to patients individual circumstances (such as age, physical condition, past personal and family history). For example, a cervical screening test in a person (see General Explanatory note 12.3 for more information), blood lipid estimation where a person has a family history of lipid disorder. However, such routine check-up should not necessarily be accompanied by an extensive battery of diagnostic investigations;
- (b) a pathology service requested by the National Heart Foundation of Australia, Risk Evaluation Service;
- (c) age or health related medical examinations to obtain or renew a licence to drive a private motor vehicle;
- (d) a medical examination of, and/or blood collection from persons occupationally exposed to sexual transmission of disease, in line with conditions determined by the relevant State or Territory health authority, (one examination or

collection per person per week). Benefits are not paid for pathology tests resulting from the examination or collection;

(e) a medical examination for a person as a prerequisite of that person becoming eligible to foster a child or children;

(f) a medical examination being a requisite for Social Security benefits or allowances;

(g) a medical or optometrical examination provided to a person who is an unemployed person (as defined by the Social Security Act 1991), at the request of a prospective employer.

The National Policy for the National Cervical Screening Program (NCSP) is as follows:

(a) Cervical screening should be undertaken every five years in asymptomatic persons, using a primary human papillomavirus (HPV) test with partial genotyping and reflex liquid based cytology (LBC) triage;

(b) Persons who have ever been sexually active should commence cervical screening at 25 years of age;

(c) Persons aged 25 years or older and less than 70 years will receive invitations and reminders to participate in the program;

(d) Persons will be invited to exit the program by having a HPV test between 70 years or older and less than 75 years of age and may cease cervical screening if their test result is low risk;

(e) Persons 75 years of age or older who have either never had a cervical screening test or have not had one in the previous five years, may request a cervical screening test and can be screened;

(f) All persons, both HPV vaccinated and unvaccinated, are included in the program;

(g) Self collection of a sample for testing is available for persons who are aged 30 years and over and has never participated in the NCSP; or is overdue for cervical screening by two years or longer.

- Self collection must be facilitated and requested by a healthcare professional who also routinely offers cervical screening services;

- The self collection device and the HPV test, when used together, must meet the requirements of the National Pathology Accreditation Advisory Council (NPAAC) Requirements for Laboratories Reporting Tests for the NCSP; and

(h) Persons with intermediate and higher risk screening test results should be followed up in accordance with the cervical screening pathway and the NCSP: Guidelines for the management of screen detected abnormalities, screening women in specific populations and investigation of women with abnormal vaginal bleeding (2016 Guidelines) – endorsed by the Royal Australian College of General Practitioners, the Royal Australian and New Zealand College of Obstetricians and Gynaecologists, the Royal College of Pathologists of Australasia, the Australian Society of Gynaecologic Oncologists and the Australian Society for Colposcopy and Cervical Pathology.

Note 1: As separate items exist for routine screening, screening in specific population and investigation of persons with abnormal vaginal bleeding, treating practitioners are asked to clearly identify on the request form, if the sample is collected as part of routine screening or for another purpose (see paragraph PP.16.11 of Pathology Services Explanatory Notes in Category 6).

Note 2: Where reflex cytology is performed following the detection of HPV in routine screening, the HPV test and the LBC test results must be issued as a combined report with the overall risk rating.

Note 3: See items 2501 to 2509, and 2600 to 2616 in Group A18 and A19 of Category 1 - Professional Attendances and the associated explanatory notes for these items in Category 1 - Professional Attendances.

Services rendered to a doctor's dependants, practice partner, or practice partner's dependants

Medicare benefits are not paid for professional services rendered by a medical practitioner to dependants or partners or a partner's dependants.

A 'dependant' person is a spouse or a child. The following provides definitions of these dependant persons:

(a) a spouse, in relation to a dependant person means:

a. a person who is legally married to, and is not living, on a permanent basis, separately and apart from, that person; and

b. a de facto spouse of that person.

(b) a child, in relation to a dependant person means:

a. a child under the age of 16 years who is in the custody, care and control of the person or the spouse of the person; and

b. a person who:

(i) has attained the age of 16 years who is in the custody, care and control of the person or the spouse of the person; or

(ii) is receiving full time education at a school, college or university; and

(iii) is not being paid a disability support pension under the Social Security Act 1991; and

(iv) is wholly or substantially dependent on the person or on the spouse of the person.

GN.14.34 Principles of interpretation of the MBS

Each professional service listed in the MBS is a complete medical service. Where a listed service is also a component of a more comprehensive service covered by another item, the benefit for the latter service will cover the former.

Where a service is rendered partly by one medical practitioner and partly by another, only the one amount of benefit is payable. For example, where a radiographic examination is started by one medical practitioner and finalised by another.

GN.14.35 Services attracting benefits on an attendance basis

Some services are not listed in the MBS because they are regarded as forming part of a consultation or they attract benefits on an attendance basis.

GN.14.36 Consultation and procedures rendered at the one attendance

Where, during a single attendance, a consultation (under Category 1 of the MBS) and another medical service (under any other Category of the Schedule) occur, benefits are payable subject to certain exceptions, for both the consultation and the other service. Benefits are not payable for the consultation in addition to an item rendered on the same occasion where the item is qualified by words such as "each attendance", "attendance at which", "including associated attendances/consultations", and all items in Group T6 and T9. In the case of radiotherapy treatment (Group T2 of Category 3) benefits are payable for both the radiotherapy and an initial referred consultation.

Where the level of benefit for an attendance depends upon the consultation time (for example, in psychiatry), the time spent in carrying out a procedure which is covered by another item in the MBS, may not be included in the consultation time.

A consultation fee may only be charged if a consultation occurs; that is, it is not expected that consultation fee will be charged on every occasion a procedure is performed.

GN.14.37 Aggregate items

The MBS includes a number of items which apply only in conjunction with another specified service listed in the MBS. These items provide for the application of a fixed loading or factor to the fee and benefit for the service with which they are rendered.

When these particular procedures are rendered in conjunction, the legislation provides for the procedures to be regarded as one service and for a single patient gap to apply. The Schedule fee for the service will be ascertained in accordance with the particular rules shown in the relevant items.

GN.14.38 Residential aged care facility

A residential aged care facility is defined in the *Aged Care Act 1997*; the definition includes facilities formerly known as nursing homes and hostels.

GN.15.39 Practitioners should maintain adequate and contemporaneous records

All practitioners who provide, or initiate, a service for which a Medicare benefit is payable, should ensure they maintain **adequate** and **contemporaneous** records.

Note: 'Practitioner' is defined in Section 81 of the *Health Insurance Act 1973* and includes: medical practitioners, dentists, optometrists, chiropractors, physiotherapists, podiatrists and osteopaths.

Since 1 November 1999 PSR Committees determining issues of inappropriate practice have been obliged to consider if the practitioner kept adequate and contemporaneous records. It will be up to the peer judgement of the PSR Committee to decide if a practitioner's records meet the prescribed standards.

The standards which determine if a record is adequate and contemporaneous are prescribed in the *Health Insurance (Professional Services Review) Regulations 1999*.

To be **adequate**, the patient or clinical record needs to:

clearly identify the name of the patient; and

contain a separate entry for each attendance by the patient for a service and the date on which the service was rendered or initiated; and

each entry needs to provide clinical information adequate to explain the type of service rendered or initiated; and

each entry needs to be sufficiently comprehensible that another practitioner, relying on the record, can effectively undertake the patient's ongoing care.

To be **contemporaneous**, the patient or clinical record should be completed at the time that the service was rendered or initiated or as soon as practicable afterwards. Records for hospital patients are usually kept by the hospital and the practitioner could rely on these records to document in-patient care.

The Department of Human Services (DHS) has developed an [Health Practitioner Guideline to substantiate that a specific treatment was performed](#) which is located on the DHS website.

CATEGORY 3: THERAPEUTIC PROCEDURES

SUMMARY OF CHANGES FROM 01/08/2019

The 01/08/2019 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

(a) new item	New
(b) amended description	Amend
(c) fee amended	Fee
(d) item number changed	Renum
(e) EMSN changed	EMSN

Note Amended

TN.8.22

THERAPEUTIC PROCEDURES NOTES

TN.1.1 Hyperbaric Oxygen Therapy - (Items 13015, 13020, 13025 and 13030)

Hyperbaric Oxygen Therapy not covered by these items would attract benefits on an attendance basis. For the purposes of these items, a comprehensive hyperbaric medicine facility means a separate hospital area that, on a 24 hour basis:

- (a) is equipped and staffed so that it is capable of providing to a patient:
 - (i) hyperbaric oxygen therapy at a treatment pressure of at least 2.8 atmospheric pressure absolute (180 kilopascal gauge pressure); and
 - (ii) mechanical ventilation and invasive cardiovascular monitoring within a monoplace or multiplace chamber for the duration of the hyperbaric treatment; and
- (b) is under the direction of at least 1 medical practitioner who is rostered, and immediately available, to the facility during the facility's ordinary working hours if the practitioner:
 - (i) is a specialist with training in diving and hyperbaric medicine; or
 - (ii) holds a Diploma of Diving and Hyperbaric Medicine of the South Pacific Underwater Medicine Society; and
- (c) is staffed by:
 - (i) at least 1 medical practitioner with training in diving and hyperbaric medicine who is present in the facility and immediately available at all times when patients are being treated at the facility; and
 - (ii) at least 1 registered nurse with specific training in hyperbaric patient care to the published standards of the Hyperbaric Technicians and Nurses Association, who is present during hyperbaric oxygen therapy; and
- (d) has admission and discharge policies in operation.

TN.1.2 Haemodialysis - (Items 13100 and 13103)

Item 13100 covers the supervision in hospital by a medical specialist for the management of dialysis, haemofiltration, haemoperfusion or peritoneal dialysis in the patient who is not stabilised where the total attendance time by the supervising medical specialist exceeds 45 minutes.

Item 13103 covers the supervision in hospital by a medical specialist for the management of dialysis, haemofiltration, haemoperfusion or peritoneal dialysis in a stabilised patient, or in the case of an unstabilised patient, where the total attendance time by the supervising medical specialist does not exceed 45 minutes.

TN.1.3 Consultant Physician Supervision of Home Dialysis - (Item 13104)

Item 13104 covers the planning and management of dialysis and the supervision of a patient on home dialysis by a consultant physician in the practice of his or her specialty of renal medicine. Planning and management would cover the consultant physician participating in patient management discussions coordinated by renal centres. Supervision of the patient at home can be undertaken by telephone or other electronic medium, and includes:

- Regular ordering, performance and interpretation of appropriate biochemical and haematological studies (generally monthly);
- Feed-back of results to the home patient and his or her treating general physician;
- Adjustments to medications and dialysis therapies based upon these results;

- Co-ordination of regular investigations required to keep patient on active transplantation lists, where relevant;
- Referral to, and communication with, other specialists involved in the care of the patient; and
- Being available to advise the patient or the patient's agent.

A record of the services provided should be made in the patient's clinical notes.

The schedule fee equates to one hour of time spent undertaking these activities. It is expected that the item will be claimed once per month, to a maximum of 12 claims per year. The patient should be informed that he or she will incur a charge for which a Medicare rebate will be payable.

This item includes dialysis conducted in a residential aged care facility. In remote areas, where a patient's home is an unsuitable environment for home dialysis due to a lack of space, or the absence of telecommunication, electricity and water utilities, the item includes dialysis in a community facility such as the local primary health care clinic.

TN.1.4 Assisted Reproductive Technology ART Services - (Items 13200 to 13221)

Medicare benefits are not payable in respect of ANY other item in the Medicare Benefits Schedule (including Pathology and Diagnostic Imaging) in lieu of or in connection with items 13200 - 13221. Specifically, Medicare benefits are not payable for these items in association with items 104, 105, 14203, 14206, 35637, pathology tests or diagnostic imaging.

A treatment cycle that is a series of treatments for the purposes of ART services is defined as beginning either on the day on which treatment by superovulatory drugs is commenced or on the first day of the patient's menstrual cycle, and ending either; not more than 30 days later, or if a service mentioned in item 13212, 13215 or 13221 is provided in connection with the series of treatments-on the day after the day on which the last of those services is provided.

The date of service in respect of treatment covered by Items 13200, 13201, 13203, 13206, 13209 and 13218 is **DEEMED** to be the **FIRST DAY** of the treatment cycle.

Items 13200, 13201, 13202 and 13203 are linked to the supply of hormones under the Section 100 (National Health Act) arrangements. Providers must notify the Department of Human Services of Medicare card numbers of patients using hormones under this program, and hormones are only supplied for patients claiming one of these four items.

Medicare benefits are not payable for assisted reproductive services rendered in conjunction with surrogacy arrangements where surrogacy is defined as 'an arrangement whereby a woman agrees to become pregnant and to bear a child for another person or persons to whom she will transfer guardianship and custodial rights at or shortly after birth'.

NOTE: Items 14203 and 14206 are not payable for artificial insemination.

TN.1.5 Intracytoplasmic Sperm Injection - (Item 13251)

Item 13251 provides for intracytoplasmic sperm injection for male factor infertility under the following circumstances:

- where fertilisation with standard IVF is highly unlikely to be successful; or
- where in a previous cycle of IVF, the fertilisation rate has failed due to low or no fertilisation.

Item 13251 excludes a service to which item 13218 applies. Sperm retrieval procedures associated with intracytoplasmic sperm injection are covered under items 37605 and 37606.

Items 13251, 37605, 37606 do not include services provided in relation to artificial insemination using the husband's or donated sperm.

TN.1.6 Peripherally Inserted Central Catheters

Peripherally inserted central catheters (PICC) are an alternative to standard percutaneous central venous catheter placement or surgically placed intravenous catheters where long-term venous access is required for ongoing patient therapy.

Medicare benefits for PICC can be claimed under central vein catheterisation items 13318, 13319, 13815 and 22020.

These items are for central vein catheterisation (where the tip of the catheter is positioned in a central vein) and cannot be used for venous catheters where the tip is positioned in a peripheral vein.

TN.1.7 Administration of Blood or Bone Marrow already Collected (Item 13706)

Item 13706 is payable for the transfusion of blood, or platelets or white blood cells or bone marrow or gamma globulins. This item is not payable when gamma globulin is administered intramuscularly.

TN.1.8 Collection of Blood - (Item 13709)

Medicare benefits are payable under Item 13709 for collection of blood for autologous transfusions in respect of an impending operation (whether or not the blood is used), or when homologous blood is required in an emergency situation.

Medicare benefits are not payable under Item 13709 for collection of blood for long-term storage for possible future autologous transfusion, or for other forms of directed blood donation.

TN.1.9 Intensive Care Units - (Items 13870 to 13888)

'Intensive Care Unit' means a separate hospital area that:

- (a) is equipped and staffed so as to be capable of providing to a patient:
 - (i) mechanical ventilation for a period of several days; and
 - (ii) invasive cardiovascular monitoring; and
- (b) is supported by:
 - (i) at least one specialist or consultant physician in the specialty of intensive care who is immediately available and exclusively rostered to the ICU during normal working hours; and
 - (ii) a registered medical practitioner who is present in the hospital and immediately available to the unit at all times; and
 - (iii) a registered nurse for at least 18 hours in each day; and
- (c) has defined admission and discharge policies.

"immediately available" means that the intensivist must be predominantly present in the ICU during normal working hours. Reasonable absences from the ICU would be acceptable to attend conferences, meetings and other commitments which might involve absences of up to 2 hours during the working day.

"exclusively rostered" means that the specialist's sole clinical commitment is to intensive care associated activities and is not involved in any other duties that may preclude immediate availability to intensive care if required.

For Neonatal Intensive Care Units an 'Intensive Care Unit' means a separate hospital area that:

- (a) is equipped and staffed so as to be capable of providing to a patient, being a newly-born child:
 - (i) mechanical ventilation for a period of several days; and

- (ii) invasive cardiovascular monitoring; and
- (b) is supported by:
 - (i) at least one consultant physician in the specialty of paediatric medicine, appointed to manage the unit, and who is immediately available and exclusively rostered to the ICU during normal working hours; and
 - (ii) a registered medical practitioner who is present in the hospital and immediately available to the unit at all times; and
 - (iii) a registered nurse for at least 18 hours in each day; and
- (c) has defined admission and discharge policies.

Medicare benefits are payable under the 'management' items only once per day irrespective of the number of intensivists involved with the patient on that day. However, benefits are also payable for an attendance by another specialist/consultant physician who is not managing the patient but who has been asked to attend the patient. Where appropriate, accounts should be endorsed to the effect that the consultation was not part of the patient's intensive care management in order to identify which consultations should attract benefits in addition to the intensive care items.

In respect of Neonatal Intensive Care Units, as defined above, benefits are payable for admissions of babies who meet the following criteria:-

- (i) all babies weighing less than 1000gms;
- (ii) all babies with an endotracheal tube, and for the 24 hours following endotracheal tube removal;
- (iii) all babies requiring Constant Positive Airway Pressure (CPAP) for acute respiratory instability;
- (iv) all babies requiring more than 40% oxygen for more than 4 hours;
- (v) all babies requiring an arterial line for blood gas or pressure monitoring; or
- (vi) all babies having frequent seizures.

Cases may arise where babies admitted to a Neonatal Intensive Care Unit under the above criteria who, because they no longer satisfy the criteria are ready for discharge, in accordance with accepted discharge policies, but who are physically retained in the Neonatal Intensive Care Unit for other reasons. For benefit purposes such babies must be deemed as being discharged from the Neonatal Intensive Care Unit and not eligible for benefits under items 13870, 13873, 13876, 13881, 13882, 13885 and 13888.

Likewise, Medicare benefits are not payable under items 13870, 13873, 13876, 13881, 13882, 13885 and 13888 in respect of babies not meeting the above criteria, but who, for whatever other reasons, are physically located in a Neonatal Intensive Care Unit.

Medicare benefits are payable for admissions to an Intensive Care Unit following surgery only where clear clinical justification for post-operative intensive care exists.

TN.1.10 Procedures Associated with Intensive Care - (Items 13818, 13842, 13847, 13848 and 13857)

Item 13818 covers the insertion of a right heart balloon catheter (Swan-Ganz catheter). Benefits are payable under this item only once per day except where a second discrete operation is performed on that day.

Benefits are payable under items 13876 (within an ICU) and 11600 (outside an ICU) once only for each type of pressure, up to a maximum of 4 pressures per patient per calendar day, and irrespective of the number of the practitioners involved in monitoring the pressures.

If a service covered by Item 13842 is provided outside of an ICU, in association with, for example, an anaesthetic, benefits are payable for Item 13842 in addition to Item 13870 where the services are performed on the same day. Where this occurs, accounts should be endorsed "performed outside of an Intensive Care Unit" against Item 13842.

Items 13847 and 13848

Item 13847 covers management of counterpulsation by intraaortic balloon on the first day and includes initial and subsequent consultations and monitoring of parameters. Insertion of the intraaortic balloon is covered under item 38609 Management on each day subsequent to the first is covered under item 13848.

"management" of counterpulsation of intraaortic balloon means full haemodynamic assessment and management on several occasions during the day.

Item 13857 covers the establishment of airway access and initiation of ventilation on a patient outside intensive care for the purpose of subsequent ventilatory support in intensive care. Benefits are not payable under Item 13857 where airway access and ventilation is initiated in the context of an anaesthetic for surgery even if it is likely that following surgery the patient will be ventilated in an ICU. In such cases the appropriate anaesthetic item/s should be itemised.

Medicare benefits are not payable for sampling by arterial puncture under Item 13839 in addition to Item 13870 (and 13873) on the same day. Benefits are payable under Item 13842 (Intra-arterial cannulation) in addition to Item 13870 (and 13873) when performed on the same day.

TN.1.11 Management and Procedures in Intensive Care Unit - (Items 13870, 13873, 13876)

Medicare benefits are only payable for management and procedures in intensive care covered by items 13870, 13873, 13876, 13882, 13885 and 13888 where the service is provided by a specialist or consultant physician who is immediately available and exclusively rostered for intensive care.

Items 13870 and 13873

Medicare Benefits Schedule fees for Items 13870 and 13873 represent global daily fees covering all attendances by the intensivist in the ICU (and attendances provided by support medical personnel) and all electrocardiographic monitoring, arterial sampling and, bladder catheterisation performed on the patient on the one day. If a patient is transferred from one ICU to another it would be necessary for an arrangement to be made between the two ICUs regarding the billing of the patient.

Items 13870 and 13873 should be itemised on accounts according to each calendar day and not per 24 hour period. For periods when patients are in an ICU for very short periods (say less than 2 hours) with minimal ICU management during that time, a fee should not be raised.

Item 13876

Item 13876 covers the monitoring of pressures in an ICU. Benefits are paid only once for each type of pressure, up to a maximum of 4 pressures per patient per calendar day and irrespective of the number of medical practitioners involved in the monitoring of pressures in an ICU.

Item 11600

Item 11600 covers the monitoring of pressures outside the ICU by practitioners not associated with the ICU. Benefits are paid only once for each type of pressure, up to a maximum of 4 pressures per patient per calendar day and irrespective of the number of practitioners involved in monitoring the pressures.

TN.1.12 Cytotoxic Chemotherapy Administration - (Item 13915)

Following a recommendation of a National Health and Medical Research Council review committee in 2005, Medicare benefits are no longer payable for professional services rendered for the purpose of administering microwave (UHF radiowave) cancer therapy, including the intravenous injection of drugs used in the therapy.

TN.1.13 Implanted Pump or Reservoir/Drug Delivery Device - (Items 13939 and 13942)

The schedule fee for Items 13939 and 13942 includes a component to cover accessing of the drug delivery device. Accordingly, benefits are not payable under Item 13945 (Long-term implanted drug delivery device, accessing of) in addition to Items 13939 and 13942.

TN.1.14 PUVA or UVB Therapy - (Item 14050)

A component for any necessary subsequent consultation has been included in the Schedule fee for this item. However, the initial consultation preceding commencement of a course of therapy would attract benefits.

Phototherapy should only be used when:

- Topical therapy has failed or is inappropriate.
- The severity of the condition as assessed by specialist opinion (including symptoms, extent of involvement and quality of life impairment) warrants its use.

Narrow band UVB should be the preferred option for phototherapy unless there is documented evidence of superior efficacy of UVA phototherapy for the condition being treated.

Phototherapy treatment for psoriasis and palmoplantar pustulosis should consider the National Institute of Health and Care Excellence's Guidelines at <https://pathways.nice.org.uk/pathways/psoriasis>

Involvement by a specialist in the specialty of dermatology at a minimum should include a letter stating the diagnosis, need for phototherapy, estimated time of treatment and review date.

TN.1.15 Laser Photocoagulation - (Items 14100 to 14124)

All laser equipment used for services under items 14100-14124 must be listed on the Australian Register of Therapeutic Goods.

The Australasian College of Dermatologists has advised that the following ranges (applicable to an average 4 year old child and an adult) should be used as a reference to the treatment areas specified in Items 14106 - 14124:

Entire forehead	50 -75 cm ²
Cheek	55 - 85 cm ²
Nose	10 -25 cm ²
Chin	10 - 30 cm ²
Unilateral midline anterior - posterior neck	60 - 220 cm ²
Dorsum of hand	25 - 80 cm ²
Forearm	100 - 250 cm ²
Upper arm	105 - 320 cm ²

TN.1.16 Facial Injections of Poly-L-Lactic Acid - (Items 14201 and 14202)

Poly-L-lactic acid is listed within the standard arrangements on the Pharmaceutical Benefits Scheme (PBS) as an Authority Required listing for initial and maintenance treatments, for facial administration only, of severe facial lipoatrophy caused by therapy for HIV infection.

TN.1.17 Hormone and Living Tissue Implantation - (Items 14203 and 14206)

Items 14203 and 14206 are not payable for artificial insemination.

TN.1.18 Implantable Drug Delivery System for the Treatment of Severe Chronic Spasticity - (Items 14227 to 14242)

Baclofen is provided under Section 100 of the Pharmaceutical Benefits Scheme for the following indications: Severe chronic spasticity, where oral agents have failed or have caused unacceptable side effects, in patients with chronic spasticity:

- (a) of cerebral origin; or
- (b) due to multiple sclerosis; or
- (c) due to spinal cord injury; or
- (d) due to spinal cord disease.

Items 14227 to 14242 should be used in accordance with these restrictions.

TN.1.19 Immunomodulating Agent - (Item 14245)

Item 14245 applies only to a service provided by a medical practitioner who is registered by the Department of Human Services CEO to participate in the arrangements made, under paragraph 100 (1) (b) of the National Health Act 1953, for the purpose of providing an adequate pharmaceutical service for persons requiring treatment with an immunomodulating agent.

These drugs are associated with risk of anaphylaxis which must be treated by a medical practitioner. For this reason a medical practitioner needs to be available at all times during the infusion in case of an emergency.

TN.1.20 Therapeutic procedures may be provided by a specialist trainee (Items 13015 to 51318)

(1) Items 13015 to 51318 (excluding 13209 (T1) 16400 to 16500 (T4), 16590 to 16591 (T4), 17610 to 17690 (T6) and 18350 to 18373 (T11) apply to a medical service provided by;

- (a) A medical practitioner, or;
- (b) A specialist trainee under the direct supervision of a medical practitioner.

(2) For paragraph (1) (b), a medical service provided by a specialist trainee is taken to have been provided by the supervising medical practitioner.

(3) In this rule: Specialist trainee means a medical practitioner who is undertaking an Australian Medical Council (AMC) accredited Medical College Training Program. Direct Supervision means personal and continuous attendance for the duration of the service.

TN.1.21 Telehealth Specialist Services

These notes provide information on the telehealth MBS video consultation items by specialists, consultant physicians and psychiatrists. A video consultation involves a single specialist, consultant physician or psychiatrist attending a patient, with the possible support of another medical practitioner, a participating optometrist, a participating nurse practitioner, a participating midwife, practice nurse, Aboriginal and Torres Strait Islander health practitioner or Aboriginal health worker at the patient end of the video conference. The decision as to whether the patient requires clinical support at the patient end of the specialist service is based on whether the support is necessary for the provision of the specialist service. Telehealth specialist services can be provided to patients when there is no patient-end support service provided.

MBS items numbers 99, 112, 149, 288, 389, 2820, 3015, 6016, 13210, 16399 and 17609 allow a range of existing MBS attendance items to be provided via video conferencing. These items have a derived fee which is equal to 50% of the schedule fee for the consultation item claimed (e.g. 50% of the schedule fee for item 104) when billed with one of the associated consultation items (such as 104). A patient rebate of 85% for the derived fee is payable.

Six MBS item numbers (113, 114, 384, 2799, 3003 and 6004) provide for an initial attendance via videoconferencing by a specialist, consultant physician, consultant occupational physician, pain medicine specialist/consultant physician, palliative medicine specialist/consultant physician or neurosurgeon where the service is 10 minutes or less. The items are stand-alone items and do not have a derived fee.

Where an attendance is more than 10 minutes, practitioners should use the existing item numbers consistent with the current arrangements. Normal restrictions which apply for initial consultations will also apply for these items. For example, if a patient has an initial consultation via telehealth, they cannot also claim an initial face-to-face consultation as part of the same course of treatment.

Clinical indications

The specialist, consultant physician or psychiatrist must be satisfied that it is clinically appropriate to provide a video consultation to a patient. The decision to provide clinically relevant support to the patient is the responsibility of the specialist, consultant physician or psychiatrist.

Telehealth specialist services can be provided to patients when there is no patient-end support service provided.

Restrictions

The MBS telehealth attendance items are not payable for services to an admitted hospital patient (this includes hospital in the home patients). Benefits are not payable for telephone or email consultations. In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Billing Requirements

All video consultations provided by specialists, consultant physicians or psychiatrists must be **separately billed**. That is, only the relevant telehealth MBS consultation item and the associated derived item are to be itemised on the account/bill/voucher. Any other service/item billed should be itemised on a separate account/bill/voucher. This will ensure the claim is accurately assessed as being a video consultation and paid accordingly.

Practitioners should not use the notation 'telehealth', 'verbal consent' or 'Patient unable to sign' to overcome administrative difficulties to obtaining a patient signature for bulk billed claims (for further information see mbsonline.gov.au/telehealth).

Eligible Geographical Areas

Geographic eligibility for telehealth services funded under Medicare are determined according to the Australian Standard Geographical Classification Remoteness Area (ASGC-RA) classifications. Telehealth Eligible Areas are areas that are outside a Major City (RA1) according to ASGC-RA (RA2-5). Patients and providers are able to check their eligibility by following the links on the MBS Online website (www.mbsonline.gov.au/telehealth).

There is a requirement for the patient and specialist to be located a minimum of 15km apart at the time of the consultation. Minimum distance between specialist and patient video consultations are measured by the most direct (ie least distance) route by road. The patient or the specialist is not permitted to travel to an area outside the minimum 15 km distance in order to claim a video conference.

This rule will not apply to specialist video consultation with patients who are a care recipient in a residential care service; or at an Aboriginal Medical Service or an Aboriginal Community Controlled Health Service for which a direction made under subsection 19(2) of the *Health Insurance Act 1973* as these patients are able to receive telehealth services anywhere in Australia.

Telehealth Eligible Service Areas are defined at www.mbsonline.gov.au/telehealth-eligible-areas

Record Keeping

Participating telehealth practitioners must keep contemporaneous notes of the consultation including documenting that the service was performed by video conference, the date, time and the people who participated.

Only clinical details recorded at the time of the attendance count towards the time of the consultation. It does not include information added at a later time, such as reports of investigations.

Extended Medicare Safety Net (EMSN)

All telehealth consultations (with the exception of the participating optometrist telehealth items) are subject to EMSN caps. The EMSN caps for ART and Obstetric telehealth items 13210 and 16399 were set in reference to the EMSN caps applying to the base ART and Obstetric consultation items.

The EMSN caps for all other telehealth consultation items are equal to 300% of the schedule fee (to a maximum of \$500). The maximum EMSN benefit for a telehealth consultation is equal to the sum of the EMSN cap for the base item and the EMSN cap for the telehealth items.

Aftercare Rule

Video consultations are subject to the same aftercare rules as practitioners providing face-to-face consultations.

Multiple attendances on the same day

In some situations a patient may receive a telehealth consultation and a face to face consultation by the same or different practitioner on the same day.

Medicare benefits may be paid for more than one video consultation on a patient on the same day by the same practitioner, provided the second (and any following) video consultations are not a continuation of the initial or earlier video consultations. Practitioners will need to provide the times of each consultation on the patient's account or bulk billing voucher.

Referrals

The referral procedure for a video consultation is the same as for conventional face-to-face consultations.

Technical requirements

In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Individual clinicians must be confident that the technology used is able to satisfy the item descriptor and that software and hardware used to deliver a videoconference meets the applicable laws for security and privacy.

TN.1.22 Cryopreservation of semen (Item 13260)

A semen cycle collection process involves obtaining up to 3 semen samples on alternate days producing up to 50 cryopreserved straws of frozen sperm.

Maximum of two semen collection cycles, one cycle collected prior to a patient undergoing the first cytotoxic/radiation treatment and the second cycle to be collected if the patient has relapsed and requires treatment.

TN.1.23 MBS Item 13105 - Haemodialysis in very remote areas

The purpose of item 13105 is for the management of haemodialysis to a person with end-stage renal disease. The service is provided in very remote areas (defined as Modified Monash 7) by a registered nurse, an Aboriginal health

worker or an Aboriginal and Torres Strait Islander health practitioner on behalf of a medical practitioner. The service is supervised by a medical practitioner (either in person or remotely).

As a condition of receiving the Medicare-funded dialysis treatment, the patient's care must be managed by a nephrologist, with the patient being treated or reviewed by the nephrologist every 3 to 6 months (either in person or remotely).

The patient is not an admitted patient of a hospital and the service is provided in a primary care setting.

Item 13104 should not be claimed if item 13105 is claimed.

TN.2.1 Radiation Oncology - General

The level of benefits for radiotherapy depends on the number of fields irradiated and the number of times treatment is given.

Treatment by rotational therapy (including rotational therapy using volumetric modulated arc therapy or intensity modulated arc therapy) is considered to be equivalent to the irradiation of three fields (i.e., irradiation of one field plus two additional fields). For example, each attendance for orthovoltage rotational therapy at the rate of 3 or more treatments per week would attract benefit under Item 15100 plus twice Item 15103. Similarly, each attendance for arc therapy of the prostate using a dual photon linear accelerator would attract benefits under 15248 plus twice 15263. Benefits are payable once only per attendance for treatment irrespective of whether one or more arcs are involved.

Benefits for consultations rendered on the same day as treatment and/or planning services are only payable where they are clinically relevant. A clinically relevant service is one that is generally accepted by the relevant profession as being necessary for the appropriate treatment of the patient.

From 1 January 2016, separate items were listed for intensity-modulated radiotherapy (IMRT) and image-guided radiotherapy (IGRT). Previously, these services were delivered and billed against the existing MBS three-dimensional radiotherapy items.

Definitions have been inserted into the Health Insurance (General Medical Services Table) Regulation as follows:

In items 15275, 15555, 15565 and 15715:

IMRT means intensity modulated radiation therapy, being a form of external beam radiation therapy that uses high energy megavoltage x rays to allow the radiation dose to conform more closely to the shape of a tumour by changing the intensity of the radiation beam.

In item 15275:

IGRT means image guided radiation therapy, being a process in which frequent 2 and 3 dimensional imaging is captured as close as possible to the time of treatment by using x rays and scans (similar to CT scans) before and during radiotherapy treatment, in order to show the size, shape and position of a cancer as well as the surrounding tissues and bones.

TN.2.2 Brachytherapy of the Prostate - (Item 15338)

One of the requirements of item 15338 is that patients have a Gleason score of less than or equal to 7. However, where the patient has a score of 7, comprising a primary score of 4 and a secondary score of 3 (ie. 4+3=7), it is recommended that low dose rate brachytherapy form part of a combined modality treatment.

Low dose brachytherapy of the prostate should be performed in patients with favourable anatomy allowing adequate access to the prostate without pubic arch interference and who have a life expectancy of at least greater than 10 years.

An 'approved site' for the purposes of this item is one at which radiation oncology services may be performed lawfully under the law of the State or Territory in which the site is located.

TN.2.3 Planning Services - (Items 15500 to 15565 and 15850)

A planning episode involves field setting and dosimetry. One plan only will attract Medicare benefits in a course of treatment. However, benefits are payable for a plan for brachytherapy and a plan for megavoltage or teletherapy treatment, when rendered in the same course of treatment.

- further planning items where planning is undertaken in respect of a different tumour site to that (or those) specified in the original prescription by the radiation oncologist; and
- a plan for brachytherapy and a plan for megavoltage or teletherapy treatment, when rendered in the same course of treatment.

Items 15500 to 15533 (inclusive) are for a planning episode for 2D conformal radiotherapy. Items 15550 to 15562 (excluding item 15555) are for a planning episode for 3D conformal radiotherapy. Items 15555 and 15565 are for a planning episode for intensity modulated radiotherapy (IMRT).

It is expected that the 2D simulation items (15500, 15503, and 15506) would be used in association with the 2D planning items (15518, 15521, and 15524) in a planning episode. However there may be instances where it may be appropriate to use the 3D Planning items (15556, 15559, and 15562) in association with the 2D simulation items (15500, 15503, and 15506) in a planning episode. The 3D simulation items (15550 and 15553) can only be billed in association with the 3D planning items (15556, 15559, and 15562) in a planning episode. However there may be instances where it may be appropriate to use the 3D Planning items (15556, 15559, and 15562) in association with the 2D simulation items (15500, 15503, and 15506) in a planning episode. The 3D simulation items (15550 and 15553) can only be billed in association with the 3D planning items (15556, 15559, and 15562) in a planning episode. The IMRT simulation item (15555) and IMRT dosimetry item (15565) can only be billed in association with each other and only for IMRT (i.e. neither IMRT simulation item 15555, nor IMRT dosimetry item 15565, can be billed in association with any of the 2D or 3D treatment items for an episode of care).

Item 15850 covers radiation source localisation for high dose brachytherapy treatment. Item 15850 applies to brachytherapy provided to any part of the body.

TN.2.4 Treatment Verification - (Items 15700 to 15705, 15710, 15715 and 15800)

In these items, 'treatment verification' means:

A quality assurance procedure designed to facilitate accurate and reproducible delivery of the radiotherapy/brachytherapy to the prescribed site(s) or region(s) of the body as defined in the treatment prescription and/or associated dose plan(s) and which utilises the capture and assessment of appropriate images using:

- (a) x-rays (this includes portal imaging, either megavoltage or kilovoltage, using a linear accelerator)
- (b) computed tomography; or
- (c) ultrasound, where the ultrasound equipment is capable of producing images in at least three dimensions (unidimensional ultrasound is not covered); together with a record of the assessment(s) and any correction(s) of significant treatment delivery inaccuracies detected.

Item 15700 covers the acquisition of images in one plane and incorporates both single or double exposures. The item may be itemised once only per attendance for treatment, irrespective of the number of treatment sites verified at that attendance.

Item 15705 (multiple projections) applies where images in more than one plane are taken, for example orthogonal views to confirm the isocentre. It can be itemised only where verification is undertaken of treatments involving three or more fields. It can be itemised where single projections are acquired for multiple sites, eg multiple

metastases for palliative patients. Item 15705 can be itemized only once per attendance for treatment, irrespective of the number of treatment sites verified at that attendance.

15710 applies to volumetric verification imaging using acquisition by computed tomography. It can be itemised only where verification is undertaken of treatments involving three or more fields and only once per attendance for treatment, irrespective of the number of treatment sites verified at that attendance.

Items 15700, 15705, 15710 and 15715:

- may not be claimed together for the same attendance at which treatment is rendered
- must only be itemised when the verification procedure has been prescribed in the treatment plan and the image has been reviewed by a radiation oncologist

Item 15800 - Benefits are payable once only per attendance at which treatment is verified.

TN.3.1 Therapeutic Dose of Yttrium 90 - (Item 16003)

This item cannot be claimed for selective internal radiation therapy (SIRT).

See items 35404, 35406 and 35408 for SIRT using SIR_Spheres (yttrium-90 microspheres).

TN.4.1 Antenatal Service Provided by a Nurse, Midwife or an Aboriginal and Torres Strait Islander health practitioner - (Item 16400)

Item 16400 can only be claimed by a medical practitioner (including a vocationally registered or non-vocationally registered GP, a specialist or a consultant physician) where an antenatal service is provided to a patient by a midwife, nurse or Aboriginal and Torres Strait Islander health practitioner on behalf of the medical practitioner at, or from an eligible practice location in a regional, rural or remote area.

A regional, rural or remote area is classified as a RRMA 3-7 area under the Rural Remote Metropolitan Areas classification system.

Evidence based national or regional guidelines should be used in the delivery of this antenatal service.

An eligible practice location is the place associated with the medical practitioner's Medicare provider number from which the service has been provided. If you are unsure if the location is in an eligible area you can call the Department of Human Services on 132 150.

A midwife means a registered midwife who holds a current practising certificate as a midwife issued by a State or Territory regulatory authority and who is employed by, or whose services are otherwise retained by, the medical practitioner or their practice.

A nurse means a registered or enrolled nurse who holds a current practising certificate as a nurse issued by a State or Territory regulatory authority and who is employed by, or whose services are otherwise retained by, the medical practitioner or their practice. The nurse must have appropriate training and skills to provide an antenatal service.

An Aboriginal and Torres Strait Islander health practitioner means a person who has been registered as an Aboriginal and Torres Strait Islander health practitioner by the Aboriginal and Torres Strait Islander Health Practice Board of Australia and meets the Board's registration standards. The Aboriginal and Torres Strait Islander health practitioner must be employed or retained by a general practice, or by a health service that has an exemption to claim Medicare benefits under subsection 19(2) of the Health Insurance Act 1973.

An Aboriginal and Torres Strait Islander health practitioner may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioner; Aboriginal and Torres Strait Islander health practitioner; or Torres Strait Islander health practitioner.

The midwife, nurse or Aboriginal and Torres Strait Islander health practitioner must also comply with any relevant legislative or regulatory requirements regarding the provision of the antenatal service.

The medical practitioner under whose supervision the antenatal service is provided retains responsibility for the health, safety and clinical outcomes of the patient. The medical practitioner must be satisfied that the midwife, nurse or Aboriginal and Torres Strait Islander health practitioner is appropriately registered, qualified and trained, and covered by indemnity insurance to undertake antenatal services.

Supervision at a distance is recognised as an acceptable form of supervision. This means that the medical practitioner does not have to be physically present at the time the service is provided. However, the medical practitioner should be able to be contacted if required.

The medical practitioner is not required to see the patient or to be present while the antenatal service is being provided by the midwife, nurse or Aboriginal and Torres Strait Islander health practitioner. It is up to the medical practitioner to decide whether they need to see the patient. Where a consultation with the medical practitioner has taken place prior to or following the antenatal service, the medical practitioner is entitled to claim for their own professional service, but item 16400 cannot be claimed in these circumstances.

Item 16400 cannot be claimed in conjunction with another antenatal attendance item for the same patient, on the same day by the same practitioner.

A bulk billing incentive item (10990, 10991 or 10992) cannot be claimed in conjunction with item 16400. An incentive payment is incorporated into the schedule fee.

Item 16400 can only be claimed 10 times per pregnancy.

Item 16400 cannot be claimed for an admitted patient of a hospital.

TN.4.2 Items for Initial and Subsequent Obstetric Attendances (Items 16401 and 16404)

16401 and 16404 replace items 104 and 105 for any specialist obstetric attendance relating to pregnancy. This includes any initial and subsequent attendance with a specialist obstetrician for discussion of pregnancy or pregnancy related conditions or complications, or any postnatal care provided to the patient subsequent to the expiration of normal aftercare period. Item 16500 is still claimed for routine antenatal attendances. These items are subject to Extended Medicare Safety Net caps.

TN.4.3 Antenatal Care - (Item 16500)

In addition to routine antenatal attendances covered by Item 16500 the following services, where rendered during the antenatal period, attract benefits:-

- (a) Items 16501, 16502, 16505, 16508, 16509 (but not normally before the 24th week of pregnancy), 16511, 16512, 16514, 16533, 16534 and 16600 to 16627.
- (b) The initial consultation at which pregnancy is diagnosed.
- (c) The first referred consultation by a specialist obstetrician when called in to advise on the pregnancy.
- (d) All other services, excluding those in Category 1 and Group T4 of Category 3 not mentioned above.
- (e) Treatment of an intercurrent condition not directly related to the pregnancy.

Item 16514 relates to antenatal cardiotocography in the management of high risk pregnancy. Benefits for this service are not attracted when performed during the course of the labour and birth.

TN.4.4 External Cephalic Version for Breech Presentation - (Item 16501)

Contraindications for this item are as follows:

- antepartum haemorrhage (APH)
- multiple pregnancy,
- fetal anomaly,
- fetal growth restriction,
- caesarean section scar,
- uterine anomalies,
- obvious cephalopelvic disproportion,
- isoimmunization,
- premature rupture of the membranes.

TN.4.5 Labour and Birth - (Items 16515, 16518, 16519, 16530 and 16531)

Benefits for management of labour and birth covered by Items 16515, 16518, 16519, 16530 and 16531 includes the following (where indicated):-

- surgical and/or intravenous infusion induction of labour;
- forceps or vacuum extraction;
- evacuation of products of conception by manual removal (not being an independent procedure);
- episiotomy or repair of tears.

Item 16519 covers birth by any means including Caesarean section. If, however, a patient is referred, or her care is transferred to another medical practitioner for the specific purpose of birth by Caesarean section, whether because of an emergency situation or otherwise, then Item 16520 would be the appropriate item.

In some instances the obstetrician may not be able to be present at all stages of confinement. In these circumstances, Medicare benefits are payable under Item 16519 provided that the doctor attends the patient as soon as possible during the confinement and assumes full responsibility for the mother and baby.

Two items in Group T9 provide benefits for assistance by a medical practitioner at a Caesarean section. Item 51306 relates to those instances where the Caesarean section is the only procedure performed, while Item 51309 applies when other operative procedures are performed at the same time.

Where, during labour, a medical practitioner hands the patient over to another medical practitioner, benefits are payable under Item 16518 for the referring practitioner's services. The second practitioner's services would attract benefits under Item 16515 (i.e., management of vaginal birth) or Item 16520 (Caesarean section). If another medical practitioner is called in for the management of the labour and birth, benefits for the referring practitioner's services should be assessed under Item 16500 for the routine antenatal attendances and on a consultation basis for the postnatal attendances, if performed.

At a high risk birth benefits will be payable for the attendance of any medical practitioner (called in by the doctor in charge of the birth) for the purposes of resuscitation and subsequent supervision of the neonate. Examples of high risk births include cases of difficult vaginal birth, Caesarean section or the birth of babies with Rh problems and babies of toxæmic mothers.

TN.4.6 Caesarean Section - (Item 16520)

Benefits under this item are attracted only where the patient has been specifically referred to another medical practitioner for the management of the birth by Caesarean section and the practitioner carrying out the procedure has not rendered any antenatal care. Caesarean sections performed in any other circumstances attract benefits under Item 16519.

TN.4.7 Complicated Confinement - (Item 16522)

A record of the clinical indication/s that constitute billing under item 16522 should be retained on the patient's medical record.

TN.4.8 Labour and Birth Where Care is Transferred by a Participating Midwife - (Items 16527 to 16528)

Where the intrapartum care of a patient is transferred to a medical practitioner by a participating midwife for the management of birth, item 16527 or 16528 would apply depending on the service provided.

Where care is transferred by a participating midwife prior to the commencement of labour, items 16519 or 16522 would apply.

TN.4.9 Items for Planning and Management of a Pregnancy (Item 16590 and 16591)

Item 16590 is intended to provide for the planning and management of pregnancy that has progressed beyond 28 weeks, where the medical practitioner is intending to undertake the birth for a privately admitted patient.

Item 16591 is for the planning and management of a pregnancy that has progressed beyond 28 weeks and the medical practitioner is providing shared antenatal care and is not intending to undertake the birth.

Items 16590 and 16591 are to include the provision of a mental health assessment of the patient. Both items are subject to Extended Medicare Safety Net caps and should only be claimed by a patient once per pregnancy.

TN.4.10 Post-Partum Care - (Items 16515 to 16520 and 16564 to 16573)

The Schedule fees and benefits payable for Items 16519 and 16520 cover all postnatal attendances on the mother and the baby, except in the following circumstances:-

- (i) where the medical services rendered are outside those covered by a consultation, e.g., blood transfusion;
- (ii) where the condition of the mother and/or baby is such as to require the services of another practitioner (e.g., paediatrician, gynaecologist, etc);
- (iii) where the patient is transferred, at arms length, to another medical practitioner for routine post-partum, care (eg mother and/or baby returning from a larger centre to a country town or transferring between hospitals following confinement). In such cases routine postnatal attendances attract benefits on an attendance basis. The transfer of a patient within a group practice would not qualify for benefits under this arrangement except in the case of Items 16515 and 16518. These items cover those occasions when a patient is handed over while in labour from the practitioner who under normal circumstances would have delivered the baby, but because of compelling circumstances decides to transfer the patient to another practitioner for the birth;
- (iv) where during the postnatal period a condition occurs which requires treatment outside the scope of normal postnatal care;
- (v) in the management of premature babies (i.e. babies born prior to the end of the 37th week of pregnancy or where the birth weight of the baby is less than 2500 grams) during the period that close supervision is necessary.

Normal postnatal care by a medical practitioner would include:-

- (i) uncomplicated care and check of

- lochia
 - fundus
 - perineum and vulva/episiotomy site
 - temperature
 - bladder/urination
 - bowels
- (ii) advice and support for establishment of breast feeding
 - (iii) psychological assessment and support
 - (iv) Rhesus status
 - (v) Rubella status and immunisation
 - (vi) contraception advice/management

Examinations of apparently normal newborn infants by consultant or specialist paediatricians do not attract benefits

Items 16564 to 16573 relate to postnatal complications and should not be itemised in respect of a normal birth. To qualify for benefits under these items, the patient is required to be transferred to theatre, or be administered general anaesthesia or epidural injection for the performance of the procedure. Utilisation of the items will be closely monitored to ensure appropriate usage.

TN.4.11 Interventional Techniques - (Items 16600 to 16627, 35518 and 35674)

For Items 16600 to 16627, 35518 and 35674 there is no component in the Schedule fee for the associated ultrasound. Benefits are attracted for the ultrasound under the appropriate items in Group II of the Diagnostic Imaging Services Table. If diagnostic ultrasound is performed on a separate occasion to the procedure, benefits would be payable under the appropriate ultrasound item.

Item 51312 provides a benefit for assistance by a medical practitioner at interventional techniques covered by Items 16606, 16609, 16612, 16615, and 16627.

TN.4.12 Telehealth Specialist Services

These notes provide information on the telehealth MBS video consultation items by specialists, consultant physicians and psychiatrists. A video consultation involves a single specialist, consultant physician or psychiatrist attending a patient, with the possible support of another medical practitioner, a participating optometrist, a participating nurse practitioner, a participating midwife, practice nurse, Aboriginal and Torres Strait Islander health practitioner or Aboriginal health worker at the patient end of the video conference. The decision as to whether the patient requires clinical support at the patient end of the specialist service is based on whether the support is necessary for the provision of the specialist service. Telehealth specialist services can be provided to patients when there is no patient-end support service provided.

MBS items numbers 99, 112, 149, 288, 389, 2820, 3015, 6016, 13210, 16399 and 17609 allow a range of existing MBS attendance items to be provided via video conferencing. These items have a derived fee which is equal to 50% of the schedule fee for the consultation item claimed (e.g. 50% of the schedule fee for item 104) when billed with one of the associated consultation items (such as 104). A patient rebate of 85% for the derived fee is payable.

Six MBS item numbers (113, 114, 384, 2799, 3003 and 6004) provide for an initial attendance via videoconferencing by a specialist, consultant physician, consultant occupational physician, pain medicine

specialist/consultant physician, palliative medicine specialist/consultant physician or neurosurgeon where the service is 10 minutes or less. The items are stand alone items and do not have a derived fee.

Where an attendance is more than 10 minutes, practitioners should use the existing item numbers consistent with the current arrangements. Normal restrictions which apply for initial consultations will also apply for these items. For example, if a patient has an initial consultation via telehealth, they cannot also claim an initial face-to-face consultation as part of the same course of treatment.

Clinical indications

The specialist, consultant physician or psychiatrist must be satisfied that it is clinically appropriate to provide a video consultation to a patient. The decision to provide clinically relevant support to the patient is the responsibility of the specialist, consultant physician or psychiatrist.

Telehealth specialist services can be provided to patients when there is no patient-end support service provided.

Restrictions

The MBS telehealth attendance items are not payable for services to an admitted hospital patient (this includes hospital in the home patients). Benefits are not payable for telephone or email consultations. In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Billing Requirements

All video consultations provided by specialists, consultant physicians or psychiatrists must be **separately billed**. That is, only the relevant telehealth MBS consultation item and the associated derived item are to be itemised on the account/bill/voucher. Any other service/item billed should be itemised on a separate account/bill/voucher. This will ensure the claim is accurately assessed as being a video consultation and paid accordingly.

Practitioners should not use the notation 'telehealth', 'verbal consent' or 'Patient unable to sign' to overcome administrative difficulties to obtaining a patient signature for bulk billed claims (for further information see mbsonline.gov.au/telehealth).

Eligible Geographical Areas

Geographic eligibility for telehealth services funded under Medicare are determined according to the Australian Standard Geographical Classification Remoteness Area (ASGC-RA) classifications. Telehealth Eligible Areas are areas that are outside a Major City (RA1) according to ASGC-RA (RA2-5). Patients and providers are able to check their eligibility by following the links on the MBS Online website (www.mbsonline.gov.au/telehealth).

There is a requirement for the patient and specialist to be located a minimum of 15km apart at the time of the consultation. Minimum distance between specialist and patient video consultations are measured by the most direct (ie least distance) route by road. The patient or the specialist is not permitted to travel to an area outside the minimum 15 km distance in order to claim a video conference.

This rule will not apply to specialist video consultation with patients who are a care recipient in a residential care service; or at an Aboriginal Medical Service or an Aboriginal Community Controlled Health Service for which a direction made under subsection 19(2) of the *Health Insurance Act 1973*, as these patients are able to receive telehealth services anywhere in Australia.

Telehealth Eligible Service Areas are defined at www.mbsonline.gov.au/telehealth-eligible-areas

Record Keeping

Participating telehealth practitioners must keep contemporaneous notes of the consultation including documenting that the service was performed by video conference, the date, time and the people who participated.

Only clinical details recorded at the time of the attendance count towards the time of the consultation. It does not include information added at a later time, such as reports of investigations.

Extended Medicare Safety Net (EMSN)

All telehealth consultations (with the exceptions of the participating optometrist telehealth items) are subject to EMSN caps. The EMSN caps for ART and Obstetric telehealth items 13210 and 16399 were set in reference to the EMSN caps applying to the base ART and Obstetric consultation items.

The EMSN caps for all other telehealth consultation items are equal to 300% of the schedule fee (to a maximum of \$500). The maximum EMSN benefit for a telehealth consultation is equal to the sum of the EMSN cap for the base item and the EMSN cap for the telehealth items.

Aftercare Rule

Video consultations are subject to the same aftercare rules as practitioners providing face-to-face consultations.

Multiple attendances on the same day

In some situations a patient may receive a telehealth consultation and a face to face consultation by the same or different practitioner on the same day.

Medicare benefits may be paid for more than one video consultation on a patient on the same day by the same practitioner, provided the second (and any following) video consultations are not a continuation of the initial or earlier video consultations. Practitioners will need to provide the times of each consultation on the patient's account or bulk billing voucher.

Referrals

The referral procedure for a video consultation is the same as for conventional face-to-face consultations.

Technical requirements

In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Individual clinicians must be confident that the technology used is able to satisfy the item descriptor and that software and hardware used to deliver a videoconference meets the applicable laws for security and privacy.

TN.4.13 Mental Health Assessments for Obstetric Patients (Items 16590, 16591, 16407)

Items for the planning and management of pregnancy (16590 and 16591) and for a postnatal attendance between 4 and 8 weeks after birth (16407), include a mental health assessment of the patient, including screening for drug and alcohol use and domestic violence, to be performed by the clinician or another suitably qualified health professional on behalf of the clinician. A mental health assessment must be offered to each patient, however, if the patient chooses not to undertake the assessment, this does not preclude a rebate being payable for these items.

It is recommended that mental health assessments associated with items 16590, 16591, and 16407 be conducted in accordance with the National Health and Medical Research Council (NHMRC) endorsed guideline: *Mental Health Care in the Perinatal Period: Australian Clinical Practice Guideline* – October 2017, Centre for Perinatal Excellence.

Results of the mental health assessment must be recorded in the patient's medical record. A record of a patient's decision not to undergo a mental health assessment must be recorded in the patient's clinical notes.

TN.4.14 Extended Medicare Safety Net (EMSN) for Obstetric Services (Items 16531, 16533 and 16534)

The Extended Medicare Safety Net (EMSN) benefit is capped at 65% of the schedule fee for obstetric items 16531, 16533, and 16534. However, as these items are for in-hospital services only, the EMSN does not apply

TN.6.1 Pre-anaesthesia Consultations by an Anaesthetist - (Items 17610 to 17625)

Pre-anaesthesia consultations are covered by items in the range 17610 - 17625.

Pre-anaesthesia consultations comprise 4 time-based items utilising 15 minute increments up to and exceeding 45 minutes, in conjunction with content-based descriptors. A pre-anaesthesia consultation will attract benefits under the appropriate items based on **BOTH** the duration of the consultation **AND** the complexity of the consultation in accordance with the requirements outlined in the content-based item descriptions.

Whether or not the proposed procedure proceeds, the pre-anaesthetic attendance will attract benefits under the appropriate consultation item in the range 17610 - 17625, as determined by the duration and content of the consultation.

The following provides further guidance on utilisation of the appropriate items in common clinical situations:

(i) Item 17610 (15 mins or less) - a pre-anaesthesia consultation of a straightforward nature occurring prior to investigative procedures and other routine surgery. This item covers routine pre-anaesthesia consultation services including the taking of a brief history, a limited examination of the patient including the cardio-respiratory system and brief discussion of an anaesthesia plan with the patient.

(ii) Item 17615 (16-30 mins) - a pre-anaesthesia consultation of between 16 to 30 minutes duration **AND** of significantly greater complexity than that required under item 17610. To qualify for benefits patients will be undergoing advanced surgery or will have complex medical problems. The consultation will involve a more extensive examination of the patient, for example: the cardio-respiratory system, the upper airway, anatomy relevant to regional anaesthesia and invasive monitoring. An anaesthesia plan of management should be formulated, of which there should be a written record included in the patient notes.

(iii) Item 17620 (31-45 mins) - a pre-anaesthesia consultation of high complexity involving all of the requirements of item 17615 and of between 31 to 45 minutes duration. The pre-anaesthesia consultation will also involve evaluation of relevant patient investigations and the formulation of an anaesthesia plan of management of which there should be a written record in the patient notes.

(iv) Item 17625 (more than 45 mins) - a pre-anaesthesia consultation of high complexity involving all of the requirements of item 17615 and item 17620 and of more than 45 minutes duration. The pre-anaesthesia consultation will also involve evaluation of relevant patient investigations as well as discussion of the patient's medical condition and/or anaesthesia plan of management with other relevant healthcare professionals. An anaesthesia plan of management should be formulated, of which there should be a written record included in the patient notes.

Some examples of advanced surgery that may require a longer consultation under items 17615-17625 would include:

- Bowel resection
- Caesarean section
- Neonatal surgery
- Major laparotomies
- Radical cancer resection
- Major reconstructive surgery eg free flap transfers, breast reconstruction

- major joint arthroplasty
- joint reconstruction
- Thoracotomy
- Craniotomy
- Spinal surgery eg spinal fusion, discectomy
- Major vascular surgery eg aortic aneurysm repair, arterial bypass surgery, carotid artery endarterectomy

Some examples of complex medical problems in relation to items 17615-17625 would include:

- Major cardiac problems - e.g cardiomyopathy, unstable ischaemic heart disease, heart failure
- Major respiratory disease - e.g COPD, respiratory failure, acute lung conditions eg. infection and asthma,
- Major neurological conditions - CVA, intra/extra cerebral haemorrhage, cerebral palsy and/or major intellectual disability, degenerative conditions of the CNS
- Major metabolic conditions - e.g unstable diabetes, uncontrolled hyperthyroidism, renal failure, liver failure, immune deficiency
- Anaesthetic problems - eg past history of awareness, known or anticipated difficulty with securing the airway, malignant hyperpyrexia, drug allergy,
- Other conditions -
- patients with history of stroke/TIA's presenting for vascular surgery
- patients on anti-platelet agents presenting for major surgery requiring management of anticoagulant status
- patients with poor respiratory/cardiac function presenting for major surgery requiring management of perioperative medications, analgesia and monitoring

NOTE I:

It is important to note that:

- patients undergoing the types of advanced surgery listed above but who are otherwise of reasonable health and who, therefore, do not require a longer pre-anaesthesia consultation as provided for under items 17615-17625, would qualify for benefits under item 17610; and
- not all patients with complex medical problems will qualify for a longer consultation under items 17615-17625. For example, patients who have reasonably stable diabetes may only require a short consultation, covered under item 17610. Similarly, patients with reasonably well controlled emphysema (COPD) undergoing minor surgery may only require a short pre-anaesthesia consultation (item 17610), whereas the same patient scheduled for an upper abdominal laparotomy and with recent onset angina with the possible need for ICU postoperatively may require a longer consultation.

NOTE II:

- Consultation services covered by pain specialists items in the range 2801-3000 cannot be claimed in conjunction with items 17610-17625
- The consultation time under items 17610 - 17625 only applies to the period of active attendance on the patient and does not include time spent in discussion with other health care practitioners.

- The requirement of a written patient management plan in items 17615-17625 or the discussion of the management plan with other health care professions, where this occurs, does not relate to and cannot be claimed in conjunction GP Management Plans, Team Care Arrangements, Multidisciplinary Care Plans or Case Conference items in Group A15 of the MBS.

TN.6.2 Referred Anaesthesia Consultations - (Items 17640 to 17655)

Referred anaesthesia consultations (other than pre-anaesthesia attendances) where the patient is referred will be covered by new items in the range 17640 - 17655. These new items replace the use of specialist referred items 104 and 105. Items 104 and 105 will no longer apply to referred anaesthesia consultations provided by specialist anaesthetists.

Referred anaesthesia consultations comprise 4 time-based items utilising 15 minute increments up to and exceeding 45 minutes, in conjunction with content-based descriptors. Services covered by these specialist referred items include consultations in association with the following:

(i) Acute pain management

- Postoperative, utilising specialised techniques eg Patient Controlled Analgesia System (PCAS)
- as an independent service eg pain control following fractured ribs requiring nerve blocks
- obstetric pain management

(ii) Perioperative management of patients

- postoperative management of cardiac, respiratory and fluid balance problems following major surgery
- vascular access procedures (other than intra-operative peripheral vascular access procedures)

Items 17645 - 17655 will involve the examination of multiple systems and the formulation of a written management plan. Items 17650 and 17655 would also entail the ordering and/or evaluation of relevant patient investigations.

NOTE :

- It should be noted that the consultation time under items 17640 - 17655 only applies to the period of active attendance on the patient and does not include time spent in discussion with other health care practitioners.
- Consultation services covered by pain medicine specialist items in the range 2801-3000 cannot be claimed in conjunction with items 17640 - 17655.
- The requirement of a written patient management plan in items 17645-17655 or the discussion of the management plan with other health care professions, where this occurs, does not relate to and cannot be claimed in conjunction GP Management Plans, Team Care Arrangements, Multidisciplinary Care Plans or Case Conference items in Group A15 of the MBS.

It would be expected that in the vast majority of cases, the insertion of a peripheral venous cannula (other than in association with anaesthesia) where the patient is referred, would attract benefit under item 17640. However, in exceptional clinical circumstances, where the procedure is considerably more difficult and exceeds 15 minutes, such as for patients with chronic disease undergoing long term intravenous therapy, paediatric patients or patients having chemotherapy, item 17645 would apply.

TN.6.3 Anaesthetist Consultations - Other - (Items 17680, 17690)

A consultation occurring immediately before the institution of major regional blockade for a patient in labour is covered by item 17680.

Item 17690 can only be claimed where all of the conditions set out in (a) to (d) of item 17690 have been met.

Item 17690 can only be claimed in conjunction with a service covered by items 17615, 17620, or 17625.

Item 17690 cannot be claimed where the pre-anaesthesia consultation covered by items 17615, 17620 or 17625 is provided on the same day as admission to hospital for the subsequent episode of care involving anaesthesia services.

NOTE: Consultation services covered by pain medicine specialist items in the range 2801-3000 cannot be claimed in conjunction with anaesthesia consultation items 17610 - 17690.

TN.6.4 Telehealth Specialist Services

These notes provide information on the telehealth MBS video consultation items by specialists, consultant physicians and psychiatrists. A video consultation involves a single specialist, consultant physician or psychiatrist attending a patient, with the possible support of another medical practitioner, a participating optometrist, a participating nurse practitioner, a participating midwife, practice nurse or Aboriginal health worker at the patient end of the video conference. The decision as to whether the patient requires clinical support at the patient end of the specialist service is based on whether the support is necessary for the provision of the specialist service. Telehealth specialist services can be provided to patients when there is no patient-end support service provided.

MBS items numbers 99, 112, 149, 288, 389, 2820, 3015, 6016, 13210, 16399 and 17609 allow a range of existing MBS attendance items to be provided via video conferencing. These items have a derived fee which is equal to 50% of the schedule fee for the consultation item claimed (e.g. 50% of the schedule fee for item 104) when billed with one of the associated consultation items (such as 104). A patient rebate of 85% for the derived fee is payable.

Six MBS item numbers (113, 114, 384, 2799, 3003 and 6004) provide for an initial attendance via videoconferencing by a specialist, consultant physician, consultant occupational physician, pain medicine specialist/consultant physician, palliative medicine specialist/consultant physician or neurosurgeon where the service is 10 minutes or less. The items are stand-alone items and do not have a derived fee.

Where an attendance is more than 10 minutes, practitioners should use the existing item numbers consistent with the current arrangements. Normal restrictions which apply for initial consultations will also apply for these items. For example, if a patient has an initial consultation via telehealth, they cannot also claim an initial face-to-face consultation as part of the same course of treatment.

Clinical indications

The specialist, consultant physician or psychiatrist must be satisfied that it is clinically appropriate to provide a video consultation to a patient. The decision to provide clinically relevant support to the patient is the responsibility of the specialist, consultant physician or psychiatrist.

Telehealth specialist services can be provided to patients when there is no patient-end support service provided.

Restrictions

The MBS telehealth attendance items are not payable for services to an admitted hospital patient (this includes hospital in the home patients). Benefits are not payable for telephone or email consultations. In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Billing Requirements

All video consultations provided by specialists, consultant physicians or psychiatrists must be **separately billed**. That is, only the relevant telehealth MBS consultation item and the associated derived item are to be itemised on the account/bill/voucher. Any other service/item billed should be itemised on a separate account/bill/voucher. This will ensure the claim is accurately assessed as being a video consultation and paid accordingly.

Practitioners should not use the notation 'telehealth', 'verbal consent' or 'Patient unable to sign' to overcome administrative difficulties to obtaining a patient signature for bulk billed claims (for further information see mbsonline.gov.au/telehealth).

Eligible Geographical Areas

Geographic eligibility for telehealth services funded under Medicare are determined according to the Australian Standard Geographical Classification Remoteness Area (ASGC-RA) classifications. Telehealth Eligible Areas are areas that are outside a Major City (RA1) according to ASGC-RA (RA2-5). Patients and providers are able to check their eligibility by following the links on the MBS Online website (www.mbsonline.gov.au/telehealth).

There is a requirement for the patient and specialist to be located a minimum of 15km apart at the time of the consultation. Minimum distance between specialist and patient video consultations are measured by the most direct (ie least distance) route by road. The patient or the specialist is not permitted to travel to an area outside the minimum 15 km distance in order to claim a video conference.

This rule will not apply to specialist video consultation with patients who are a care recipient in a residential care service; or at an Aboriginal Medical Service or an Aboriginal Community Controlled Health Service for which a direction made under subsection 19(2) of the *Health Insurance Act 1973* as these patients are able to receive telehealth services anywhere in Australia.

Telehealth Eligible Service Areas are defined at www.mbsonline.gov.au/telehealth-eligible-areas

Record Keeping

Participating telehealth practitioners must keep contemporaneous notes of the consultation including documenting that the service was performed by video conference, the date, time and the people who participated.

Only clinical details recorded at the time of the attendance count towards the time of the consultation. It does not include information added at a later time, such as reports of investigations.

Extended Medicare Safety Net (EMSN)

All telehealth consultations (with the exceptions of the participating optometrist telehealth items) are subject to EMSN caps. The EMSN caps for ART and Obstetric telehealth items 13210 and 16399 were set in reference to the EMSN caps applying to the base ART and Obstetric consultation items.

The EMSN caps for all other telehealth consultation items are equal to 300% of the schedule fee (to a maximum of \$500). The maximum EMSN benefit for a telehealth consultation is equal to the sum of the EMSN cap for the base item and the EMSN cap for the telehealth items.

Aftercare Rule

Video consultations are subject to the same aftercare rules as practitioners providing face-to-face consultations.

Multiple attendances on the same day

In some situations a patient may receive a telehealth consultation and a face to face consultation by the same or different practitioner on the same day.

Medicare benefits may be paid for more than one video consultation on a patient on the same day by the same practitioner, provided the second (and any following) video consultations are not a continuation of the initial or earlier video consultations. Practitioners will need to provide the times of each consultation on the patient's account or bulk billing voucher.

Referrals

The referral procedure for a video consultation is the same as for conventional face-to-face consultations.

Technical requirements

In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, a MBS rebate for a telehealth attendance is not payable.

Individual clinicians must be confident that the technology used is able to satisfy the item descriptor and that software and hardware used to deliver a videoconference meets the applicable laws for security and privacy.

TN.7.1 Regional or Field Nerve Blocks - General

A nerve block is interpreted as the anaesthetising of a substantial segment of the body innervated by a large nerve or an area supplied by a smaller nerve where the technique demands expert anatomical knowledge and a high degree of precision.

Where anaesthesia combines a regional nerve block with general anaesthesia for an operative procedure, benefit will be paid only under the relevant anaesthesia item as set out in Group T10.

Where a regional or field nerve block is administered by a medical practitioner other than the practitioner carrying out the operation, the block attracts benefits under the Group T10 anaesthesia item and not the block item in Group T7.

Where a regional or field nerve block which is covered by an item in Group T7 is administered by a medical practitioner in the course of a surgical procedure undertaken by that practitioner, then such a block will attract benefit under the appropriate Group T7 item.

When a block is carried out in cases not associated with an operation, such as for intractable pain or during labour, the service falls under Group T7.

Digital ring analgesia, local infiltration into tissue surrounding a lesion or paracervical (uterine) analgesia are not eligible for the payment of Medicare benefits under items within Group T7. Where procedures are carried out with local infiltration or digital block as the means of anaesthesia, that anaesthesia is considered to be part of the procedure.

TN.7.2 Maintenance of Regional or Field Nerve Block - (Items 18222 and 18225)

Medicare benefit is attracted under these items only when the service is performed other than by the operating surgeon. This does not preclude benefits for an obstetrician performing an epidural block during labour.

When the service is performed by the operating surgeon during the post-operative period of an operation it is considered to be part of the normal aftercare. In these circumstances a Medicare benefit is not attracted.

TN.7.3 Intrathecal or Epidural Injection - (Item 18232)

This item covers caudal infusion/injection.

TN.7.4 Intrathecal or Epidural Infusion - (Items 18226 and 18227)

Items 18226 and 18227 apply where intrathecal or epidural analgesia is required for obstetric patients in the after hours period. For these items, the after hours period is defined as the period from 8pm to 8am on any weekday, or any time on a Saturday, Sunday or a public holiday.

Medicare benefits are only payable under item 18227 where more than 50% of the service is provided in the after hours period, otherwise benefits would be payable under item 18219.

TN.7.5 Regional or Field Nerve Blocks - (Items 18234 to 18298)

Items in the range 18234 - 18298 are intended to cover the injection of anaesthetic into the nerve or nerve sheath and not for the treatment of carpal tunnel or similar compression syndromes.

Paravertebral nerve block items 18274 and 18276 cover the provision of regional anaesthesia for surgical and related procedures for the management acute pain or of chronic pain related to radiculopathy. Infiltration of the soft tissue of the paravertebral area for the treatment of other pain symptoms does not attract benefit under these items. Additionally, items 18274 and 18276 do not cover facet joint blocks/injections. This procedure is covered under item 39013.

Item 18292 may not be claimed for the injection of botulinum toxin, but may be claimed where a neurolytic agent (such as phenol) is used to treat the obturator nerve in patients receiving botulinum toxin injections under item 18354 for a dynamic foot deformity.

TN.8.1 Surgical Operations

Many items in Group T8 of the Schedule are qualified by one of the following phrases:

- "as an independent procedure";
- "not being a service associated with a service to which another item in this Group applies"; or
- "not being a service to which another item in this Group applies"

An explanation of each of these phrases is as follows.

As an Independent Procedure

The inclusion of this phrase in the description of an item precludes payment of benefits when:-

- (i) a procedure so qualified is associated with another procedure that is performed through the same incision, e.g. nephrostomy (Item 36552) in the course of an open operation on the kidney for another purpose;
- (ii) such procedure is combined with another in the same body area, e.g. direct examination of larynx (Item 41846) with another operation on the larynx or trachea;
- (iii) the procedure is an integral part of the performance of another procedure, e.g. removal of foreign body (Item 30067/30068) in conjunction with debridement of deep or extensive contaminated wound of soft tissue, including suturing of that wound when performed under general anaesthetic (Item 30023).

Not Being a Service Associated with a Service to which another Item in this Group Applies

"Not being a service associated with a service to which another item in this Group applies" means that benefit is not payable for any other item in that Group when it is performed on the same occasion as this item. eg item 30106.

"Not being a service associated with a service to which Item applies" means that when this item is performed on the same occasion as the reference item no benefit is payable. eg item 39330.

Not Being a Service to which another Item in this Group Applies

"Not being a service to which another item in this Group applies" means that this item may be itemised if there is no specific item relating to the service performed, e.g. Item 30387 (Laparotomy involving operation on abdominal viscera (including pelvic viscera), not being a service to which another item in this Group applies). Benefits may be attracted for an item with this qualification as well as benefits for another service during the course of the same operation.

TN.8.2 Multiple Operation Rule

The fees for two or more operations, listed in Group T8 (other than Subgroup 12 of that Group), performed on a patient on the one occasion (except as provided in paragraph T8.2.3) are calculated by the following rule:-

- 100% for the item with the greatest Schedule fee
- plus 50% for the item with the next greatest Schedule fee
- plus 25% for each other item.

Note:

- (a) Fees so calculated which result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents.
- (b) Where two or more operations performed on the one occasion have Schedule fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.
- (c) The Schedule fee for benefits purposes is the aggregate of the fees calculated in accordance with the above formula.
- (d) For these purposes the term "operation" only refers to all items in Group T8 (other than Subgroup 12 of that Group).

This rule does not apply to an operation which is one of two or more operations performed under the one anaesthetic on the same patient if the medical practitioner who performed the operation did not also perform or assist at the other operation or any of the other operations, or administer the anaesthetic. In such cases the fees specified in the Schedule apply.

Where two medical practitioners operate independently and either performs more than one operation, the method of assessment outlined above would apply in respect of the services performed by each medical practitioner.

If the operation comprises a combination of procedures which are commonly performed together and for which a specific combined item is provided in the Schedule, it is regarded as the one item and service in applying the multiple operation rule.

There are a number of items in the Schedule where the description indicates that the item applies only when rendered in association with another procedure. The Schedule fees for such items have therefore been determined on the basis that they would always be subject to the "multiple operation rule".

Where the need arises for the patient to be returned to the operating theatre on the same day as the original procedure for further surgery due to post-operative complications, which would not be considered as normal aftercare - see paragraph T8.2, such procedures would generally not be subject to the "multiple operation rule". Accounts should be endorsed to the effect that they are separate procedures so that a separate benefit may be paid.

Extended Medicare Safety Net Cap

The Extended Medicare Safety Net (EMSN) benefit cap for items subject to the multiple operations rule, where all items in that claim are subject to a cap are calculated from the abated (reduced) schedule fee.

For example, if an item has a Schedule fee of \$100 and an EMSN benefit cap equal to 80 per cent of the schedule fee, the calculated EMSN benefit cap would be \$80. However, if the schedule fee for the item is reduced by 50 per cent in accordance with the multiple operations rule provisions, and all items in that claim carry a cap, the calculated EMSN benefit cap for the item is \$40 (50% of \$100*80%).

TN.8.3 Procedure Performed with Local Infiltration or Digital Block

It is to be noted that where a procedure is carried out with local infiltration or digital block as the means of anaesthesia, that anaesthesia is considered to be part of the procedure and an additional benefit is therefore not payable.

TN.8.4 Aftercare (Post-operative Treatment)

Definition

Section 3(5) of the Health Insurance Act 1973 states that services included in the Schedule (other than attendances) include all professional attendances necessary for the purposes of post-operative treatment of the patient. For the purposes of this book, post-operative treatment is generally referred to as "aftercare".

Aftercare is deemed to include all post-operative treatment rendered by medical specialists and consultant physicians, and includes all attendances until recovery from the operation, the final check or examination, regardless of whether the attendances are at the hospital, private rooms, or the patient's home. Aftercare need not necessarily be limited to treatment given by the surgeon or to treatment given by any one medical practitioner.

If the initial procedure is performed by a general practitioner, normal aftercare rules apply to any post-operative service provided by the same practitioner.

The medical practitioner determines each individual aftercare period depending on the needs of the patient as the amount and duration of aftercare following an operation may vary between patients for the same operation, as well as between different operations.

Private Patients

Medicare will not normally pay for any consultations during an aftercare period as the Schedule fee for most operations, procedures, fractures and dislocations listed in the MBS item includes a component of aftercare.

There are some instances where the aftercare component has been excluded from the MBS item and this is clearly indicated in the item description.

There are also some minor operations that are merely stages in the treatment of a particular condition. As such, attendances subsequent to these services should not be regarded as aftercare but rather as a continuation of the treatment of the original condition and attract benefits. Likewise, there are a number of services which may be performed during the aftercare period for pain relief which would also attract benefits. This includes all items in Groups T6 and T7, and items 39013, 39100, 39115, 39118, 39121, 39127, 39130, 39133, 39136, 39324 and 39327.

Where there may be doubt as to whether an item actually does include the aftercare, the item description includes the words "including aftercare".

If a service is provided during the aftercare phase for a condition not related to the operation, then this can be claimed, provided the account identifies the service as 'Not normal aftercare', with a brief explanation of the reason for the additional services.

If a patient was admitted as a private patient in a public hospital, then unless the MBS item does not include aftercare, no Medicare benefits are payable for aftercare.

Medicare benefits are not payable for surgical procedures performed primarily for cosmetic reasons. However, benefits are payable for certain procedures when performed for specific medical reasons, such as breast reconstruction following mastectomy. Surgical procedures not listed on the MBS do not attract a Medicare benefit.

Where an initial or subsequent consultation relates to the assessment and discussion of options for treatment and, a cosmetic or other non-rebatable service are discussed, this would be considered a rebatable service under Medicare. Where a consultation relates entirely to a cosmetic or other non-Medicare rebatable service (either before or after that service has taken place), then that consultation is not rebatable under Medicare. Any aftercare associated with a cosmetic or non-Medicare rebatable service is also not rebatable under Medicare.

Public Patients

All care directly related to a public in-patient's care should be provided free of charge. Where a patient has received in-patient treatment in a hospital as a public patient (as defined in Section 3(1) of the Health Insurance Act 1973), routine and non-routine aftercare directly related to that episode of admitted care will be provided free of charge as part of the public hospital service, regardless of where it is provided, on behalf of the state or territory as required by the National Healthcare Agreement. In this case no Medicare benefit is payable.

Notwithstanding this, where a public patient independently chooses to consult a private medical practitioner for aftercare, then the clinically relevant service provided during this professional attendance will attract Medicare benefits.

Where a public patient independently chooses to consult a private medical practitioner for aftercare following treatment from a public hospital emergency department, then the clinically relevant service provided during this professional attendance will attract Medicare benefits.

Fractures

Where the aftercare for fractures is delegated to a doctor at a place other than where the initial reduction was carried out, then Medicare benefits may be apportioned on a 50:50 basis rather than on the 75:25 basis for surgical operations.

Where the reduction of a fracture is carried out by hospital staff in the out-patient or emergency department of a public hospital, and the patient is then referred to a private practitioner for aftercare, Medicare benefits are payable for the aftercare on an attendance basis.

The following table shows the period which has been adopted as reasonable for the after-care of fractures:-

Treatment of fracture of	After-care Period
Terminal phalanx of finger or thumb	6 weeks
Proximal phalanx of finger or thumb	6 weeks
Middle phalanx of finger	6 weeks
One or more metacarpals not involving base of first carpometacarpal joint	6 weeks
First metacarpal involving carpometacarpal joint (Bennett's fracture)	8 weeks
Carpus (excluding navicular)	6 weeks
Navicular or carpal scaphoid	3 months
Colles'/Smith/Barton's fracture of wrist	3 months
Distal end of radius or ulna, involving wrist	8 weeks
Radius	8 weeks
Ulna	8 weeks
Both shafts of forearm or humerus	3 months
Clavicle or sternum	4 weeks
Scapula	6 weeks
Pelvis (excluding symphysis pubis) or sacrum	4 months
Symphysis pubis	4 months
Femur	6 months
Fibula or tarsus (excepting os calcis or os talus)	8 weeks
Tibia or patella	4 months

Both shafts of leg, ankle (Potts fracture) with or without dislocation, os calcis (calcaneus) or os talus	4 months
Metatarsals - one or more	6 weeks
Phalanx of toe (other than great toe)	6 weeks
More than one phalanx of toe (other than great toe)	6 weeks
Distal phalanx of great toe	8 weeks
Proximal phalanx of great toe	8 weeks
Nasal bones, requiring reduction	4 weeks
Nasal bones, requiring reduction and involving osteotomies	4 weeks
Maxilla or mandible, unilateral or bilateral, not requiring splinting	6 weeks
Maxilla or mandible, requiring splinting or wiring of teeth	3 months
Maxilla or mandible, circumosseous fixation of	3 months
Maxilla or mandible, external skeletal fixation of	3 months
Zygoma	6 weeks
Spine (excluding sacrum), transverse process or bone other than vertebral body requiring immobilisation in plaster or traction by skull calipers	3 months
Spine (excluding sacrum), vertebral body, without involvement of cord, requiring immobilisation in plaster or traction by skull calipers	6 months
Spine (excluding sacrum), vertebral body, with involvement of cord	6 months

Note: This list is a guide only and each case should be judged on individual merits.

TN.8.5 Abandoned surgery - (Item 30001)

Item 30001 applies when a procedure has commenced, but is then discontinued for medical reasons, or for other reasons which are beyond the surgeon's control (eg equipment failure).

An operative procedure commences when:

- a) The patient is in the procedure room or on the bed or operation table where the procedure is to be performed; and
- b) The patient is anaesthetised or operative site is sufficiently anaesthetised for the procedure to commence; and
- c) The patient is positioned or the operative site which is prepared with antiseptic or draping.

Where an abandoned procedure eligible for a benefit under item 30001 attracts an assistant under the provisions of the items listed in Group T9 (Assistance at Operations), the fee for the surgical assistant is calculated as 50% of the assistance fee that would have applied under the relevant item from Group T9.

Practitioners claiming an assistant fee for abandoned surgery should itemise their accounts with the relevant item from group T9. Such claims should include an account endorsement "assistance at abandoned surgery" or similar.

Under the Health Insurance Act 1973 the Chief Executive Medicare does not require claims for this item to be accompanied by details of the proposed surgery and the reasons why the operation was discontinued. However, practitioners must maintain a clinical record of this information, which may be subject to audit.

TN.8.6 Repair of Wound - (Items 30023 to 30049)

The repair of wound referred to in these items must be undertaken by suture, tissue adhesive resin (such as methyl methacrylate) or clips. These items do not cover repair of wound at time of surgery.

Item 30023 covers debridement of traumatic, "deep or extensively contaminated" wound. Benefits are not payable under this item for debridement which would be expected to be encountered as part of an operative approach to the treatment of fractures.

For the purpose of items 30026 to 30049 the term 'superficial' means affecting skin and subcutaneous tissue including fat and the term 'deeper tissue' means all tissues deep to but not including subcutaneous tissue such as fascia and muscle.

TN.8.7 Biopsy for Diagnostic Purposes - (Items 30071 to 30096)

Needle aspiration biopsy attracts benefits on an attendance basis and not under item 30078.

Item 30071 (diagnostic biopsy of the skin) or 30072 (diagnostic biopsy of mucous membrane) should be used when a biopsy (including shave) of a lesion is required to confirm a diagnosis and would facilitate the appropriate management of that lesion. If the shave biopsy results in a definitive excision of the lesion, only 30071 or 30072 can be claimed.

Items 30071-30096 require that the specimen be sent for pathological examination.

The aftercare period for item 30071 or 30072 is 2 days rather than the standard aftercare period for skin excision of 10 days.

TN.8.8 Lipectomy - (Items 30165 to 30179)

Lipectomy is not intended as a primary bariatric procedure to correct obesity. MBS benefits are not available for surgery performed for cosmetic purposes.

For the purpose of informing patient eligibility for lipectomy items (30165-30172, 30177, 30179) that are for the management of significant weight loss (SWL), SWL is defined as a weight loss equivalent of at least five BMI units. Weight must be stable for at least six months following significant weight loss prior to lipectomy. For significant weight loss that has occurred following pregnancy, the products of conception must not be included in the calculation of baseline weight to measure weight loss against.

Multiple lipectomies of redundant non-abdominal skin and fat as a direct consequence of mass weight loss (for example on both buttocks and both thighs), attracts a Medicare benefit only once against the relevant item (30171 or 30172). The schedule fee for multiple lipectomies for excision of redundant non-abdominal skin and fat following massive weight loss is the same regardless of the number of excisions.

The lipectomy items cannot be claimed in association with items 45564, 45565 or 45530. Where the abdomen requires surgical closure with reconstruction of the umbilicus following free tissue transfer (45564, 45565) or breast reconstruction (45530), item 45569 is to be claimed.

TN.8.9 Treatment of Keratoses, Warts etc (Items 30187, 30189, 30192 and 36815)

Treatment of seborrheic keratoses by any means, attracts benefits on an attendance basis only.

Treatment of fewer than 10 solar keratoses by ablative techniques such as cryotherapy attracts benefits on an attendance basis only. Where 10 or more solar keratoses are treated by ablative techniques, benefits are payable under item 30192.

Warts and molluscum contagiosum where treated by any means attract benefits on an attendance basis except where:

- (a) admission for treatment in an operating theatre of an accredited day surgery facility or hospital is required. In this circumstance, benefits are paid under item 30189 where a definitive removal of the wart or molluscum contagiosum is to be undertaken.
- (b) benefits have been paid under item 30189, and recurrence occurs.
- (c) palmar and plantar warts are treated by laser and require treatment in an operating theatre of an accredited day surgery facility or hospital. In this circumstance, benefits are paid under item 30187.

TN.8.10 Cryotherapy and Serial Curettage Excision - (Items 30196 and 30202)

In item 30196, serial curettage excision, as opposed to simple curettage, refers to the technique where the margin having been defined, the lesion is carefully excised by a skin curette using a series of dissections and cauterisations so that all extensions and infiltrations of the lesion are removed.

For the purposes of items 30196 and 30202, the requirement for histopathological proof of malignancy is satisfied where multiple lesions are to be removed from the one anatomical region if a single lesion from that region is histologically tested and proven for malignancy.

For the purposes of items 30196 and 30202, an anatomical region is defined as: hand, forearm, upper arm, shoulder, upper trunk or chest (anterior and posterior), lower trunk (anterior or posterior) or abdomen (anterior lower trunk), buttock, genital area/perineum, upper leg, lower leg and foot, neck, face (six sections: left/right lower, left/right mid and left/right upper third) and scalp.

For Medicare benefits to be payable for item 30196, the provider performing the service must also retain documented evidence that malignancy has been proven by histopathology.

For Medicare benefits to be payable for item 30202, the provider performing the service must also retain documented evidence that malignancy has either been proven by histopathology or confirmed by opinion of a specialist in the specialty of dermatology.

The Department of Human Services (DHS) has developed a [Health Practitioner Guideline to substantiate proof of malignancy where required for MBS items](#) which is located on the DHS website.

TN.8.12 Sentinel Node Biopsy for Breast Cancer - (Items 30299 to 30303)

The Medical Services Advisory Committee (MSAC) evaluated the available evidence and found that sentinel lymph node biopsy is safe and effective in identifying sentinel lymph nodes, but that the long term outcomes of sentinel lymph node biopsy compared to lymph node clearance are uncertain. As a result, interim Medicare funding is available for these items pending the outcome of clinical trials and further consideration by the MSAC.

For items 30299 and 30300, both lymphoscintigraphy and lymphotropic dye injection must be used, unless the patient has an allergy to the lymphotropic dye.

For the purposes of these items, the axillary lymph node levels referred to are as follows:

- **Level I** - axillary lymph nodes up to the inferior border of pectoralis minor.
- **Level II** - axillary lymph nodes up to the superior border of pectoralis minor.
- **Level III** - axillary lymph nodes extending above the superior border of pectoralis minor.

TN.8.13 Dissection of Axillary Lymph Nodes - (Items 30335 and 30336)

For the purposes of Items 30335 and 30336, the definitions of lymph node levels referred to are set out below.

Anatomically, the dissection extends from below upwards as follows:

- **Level I** - dissection of axillary lymph nodes up to the inferior border of pectoralis minor.
- **Level II** - dissection of axillary lymph nodes up to the superior border of pectoralis minor.
- **Level III** - dissection of axillary lymph nodes extending above the superior border of pectoralis minor.

TN.8.14 Laparotomy and Other Procedures on the Abdominal Viscera - (Items 30375 and 30622)

Procedures on the abdominal viscera may be performed by laparotomy or laparoscopically. Both items 30375 and 30622 cover several operations on abdominal viscera. Where more than one of the procedures referred to in these items are performed during the one operation, each procedure may be itemised according to the multiple operation formula.

TN.8.15 Diagnostic Laparoscopy - (Items 30390 and 30627)

If a diagnostic laparoscopy procedure is performed at a different time on the same day to another laparoscopic service, the procedures are considered to be un-associated services. The claim for benefits should be annotated to indicate that the two services were performed on separate occasions, otherwise the claims will be considered to be a single service.

TN.8.16 Major Abdominal Incision - (Item 30396)

A major abdominal incision is one that gives access through an open wound to all compartments of the abdominal cavity. Item 30396 is intended for open surgical incisions only and not those performed laparoscopically.

TN.8.17 Gastrointestinal Endoscopic Procedures - (Items 30473 to 30481, 30484, 30485, 30490 to 30494, 30680 to 32023, 32084 to 32095, 32103, 32104 and 32106)

The following are guidelines for appropriate minimum standards for the performance of GI endoscopy in relation to (a) cleaning, disinfection and sterilisation procedures, and (b) anaesthetic and resuscitation equipment.

These guidelines are based on the advice of the Gastroenterological Society of Australia, the Sections of HPB and Upper GI and of Colon and Rectal Surgery of the Royal Australasian College of Surgeons, and the Colorectal Surgical Society of Australia.

Cleaning, disinfection and sterilisation procedures

Endoscopic procedures should be performed in facilities where endoscope and accessory reprocessing protocols follow procedures outlined in:

- i. Infection Control in Endoscopy, Gastroenterological Society of Australia and Gastroenterological Nurses College of Australia, 2011;
- ii. Australian Guidelines for the Prevention and Control of Infection in Healthcare (NHMRC, 2010);
- iii. Australian Standard AS 4187-2014 (and Amendments), Standards Association of Australia.

Anaesthetic and resuscitation equipment

Where the patient is anaesthetised, anaesthetic equipment, administration and monitoring, and post-operative and resuscitation facilities should conform to the standards outlined in 'Guidelines on Sedation and/or Analgesia for Diagnostic and Interventional Medical, Dental or Surgical Procedures' (PS09), Australian & New Zealand College of Anaesthetists, Gastroenterological Society of Australia and Royal Australasian College of Surgeons.

Conjoint Committee

For the purposes of Item 32023, the procedure is to be performed by a colorectal surgeon or gastroenterologist with endoscopic training who is recognised by the Conjoint Committee for the Recognition of Training in Gastrointestinal Endoscopy.

TN.8.18 Gastrectomy, Sub-total Radical - (Item 30523)

The item differs from total radical Gastrectomy (Item 30524) in that a small part of the stomach is left behind. It involves resection of the greater omentum and posterior abdominal wall lymph nodes with or without splenectomy.

TN.8.19 Anti reflux Operations - (Items 30527 to 30533, 31464 and 31466)

These items cover various operations for reflux oesophagitis. Where the only procedure performed is the simple closure of a diaphragmatic hiatus benefit would be attracted under Item 30387 (Laparotomy involving operation on abdominal viscera, including pelvic viscera, not being a service to which another item in this Group applies).

TN.8.20 Radiofrequency ablation of mucosal metaplasia for the treatment of Barrett's Oesophagus (Item 30687)

The diagnosis of high grade dysplasia is recommended to be confirmed by two expert pathologists with experience in upper gastrointestinal pathology.

A multidisciplinary team should review treatment options for patients with high grade dysplasia and would typically include upper gastrointestinal surgeons and/or interventional gastroenterologists.

TN.8.21 Endoscopic or Endobronchial Ultrasound +/- Fine Needle Aspiration - (Items 30688 - 30710)

For the purposes of these items the following definitions apply:

Biopsy means the removal of solid tissue by core sampling or forceps

FNA means aspiration of cellular material from solid tissue via a small gauge needle.

The provider should make a record of the findings of the ultrasound imaging in the patient's notes for any service claimed against items 30688 to 30710.

Endoscopic ultrasound is an appropriate investigation for patients in whom there is a strong clinical suspicion of pancreatic neoplasia with negative imaging (such as CT scanning). Scenarios include, but are not restricted to:

- A middle aged or elderly patient with a first attack of otherwise unexplained (eg negative abdominal CT) first episode of acute pancreatitis; or
- A patient with biochemical evidence of a neuroendocrine tumour.

The procedure is not claimable for periodic surveillance of patients at increased risk of pancreatic cancer, such as chronic pancreatitis. However, EUS would be appropriate for a patient with chronic pancreatitis in whom there was a clinical suspicion of pancreatic cancer (eg: a pancreatic mass occurring on a background of chronic pancreatitis).

TN.8.22 Removal of Skin Lesions - (Items 31356 to 31376)

The excision of warts and seborrheic keratoses attracts benefits on an attendance basis with the exceptions outlined in TN.8.9 of the explanatory notes to this category. Excision of pre-malignant lesions including solar keratoses where clinically indicated are covered by items 31357, 31360, 31362, 31364, 31366, 31368 and 31370.

The excision of suspicious pigmented lesions for diagnostic purposes attract benefits under items 31357, 31360, 31362, 31364, 31366, 31368 and 31370.

Malignant tumours are covered by items 31356, 31358, 31359, 31361, 31363, 31365, 31367, 31369 and 31371 to 31376.

Items 31357, 31360, 31362, 31364, 31366, 31368, 31370 *require* that the specimen be sent for histological examination. Items 31356, 31358, 31359, 31361, 31363, 31365, 31367, 31369, 31371-31376 also *require* that a specimen has been sent for histological confirmation of malignancy, and any subsequent specimens are sent for

histological examination. Confirmation of malignancy *must* be received before itemisation of accounts for Medicare benefits purposes.

Where histological results are available at the time of issuing accounts, the histological diagnosis will decide the appropriate itemisation. If the histological report shows the lesion to be benign, items 31357, 31360, 31362, 31364, 31366, 31368 or 31370 should be used.

It will be necessary for practitioners to retain copies of histological reports.

TN.8.23 Removal of Skin Lesion From Face - (Items 31245, 31361 to 31364, 31372 and 31373)

For the purposes of these items, the face is defined as that portion of the head anterior to the hairline and above the jawline.

TN.8.24 Dissection of Lymph Nodes of Neck - (Items 30618, 31423 to 31438)

For the purposes of these items, the lymph node levels referred to are as follows:

Level I	Submandibular and submental lymph nodes
Level II	Lymph nodes of the upper aspect of the neck including the jugulodigastric node, upper jugular chain nodes and upper spinal accessory nodes
Level III	Lymph nodes deep to the middle third of the sternomastoid muscle consisting of mid jugular chain nodes, the lower most of which is the jugulo-omohyoid node, lying at the level where the omohyoid muscle crosses the internal jugular vein
Level IV	Lower jugular chain nodes, including those nodes overlying the scalenus anterior muscle
Level V	Posterior triangle nodes, which are usually distributed along the spinal accessory nerve in the posterior triangle

Comprehensive dissection involves all 5 neck levels while *selective* dissection involves the removal of only certain lymph node groups, for example:-

Item 31426 (removal of 3 lymph node levels) - e.g. supraomohyoid neck dissection (levels I-III) or lateral neck dissection (levels II-IV).

Item 31429 (removal of 4 lymph node levels) - e.g. posterolateral neck dissection (levels II-V) or anterolateral neck dissection (levels I-IV)

Other combinations of node levels may be removed according to clinical circumstances.

TN.8.25 Excision of Breast Lesions, Abnormalities or Tumours - Malignant or Benign - (Items 31500 to 31515)

Therapeutic biopsy or excision of breast lesions, abnormalities or tumours under Items: 31500, 31503, 31506, 31509, 31512, 31515 either singularly or in combination should not be claimed when using the Advanced Breast Biopsy Instrumentation (ABBI) procedure, or any other large core breast biopsy device.

TN.8.26 Fine Needle Aspiration of Breast Lesion - (Item 31533)

An impalpable lesion includes those lesions that clinically require definition by ultrasound or mammography for accurate or safe sampling, eg. lesions in association with breast prostheses or in areas of breast thickening.

TN.8.27 Diagnostic Biopsy of Breast using Advanced Breast Biopsy Instrumentation - (Items 31539 and 31545)

For the purposes of Items 31539 and 31545, surgeons performing this procedure should have evidence of appropriate training via a course approved by the Breast Section of the Royal Australasian College of Surgeons,

have experience in the procedure, and the Department of Human Services notified of their eligibility to perform this procedure.

The ABBI procedure is contraindicated and should not be performed on the following subset of patients:

- Patients with mass, asymmetry or clustered microcalcifications that cannot be targeted using digital imaging equipment;
- Patients unable to lie prone and still for 30 to 60 minutes;
- Breasts less than 20mm in thickness when compressed;
- Women on anticoagulants;
- Lesions that are too close to the chest wall to allow cannula access;
- Patients weighing more than 135kg;
- Women with prosthetic breast implants.

TN.8.28 Preoperative Localisation of Breast Lesion Prior to the Use of Advanced Breast Biopsy Instrumentation - (Item 31542)

For the purposes of item 31542, radiologists eligible to perform the procedure must have been identified by the Royal Australian and New Zealand College of Radiologists as having sufficient training and experience in this procedure, and the Department of Human Services notified of their eligibility to perform this procedure.

TN.8.29 Bariatric Procedures - (Items 31569 to 31581, anaesthesia item 20791)

Items 31569 to 31581 and item 20791 provide for surgical treatment of clinically severe obesity and the accompanying anaesthesia service (or similar). The term clinically severe obesity generally refers to a patient with a Body Mass Index (BMI) of 40kg/m^2 or more, or a patient with a BMI of 35kg/m^2 or more with other major medical co-morbidities (such as diabetes, cardiovascular disease, cancer). The BMI values in different population groups may vary due, in part, to different body proportions which affect the percentage of body fat and body fat distribution. Consequently, different ethnic groups may experience major health risks at a BMI that is below the 35-40 kg/m^2 provided for in the definition. The decision to undertake obesity surgery remains a matter for the clinical judgment of the surgeon.

If crural repair taking 45 minutes or less is performed in association with the bariatric procedure, additional hernia repair items cannot be claimed for the same service.

TN.8.30 Reversal of a Bariatric Procedure (item 31584)

If a revisional procedure requires the reversal of the existing bariatric procedure, item 31584 can be claimed with items 31569 to 31581 for the new procedure for the same patient on the same occasion. For example, item 31584 could be claimed for the reversal of a gastric band, and 31572 for conversion to gastric bypass or 31575 for conversion to sleeve gastrectomy.

TN.8.31 Per Anal Excision of Rectal Tumour using Rectoscopy - (Items 32103, 32104 and 32106)

Surgeons performing these procedures should be colorectal surgeons and have undergone appropriate training which is recognised by the Colorectal Surgical Society of Australasia.

Items 32103, 32104 and 32106 cannot be claimed in conjunction with each other or with anterior resection items 32024 or 32025 for the same patient, on the same day, by any practitioner.

TN.8.32 Varicose veins - (Items 32500 to 32517)

In relation to endovenous laser therapy (ELT) and/or radiofrequency diathermy/ablation, Rule 2.44.14 of the *Health Insurance (General Medical Services Table) Regulations* (GMST) means the following:

- ELT and/or radiofrequency diathermy/ablation are not payable if they are billed under any varicose vein items (32500 to 32517) or vascular item 35321.
- If ELT and/or radiofrequency diathermy/ablation are provided on the same occasion as these MBS items, the ELT and radiofrequency diathermy/ablation services must be itemised separately on the invoice, showing the full fees for each service separately to the fees billed against the MBS items.
- We strongly recommend that a practitioner who intends to bill ELT and/or radiofrequency diathermy/ablation on the same occasion as providing MBS services contact Department of Human Services' provider information line on 132 150 to confirm the Department of Human Services' requirements for correct itemisation of MBS and non-MBS services on a single invoice.
- The Department of Human Services monitors billing practices associated with MBS items and any billing which stands out as being out of line with most practitioners may warrant the attention of the Department of Human Services.
- In light of the policy clarification of GMST Rule 2.44.14, with effect from 1 May 2009, the Department of Human Services will be able to track any apparent cost-shifting (of ELT and/or radiofrequency diathermy/ablation) to the MBS items detailed in GMST Rule 2.44.14 or to other MBS items.

TN.8.33 Cyanoacrylate Embolisation (Items 32528 and 32529), Endovenous Laser Therapy (Items 32520 and 32522) and Radiofrequency Ablation (Items 32523 and 32526)

It is recommended that the medical practitioner performing cyanoacrylate embolisation (CAE), endovenous laser therapy (ELT) or radiofrequency ablation (RFA) has successfully completed a substantial course of study and training in the management of venous disease, which has been endorsed by their relevant professional organisation.

Medicare-funded CAE, ELT and RFA can only be performed in cases where it is documented by duplex ultrasound that the great or small saphenous vein (and major tributaries of saphenous veins as necessary) demonstrates reflux of 0.5 seconds or longer.

TN.8.34 Uterine Artery Embolisation - (Item 35410)

This item was introduced on an interim basis in November 2006 following a recommendation of the Medical Services Advisory Committee (MSAC), pending the outcome of clinical trials and further consideration by the MSAC. The requirement for specialist referral by a gynaecologist for uterine artery embolisation was a MSAC recommendation. Providers should retain the instrument of specialist referral for each patient from the date of the procedure, as this may be subject to audit by the Department of Human Services.

TN.8.35 Endovascular Coiling of Intracranial Aneurysms - (Item 35412)

This service includes balloon angioplasty and insertion of stents (assisted coiling) associated with intracranial aneurysm coiling. The use of liquid embolics alone is not covered by this item. Digital Subtraction Angiography (DSA) done to diagnose the aneurysm (items 60009 and either 60072, 60075 or 60078) is claimable, however this must be clearly noted on the claim and in the clinical notes as separate from the intra-operative DSA done with the coiling procedure.

TN.8.36 Arterial and Venous Patches - (Items 33545 to 33551 and 34815)

Vascular surgery items have been constructed on the basis that arteriotomy and venotomy wounds are closed by simple suture without the use of a patch.

Where a patch angioplasty is used to enlarge a narrowed vein, artery or arteriovenous fistula, the correct item would be 34815 or 34518. If the vein is harvested for the patch through a separate incision, Item 33551 would also apply, in accordance with the multiple operation rule.

If a patch graft is involved in conjunction with an operative procedure included in Items 33500 - 33542, 33803, 33806, 33815, 33833 or 34142, the patch graft would attract benefits under Item 33545 or 33548 in addition to the item for the primary operation (under the multiple operation rule). Where vein is harvested for the patch through a separate incision Item 33551 would also apply.

TN.8.37 Carotid Disease - (Item 32700, 32703, 32760, 33500, 33545, 33548, 33551, 33554, 35303, 35307)

Interventional procedures for the management of carotid disease should be performed in accordance with the NHMRC endorsed *Clinical Guidelines for Stroke Management 2010*.

Carotid Percutaneous Transluminal Angioplasty with Stenting (CPTAS), under item 35307 is only funded under the MBS for patients who meet the criteria for carotid endarterectomy but are unfit for open surgery.

TN.8.38 Peripheral Arterial or Venous Catheterisation - (Item 35317)

Item 35317 is restricted to the regional delivery of thrombolytic, vasoactive or chemotherapeutic oncologic agents in association with a radiological service. This item is not intended for infusions with systemic affect.

TN.8.39 Peripheral Arterial or Venous Embolisation - (Item 35321)

As set out in Rule 2.44.14 in the *Health Insurance (General Medical Services Table) Regulations*, item 35321 does not apply to the service described in that item if the service is provided at the same time as, or in connection with, endovenous laser treatment for varicose veins.

TN.8.40 Selective Internal Radiation Therapy (SIRT) using SIR-Spheres - (Items 35404, 35406 and 35408)

These items were introduced into the Schedule on an interim basis in May 2006 following a recommendation of the Medical Services Advisory Committee (MSAC) pending the outcome of clinical trials and further consideration by the MSAC. SIRT should not be performed in an outpatient or day patient setting to ensure patient and radiation safety requirements are met.

TN.8.41 Percutaneous Transluminal Coronary Angioplasty - (Items 38309, 38312, 38315 and 38318)

A coronary artery lesion is considered to be complex when the lesion is a chronic total occlusion, located at an ostial site, angulated, tortuous or greater than 1cm in length. Percutaneous transluminal coronary rotational atherectomy is suitable for revascularisation of complex and heavily calcified coronary artery stenoses in patients for whom coronary artery bypass graft surgery is contraindicated.

Each of the items 38309, 38312, 38315 and 38318 describes an episode of service. As such, only one item in this range can be claimed in a single episode.

TN.8.42 Colposcopic Examination - (Item 35614)

It should be noted that colposcopic examination (screening) of a person during the course of a consultation does not attract Medicare benefits under Item 35614 except in the following circumstances:

- (a) where the patient has had an abnormal cervical screen result;
- (b) where there is a history of ingestion of oestrogen by the patient's mother during their pregnancy; or
- (c) where the patient has been referred by another medical practitioner because of suspicious signs of genital cancer.

TN.8.43 Hysteroscopy - (Item 35626)

Hysteroscopy undertaken in the office/consulting rooms can be claimed under this item where the conditions set out in the description of the item are met.

TN.8.44 Curettage of Uterus under GA or Major Nerve Block - (Items 35639 and 35640)

Uterine scraping or biopsy using small curettes (e.g. Sharman's or Zeppelin's) and requiring minimal dilatation of the cervix, not necessitating a general anaesthesia, does not attract benefits under these items but would be paid under Item 35620 where malignancy is suspected, or otherwise on an attendance basis.

TN.8.45 Neoplastic Changes of the Cervix - (Items 35644-35648)

The term "previously confirmed intraepithelial neoplastic changes of the cervix" in these items refers to diagnosis made by either cytologic, colposcopic or histologic methods. This may also include persistent human papilloma virus (HPV) changes of the cervix.

TN.8.46 Sterilisation of Minors - Legal Requirements - (Items 35657, 35687, 35688, 35691, 37622 and 37623)

- (i) It is unlawful throughout Australia to conduct a sterilisation procedure on a minor which is not a by-product of surgery appropriately carried out to treat malfunction or disease (eg malignancies of the reproductive tract) unless legal authorisation has been obtained.
- (ii) Practitioners are liable to be subject to criminal and civil action if such a sterilisation procedure is performed on a minor (a person under 18 years of age) which is not authorised by the Family Court of Australia or another court or tribunal with jurisdiction to give such authorisation.
- (iii) Parents/guardians have no legal authority to consent on behalf of minors to such sterilisation procedures. Medicare Benefits are only payable for sterilisation procedures that are clinically relevant professional services as defined in Section 3 (1) of the *Health Insurance Act 1973*.

TN.8.47 Debulking of Uterus - (Item 35658)

Benefits are payable under Item 35658, using the multiple operation rule, in addition to vaginal hysterectomy.

TN.8.48 Nephrectomy - (Items 36526 and 36527)

Items 36526 and 36527 are only claimable where the practitioner has a high index of suspicion of malignancy which cannot be confirmed by biopsy prior to surgery being performed, due to the biopsy being either clinically inappropriate, or the specimen provided showing an inconclusive diagnosis.

TN.8.50 Sacral Nerve Stimulation (items 36663-36668)

A two-stage process of testing and treatment is required to ensure suitability for Sacral Nerve Stimulation for detrusor overactivity or non obstructive urinary retention where urethral obstruction has been urodynamically excluded. The testing phase involves acute and sub-chronic testing. The first stage includes peripheral nerve evaluation and patients who achieve greater than 50% improvement in urinary incontinence or retention episodes during testing will be eligible to receive permanent SNS treatment.

TN.8.51 Ureteroscopy - (Item 36803)

Item 36803 refers to ureteroscopy of one ureter when performed for the purpose of inspection alone. It may not be used when one of the other ureteroscopy numbers (Items 36806 or 36809) or pyeloscopy numbers (Items 36652, 36654 or 36656) is used for a ureteroscopic procedure performed in the same ureter or collecting system. It may be used when inspection alone is carried out in one ureter independently from a ureteroscopic or pyeloscopic procedure in another ureter or collecting system. If Item number 36803 is used with one of the other above 5 numbers, it must be specified that item number 36803 refers to ureteroscopy performed in another ureter eg 36654 (Right side) and 36803 (Left side). 36803 may also be used in this way if there is a partial or complete duplex collecting system eg 36809 (Lower pole moiety ureter, Left side) and 36803 (Upper pole moiety ureter, Left side).

Item numbers 36806 and 36809 may only be used together when 2 independent ureteroscopic procedures are performed in separate ureters. These separate ureters may be components of a complete or partial duplex system. If

both these numbers are used together, the Regulations require qualification of these item numbers by the site, as is necessary with 36803 eg 36806 (Right side) and 36809 (Left side).

TN.8.52 Selective Coronary Angiography - (Items 38215 to 38246)

Each item in the range 38215-38240 describes an episode of service. As such, only one item in this range can be claimed in a single episode.

Item 38243 may be billed once only immediately prior to any coronary interventional procedure, including situations where a second operator performs any coronary interventional procedure after diagnostic angiography by the first operator.

Item 38246 may be billed when the same operator performs diagnostic coronary angiography and then proceeds directly with any coronary interventional procedure during the same occasion of service. Consequently, it may not be billed in conjunction with items 38215, 38218, 38220, 38222, 38225, 38228, 38231, 38234, 38237, 38240 or 38243. In the event that the same operator performed any coronary interventional procedure immediately after the diagnostic procedure described by item 38231, 38237 or 38240, that item may be billed as an alternative to item 38246.

Items in the range 38215 - 38246 cannot be claimed for any intravascular ultrasound (IVUS) procedure therefore Medicare Benefits are not payable for IVUS.

TN.8.53 Transurethral Needle Ablation (TUNA) of the Prostate - (Items 37201 and 37202)

Moderate to severe lower urinary tract symptoms are defined using the American Urological Association (AUA) Symptom Score or the International Prostate Symptom Score (IPSS).

Patients not medically fit for transurethral resection of the prostate (TURP) can be defined as:

- (i) Those patients who have a high risk of developing a serious complication from the surgery. Retrograde ejaculation is **not** considered to be a serious complication of TURP.
- (ii) Those patients with a co-morbidity which may substantially increase the risk of TURP or the risk of the anaesthetic necessary for TURP.

TN.8.54 Gold Fiducial Markers into the Prostate - (item 37217)

Item 37217 is for the insertion of gold fiducial markers into the prostate or prostate surgical bed as markers for radiotherapy. The service can not be claimed under item 37218 or any other surgical item.

This item is introduced into the Schedule on an interim basis pending the outcome of an evaluation being undertaken by the Medical Services Advisory Committee (MSAC).

Further information on the review of this service is available from the MSAC Secretariat.

TN.8.55 Brachytherapy of the Prostate - (Item 37220)

One of the requirements of item 37220 is that patients have a Gleason score of less than or equal to 7. However, where the patient has a score of 7, comprising a primary score of 4 and a secondary score of 3 (ie. 4+3=7), it is recommended that low dose rate brachytherapy form part of a combined modality treatment.

Low dose rate brachytherapy of the prostate should be performed in patients, with favourable anatomy allowing adequate access to the prostate without pubic arch interference, and who have a life expectancy of greater than 10 years.

An 'approved site' for the purposes of this item is one at which radiation oncology services may be performed lawfully under the law of the State or Territory in which the site is located.

TN.8.56 High Dose Rate Brachytherapy - (Item 37227)

Item 37227 covers the service undertaken by an urologist or radiation oncologist as part of the High Dose Rate Brachytherapy procedure, in association with a radiation oncologist. If the service is undertaken by an urologist, a radiation oncologist must be present in person at the time of the service. The removal of the catheters following completion of the Brachytherapy is also covered under this item.

TN.8.57 Radical or Debulking Operation for Ovarian Tumour - (Item 35720)

This item refers to the operation for carcinoma of the ovary where the bulk of the tumour and the omentum are removed. Where this procedure is undertaken in association with hysterectomy benefits are payable under both item numbers with the application of the multiple operation formula.

TN.8.58 Transcutaneous Sperm Retrieval - (Item 37605)

Item 37605 covers transcutaneous sperm retrieval for the purposes of intracytoplasmic sperm injection (item 13251) for male factor infertility, in association with assisted reproductive technologies.

Item 37605 provides for the procedure to be performed unilaterally. Where it is clinically necessary to perform the service bilaterally, the multiple operation rule would apply, in accordance with point T8.5 of these Explanatory Notes.

Where the procedure is carried out under local infiltration as the means of anaesthesia, additional benefit is not payable for the anaesthesia component as this is considered to be part of the procedure.

TN.8.59 Surgical Sperm Retrieval, by Open Approach - (Item 37606)

Item 37606 covers open sperm retrieval for the purposes of intracytoplasmic sperm injection (item 13251) for male factor infertility, in association with assisted reproductive technologies. Item 37606 provides for the procedure to be performed unilaterally. Where it is clinically necessary to perform the service bilaterally, the multiple operation rule would apply.

Benefits for item 37606 may be claimed in conjunction with a service or services provided under item 37605, where an open approach is clinically necessary following an unsuccessful percutaneous approach. Likewise, such services would be subject to the multiple operation rule.

Benefit is not payable for item 37606 in conjunction with item 37604.

TN.8.60 Cardiac Pacemaker Insertion - (Items 38209, 38212, 38350, 38353 and 38356)

The fees for the insertion of a pacemaker (Items 38350, 38353 and 38356) cover the testing of cardiac conduction or conduction threshold, etc related to the pacemaker and pacemaker function.

Accordingly, additional benefits are not payable for such routine testing under Item 38209 or 38212 (Cardiac electrophysiological studies).

TN.8.61 Implantable ECG Loop Recorder - (Item 38285)

The fee for implantation of the loop recorder (item 38285) covers the initial programming and testing of the device for satisfactory rhythm capture. Benefits are payable only once per day.

The term "recurrent" refers to more than one episode of syncope, where events occur at intervals of 1 week or longer. The term "other available cardiac investigations" includes the following:

- a complete history and physical examination that excludes a primary neurological cause of syncope and does not exclude a cardiac cause;
- *electrocardiography (ECG) (items 1170-11702);*

- *echocardiography (items 55113-55115);*
- *continuous ECG recording or ambulatory ECG monitoring (items 11708-11711);*
- *up-right tilt table test (item 11724); and*
- cardiac electrophysiological study, unless there is reasonable medical reason to waive this requirement (item 38209).

TN.8.62 Transluminal Insertion of Stent or Stents - (Item 38306)

Item 38306 should only be billed once per occlusion site. It is not appropriate to bill item 38306 multiple times for the insertion of more than one stent at the same occlusion site in the same artery. However, it would be appropriate to claim this item multiple times for insertion of stents into the same artery at different occlusion sites or into another artery or occlusion site. It is expected that the practitioner will note the details of the artery or site into which the stents were placed, in order for the Department of Human Services to process the claims.

TN.8.63 Permanent Cardiac Synchronisation Device (Items 38365, 38368 and 38654)

Items 38365, 38368 and 38654 apply only to patients who meet the criteria listed in the item descriptor, and to patients who do not meet the criteria listed in the descriptor but have previously had a CRT device and transvenous left ventricular electrode inserted and who prior to its insertion met the criteria and now need the device replaced.

TN.8.64 Intravascular Extraction of Permanent Pacing Leads - (Item 38358)

For the purposes of Item 38358 specialists or consultant physicians claiming this item must have training recognised by the Lead Extraction Advisory Committee of the Cardiac Society of Australia and New Zealand, and the Department of Human Services notified of that recognition. The procedure should only be undertaken in a hospital capable of providing cardiac surgery.

TN.8.65 Cardiac Resynchronisation Therapy - (Item 38371)

Item 38371 applies only to patients who meet the criteria listed in the item descriptor, and to patients who do not meet the criteria listed in the descriptor but have previously had an CRT device capable of defibrillation inserted and who prior to its insertion met the criteria and now need the device replaced.

TN.8.66 Implantable Cardioverter Defibrillator - (Items 38384 and 38387)

Items 38384 and 38387 apply only to patients who meet the criteria listed in the item descriptor, and to patients who do not meet the criteria listed in the descriptor but have previously had an ICD device inserted and who prior to its insertion met the criteria and now need the device replaced.

TN.8.67 Cardiac and Thoracic Surgical Items - (Items 38470 to 38766)

Items 38470 to 38766 must be performed using open exposure or minimally invasive surgery which excludes percutaneous and transcatheter techniques unless otherwise stated in the item.

TN.8.68 Coronary Artery Bypass - (Items 38497 to 38504)

The fees for Items 38497 and 38498 include the harvesting of vein graft material. Harvesting of internal mammary artery and/or vein graft material is covered in the fees for Items 38500, 38501, 38503 and 38504. Where harvesting of an artery other than the internal mammary artery is undertaken, benefits are payable under Item 38496 on the multiple operation basis. The procedure of coronary artery bypass grafting using arterial graft is covered by Item 38500, 38501, 38503 or 38504 irrespective of the origin of the arterial graft.

Items 38498, 38501 and 38504 require that either a clinical or medical perfusionist are present in the operating theatre throughout the procedure in case it is necessary to convert to an on-pump procedure and cardiopulmonary bypass is required.

If it is necessary to provide cardiopulmonary bypass items 38498, 38501 and 38504 cannot be claimed. The procedure should be claimed under items 38497, 38500 or 38503 as appropriate in conjunction with the relevant cardiopulmonary bypass procedures.

TN.8.69 Re-operation via Median Sternotomy - (Item 38640)

Medicare benefits are payable for Item 38640 plus the item/s covering the major surgical procedure/s performed at the time of the re-operation, using the multiple operation formula. Benefits are not payable for Item 38640 in association with Item 38656, 38643 or 38647.

TN.8.70 Skull Base Surgery - (Items 39640 to 39662)

The surgical management of lesions involving the skull base (base of anterior, middle and posterior fossae) often requires the skills of several surgeons or a number of surgeons from different surgical specialties working together or in tandem during the operative session. These operations are usually not staged because of the need for definitive closure of the dura, subcutaneous tissues, and skin to avoid serious infections such as osteomyelitis and/or meningitis.

Items 39640 to 39662 cover the removal of the tumour, which would normally be performed by a neurosurgeon. Other items are available to cover procedures performed as a part of skull base surgery by practitioners in other specialities, such as ENT and plastic and reconstructive surgery.

TN.8.71 Intradiscal Injection of Chymopapain - (Item 40336)

The fee for this item includes routine post-operative care. Associated radiological services attract benefits under the appropriate item in Group I3.

TN.8.72 Removal of Ventilating Tube from Ear - (Item 41500)

Benefits are not payable under Item 41500 for removal of ventilating tube. This service attracts benefits on an attendance basis.

TN.8.73 Meatoplasty - (Item 41515)

When this procedure is associated with Item 41530, 41548, 41557, 41560 or 41563 the multiple operation rule applies.

TN.8.74 Reconstruction of Auditory Canal - (Item 41524)

When associated with Item 41557, 41560 or 41563 the multiple operation rule applies.

TN.8.75 Removal of Nasal Polyp or Polypi - (Items 41662 and 41668)

Where such polyps are removed in association with another intranasal procedure, Medicare benefit is paid under Item 41662. However where the associated procedure is of lesser value than Item 41668, benefit for removal of polypi would be paid under Item 41668.

Services performed under item 41668 require admission to hospital.

TN.8.76 Larynx, Direct Examination - (Item 41846)

Benefit is not attracted under this item when an anaesthetist examines the larynx during the course of administration of a general anaesthetic.

TN.8.77 Microlaryngoscopy - (Item 41858)

This item covers the removal of "juvenile papillomata" by mechanical means, e.g. cup forceps. Item 41861 refers to the removal by laser surgery.

TN.8.78 Imbedded Foreign Body - (Item 42644)

For the purpose of item 42644, an imbedded foreign body is one that is sub-epithelial or intra-epithelial and is completely removed using a hypodermic needle, foreign body gouge or similar surgical instrument with magnification provided by a slit lamp biomicroscope, loupe or similar device.

Item 42644 also provides for the removal of rust rings from the cornea, which requires the use of a dental burr, foreign body gouge or similar instrument with magnification by a slit lamp biomicroscope.

Where the imbedded foreign body is not completely removed, benefits are payable under the relevant attendance item.

TN.8.79 Corneal Incisions - (Item 42672)

The description of this item refers to two sets of calculations, one performed some time prior to the operation, the other during the course of the operation. Both of these measurements are included in the Schedule fee and benefit for Item 42672.

TN.8.80 Cataract surgery (Items 42698 and 42701)

Items 42698 and 42701 provide for intraocular lens extraction and replacement as a separate procedure to be used in instances when lens removal and replacements are contraindicated at the same operation, such as in patients presenting with proliferative diabetic retinopathy or recurrent uveitis.

TN.8.81 Posterior Juxtapapillary Depot injection - (Item 42741)

For the purpose of item 42741, the therapeutic substance must be registered with the Therapeutic Goods Administration (or listed on the Pharmaceutical Benefits Schedule, if so listed) as being suitable for injection for the treatment of predominantly (greater than or equal to 50%) classic, subfoveal choroidal neovascularisation due to age-related macular degeneration, as diagnosed by fluorescein angiography, in a patient with a baseline visual acuity equal to or better than 6/60.

TN.8.82 Cyclodestructive Procedures - (Items 42770)

Item 42770 is restricted to a maximum of 2 treatments in a 2 year period.

TN.8.83 Insertion of drainage device for glaucoma (Item 42752)

Item 42752 provides for the insertion of a drainage device for the treatment of glaucoma patients who are at high risk of failure of trabeculectomy (such as patients who have aggressive neovascular glaucoma or extensive conjunctival scarring); have iridocorneal endothelial syndrome; inflammatory (uveitic) glaucoma; or aphakic glaucoma.

TN.8.84 Laser Trabeculoplasty - (Item 42782)

Item 42782 is restricted to a maximum of 4 treatments in a 2 year period.

TN.8.85 Laser Iridotomy - (Item 42785)

Item 42785 is restricted to a maximum of 3 treatments in a 2 year period.

TN.8.86 Laser Capsulotomy - (Items 42788)

Item 42788 is restricted to a maximum of 2 treatments in a 2 year period.

TN.8.87 Laser Vitreolysis or Corticolysis of Lens Material or Fibrinolysis - (Item 42791)

Item 42791 is restricted to a maximum of 3 treatments in a 2 year period.

TN.8.88 Division of Suture by Laser - (Item 42794)

Benefits under this item are restricted to a maximum of 2 treatments in a 2 year period. There is no provision for additional treatments in that period.

TN.8.89 Ophthalmic Sutures - (Item 42845)

This item refers to the occasion when readjustment has to be made to the sutures to vary the angle of deviation of the eye. It does not cover the mere tightening of the loosely tied sutures without repositioning, or adjustment performed prior to the patient leaving the operating theatre.

TN.8.91 Abrasive Therapy/Resurfacing - (Items 45021 to 45026)

For the purposes of the above items, one aesthetic area is any of the following of the whole face (considered to be divided into six segments):- forehead; right cheek; left cheek; nose; upper lip; and chin.

Items 45021 and 45024 cover abrasive therapy only. For the purposes of these items, abrasive therapy requires the removal of the epidermis and into the deeper papillary dermis. Services performed using a laser are not eligible for benefits under these items.

Items 45025 and 45026 do not cover the use of fractional (Fraxel[®]) laser therapy.

TN.8.92 Escharotomy - (Item 45054)

Benefits are payable once only under Item 45054 for each limb (or chest) regardless of the number of incisions to each of these areas.

TN.8.93 Local Skin Flap - Definition

Medicare benefits for flaps are only payable when clinically appropriate. Clinically appropriate in this instance means that the flap or graft is required to close the defect because the defect cannot be closed directly, or because the flap is required to adapt scar position optimally with regard to skin creases or landmarks, maintain contour on the face or neck, or prevent distortion of adjacent structures or apertures.

A local skin flap is an area of skin and subcutaneous tissue designed to be elevated from the skin adjoining a defect requiring closure. The flap remains partially attached by its pedicle and is moved into the defect by rotation, advancement or transposition, or a combination of these manoeuvres. A benefit is only payable when the flap is required for adequate wound closure. A secondary defect will be created which may be closed by direct suture, skin grafting or sometimes a further local skin flap. This later procedure will also attract benefit if closed by graft or flap repair but not when closed by direct suture.

By definition, direct wound closure (e.g. by suture) does not constitute skin flap repair. Similarly, angled, curved or trapdoor incisions which are used for exposure and which are sutured back in the same position relative to the adjacent tissues are not skin flap repairs. Undermining of the edges of a wound prior to suturing is considered a normal part of wound closure and is not considered a skin flap repair.

A "Z" plasty is a particular type of transposition flap repair. Although 2 flaps are created, benefit will be paid on the basis of Item 45201, claimable once per defect. Additional flaps are to be claimed under Item 45202, if clinically indicated.

Note: refer to T8.128 for MBS item 45202 for circumstances where other services might involve flap repair.

TN.8.94 Free Grafting to Burns - (Items 45406 to 45418)

Items 45406 to 45418 cover split skin grafting using autografts, homografts or xenografts.

TN.8.95 Revision of Scar - (Items 45506 to 45518)

For the purposes of items 45506 to 45518, revision of scar refers to modification of existing scars (traumatic, surgical or pathological) that is designed to decrease scar width, adapt scar position with regard to skin creases and landmarks, release scars from adhering to underlying structures, improve scar contour in keeping with undamaged skin or restore the shape of facial aperture.

Items 45506 to 45518 are only claimable when performed by a specialist in the practice of his or her specialty or where undertaken in the operating theatre of a hospital.

Only items 45506 and 45512, for the face and neck, can be claimed in association with items providing for graft or flap services.

For excision of scar services which do not meet the requirements of the revision of scar items as defined, the appropriate item in the range 31206 to 31225 should be claimed.

TN.8.96 Augmentation Mammoplasty - (Items 45524, 45527 and 45528)

A Medicare benefit is generally not attracted under item 45524 unless the asymmetry in breast size is greater than 10%. Augmentation of a second breast sometime after an initial augmentation of one side would not attract benefits. Benefits are not payable for augmentation mammoplasty services performed using fat transfer to the breast.

Item 45528 applies where bilateral mammoplasty is indicated because of malformation of breast tissue, disease or trauma of the breast, (but not as a result of previous cosmetic surgery) other than covered under item 45524 or 45527.

Volumetric measurement of the breasts should be performed using a technique which has been reported in a published study.

TN.8.97 Breast Reconstruction, Myocutaneous Flap - (Item 45530)

When a prosthesis is inserted in conjunction with this operation, benefit would be attracted under Item 45527, the multiple operation rule applying. Benefits would also be payable for nipple reconstruction (Item 45545) when performed.

When claiming item 45530 for a rectus abdominis flap; item 45569 should be claimed for closure of the abdomen and reconstruction of the umbilicus, and item 45570 may be claimed if repair of the musculoaponeurotic layer is required. When claiming item 45530 for a latissimus dorsi flap, no item for the closure of the musculoaponeurotic layer should be claimed as it is expected that repair will be by direct suture. In the small number of cases, when a latissimus dorsi flap is used, and repair by means other than direct suture is required, use of item 45203 would be appropriate.

Items 30165-30179 (lipectomy items) should not be claimed in association with item 45530 as stated in the Health Insurance (General Medical Services Table) Regulations.

TN.8.98 Breast Prosthesis, Removal and Replacement of - (Items 45553 and 45554)

It is generally expected that the replacement prosthesis will be the same size as the prosthesis that is removed. Medicare benefits are not payable for services under items 45553-45554 where the procedure is performed solely to increase breast size.

Where the original implant was not inserted in the context of breast cancer or developmental abnormality, intra-operative photographs need to demonstrate significant evidence of substantial skin laxity to justify replacement of the prosthesis.

In the context of eligibility for item 45553 and 45554, an unacceptable deformity would not include asymmetry caused as a result of implant removal.

Where a rupture has been established through imaging and reported, items 45553 and 45554 will still apply even if intra-operatively the implant is found to be structurally intact.

Full clinical details must be documented in patient notes, including pre-operative photographic and / or diagnostic imaging evidence demonstrating the clinical need for the service as this may be subject to audit.

TN.8.99 Breast Ptosis - (Items 45556 and 45558)

For the purposes of item 45556, Medicare benefit is only payable for the correction of breast ptosis when performed unilaterally, in the context of breast cancer or developmental breast abnormality to match the position of the contralateral breast. This item is payable only once per patient. Additional benefit is not payable if this procedure is also performed on the contralateral breast.

Item 45558 applies where correction of breast ptosis is indicated because at least two-thirds of the breast tissue, including the nipple, lies inferior to the infra-mammary fold where the nipple is located at the most dependent, inferior part of the breast contour.

Full clinical details must be documented in patient notes, including pre-operative photographic evidence (including anterior, left lateral and right lateral views) as specified in the item descriptor which demonstrates the clinical need for the service, as this may be subject to audit.

TN.8.100 Nipple and/or Areola Reconstruction - (Items 45545 and 45546)

Item 45545 involves the taking of tissue from, for example, the other breast, the ear lobe and the inside of the upper thigh with or without local flap.

Item 45546 covers the non-surgical creation of nipple or areola by intradermal colouration.

TN.8.101 Liposuction - (Items 45584 and 45585)

Medicare benefits for liposuction are generally attracted under item 45584, that is for the treatment of post-traumatic pseudolipoma. Such trauma must be significant and result in large haematoma and localised swelling. Only on very rare occasions would benefits be payable for bilateral liposuction.

Where liposuction is indicated for the treatment of Barraquer-Simons Syndrome, lymphoedema or macrodystrophia lipomatosa, or the reduction of buffalo hump, item 45585 applies. One regional area is defined as one limb or trunk. If liposuction is required on more than one limb, item 45585 can be claimed once per limb.

Full clinical details must be documented in patient notes, including pre-operative photographic and / or diagnostic imaging evidence demonstrating the clinical need for the service as this may be subject to audit.

TN.8.102 Meloplasty for Correction of Facial Asymmetry - (Items 45587 and 45588)

Benefits are payable under items 45587 and 45588 for face lift operations performed in hospital to correct soft tissue abnormalities of the face due to causes other than the ageing process, including trauma, a congenital condition or disease.

Where bilateral meloplasty is indicated because of congenital malformation for conditions such as drooping from the angles of the mouth and deep pitting of the skin resulting from severe acne scarring, disease or trauma (but not as a result of previous cosmetic surgery), item 45588 applies.

Full clinical details must be documented in patient notes, including pre-operative photographic and/or diagnostic imaging evidence demonstrating the clinical need for the service as this may be subject to audit.

TN.8.103 Reduction of Eyelids - (Items 45617 and 45620)

Where a reduction is performed for a medical condition of one eyelid, it may be necessary to undertake a similar compensating procedure on the other eyelid to restore symmetry. The latter operation would also attract benefits.

Medicare benefits are not payable for non-therapeutic cosmetic services. Full clinical details must be documented in patient notes, including pre-operative photographic and / or diagnostic evidence demonstrating the clinical need for the service as this may be subject to audit.

TN.8.104 Rhinoplasty - (Items 45632 to 45644, and 45650)

Benefits are payable for septoplasty (item 41671) where performed in conjunction with rhinoplasty.

A Medicare benefit for items 45632 – 45644 and 45650 is payable where the indication for surgery is for:

- (i) airway obstruction and the patient has a self-reported NOSE Scale score of greater than 45; or
- (ii) significant acquired, congenital or developmental deformity.

The NOSE Scale refers to the Nasal Obstruction Symptom Evaluation Scale, developed by Stewart et al, as published in the Otolaryngology-Head and Neck Surgery, 130: 2.

The NOSE Scale can be accessed here: <https://www.entnet.org/content/facial-plasticsrhinology-outcome-tool-nose-scale>

Full clinical details must be documented in patient notes, including pre-operative photographic and / or NOSE Scale evidence demonstrating the clinical need for the service as this may be subject to audit.

TN.8.105 Contour Restoration - (Item 45647)

For the purpose of item 45647, a region in relation to the face is defined as either being upper left or right, mid left or right or lower left or right. Accounts should be annotated with region/s to which the service applies.

TN.8.106 Vermilionectomy - (Item 45669)

Item 45669 covers treatment of the entire lip.

TN.8.107 Osteotomy of Jaw - (Items 45720 to 45752)

The fee and benefit for these items include the various forms of internal or dental fixation, jaw immobilisation, the transposition of nerves and vessels and bone grafts taken from the same site. Bone grafts taken from a separate site, eg iliac crest, would attract additional benefit under Item 47726 or 47729 for the harvesting, plus Item 48239 or 48242 for the grafting.

For the purposes of these items, a reference to maxilla includes the zygoma.

Item 75621 for the provision of fitting of surgical templates may be claimed in association with the appropriate orthognathic surgical items in the range of 45720 to 45754 for prescribed dental patients registered under the Cleft Lip and Cleft Palate Scheme.

TN.8.108 Genioplasty - (Item 45761)

Genioplasty attracts benefit once only although a section is made on both sides of the symphysis of the mandible.

TN.8.109 Tumour, Cyst, Ulcer or Scar - (Items 45801 to 45813)

It is recognised that odontogenic keratocysts, although not neoplastic, often require the same surgical management as benign tumours.

TN.8.110 Fracture of Mandible or Maxilla - (Items 45975 to 45996)

There are two maxillae in the skull and for the purpose of these items the mandible is regarded as comprising two bones.

TN.8.111 Reduction of Dislocation or Fracture

Closed reduction means treatment of a dislocation or fracture by non-operative reduction, and includes the use of percutaneous fixation or external splintage by cast or splints.

Open reduction means treatment of a dislocation or fracture by either operative exposure including the use of any internal or external fixation; or non-operative (closed reduction) where intra-medullary or external fixation is used.

Where the treatment of a fracture requires reduction on more than one occasion to achieve an adequate alignment, benefits are payable for each separate occasion at which reduction is performed under the appropriate item covering the fracture being treated.

The treatment of fractures/dislocations not specifically covered by an item in Subgroup 15 (Orthopaedic) attracts benefits on an attendance basis.

TN.8.112 Removal of Multiple Exostoses (Items 47933 and 47936)

Items 47933 and 47936 provide for removal of multiple exostoses when undertaken via the same incision.

TN.8.116 Wrist Surgery - (Items 49200 to 49227)

For the purposes of these items, the wrist includes both the radiocarpal joint and the midcarpal joint.

TN.8.117 Diagnostic Arthroscopy and Arthroscopic Surgery of the Knee (Items 49557 and 49563)

The Medical Services Advisory Committee (MSAC) evaluated the available evidence and did not support public funding for matrix-induced autologous chondrocyte implantation (MACI) or autologous chondrocyte implantation (ACI) for the treatment of chondral defects in the knee and other joints, due to the increased cost compared to existing procedures and the lack of evidence showing short term or long-term improvements in clinical outcomes. Medicare benefits are not payable in association with this technology.

TN.8.118 Paediatric Patients - (Items 50450 to 50658)

For the purpose of Medicare benefits a paediatric patient is considered to be a patient under the age of eighteen years, except in those instances where an item provides further specifications (i.e. fracture items for paediatric patients which state "with open growth plates").

TN.8.119 Treatment of Fractures in Paediatric Patients - (Items 50500 to 50588)

Items 50552 and 50560 apply to fractures that may arise during delivery and at an age when anaesthesia poses a significant risk and thus reduction is usually performed in the neonatal unit or nursery.

Item 50576 provides for closed reduction in the skeletally immature patient and will require application of a hip spica cast and related aftercare.

Medicare benefits are payable for services that specify reduction with or without internal fixation by open or percutaneous means, where reduction is carried out on the growth plate or joint surface or both.

TN.8.120 Unresectable primary malignant tumour of the liver destruction of by open or laparoscopic radiofrequency ablation or microwave tissue ablation- (Item 50952)

A multi-disciplinary team for the purposes of item 50952 would include a hepatobiliary surgeon, interventional radiologist and a gastroenterologist or oncologist.

TN.8.121 Paracentesis of anterior chamber or vitreous cavity and/or intravitreal injection - (Items 42738 to 42740)

Items 42738 and 42739 provide for paracentesis for the injection of therapeutic substances and/or the removal of aqueous or vitreous, when undertaken as an independent procedure. That is, not in conjunction with other intraocular surgery.

Item 42739 should be claimed for patients requiring anaesthetic services for the procedure. Advice from the Royal Australian and New Zealand College of Ophthalmologists is that independent injections require only topical anaesthesia, with or without subconjunctival anaesthesia, except in specific circumstances as outlined below where additional anaesthetic services may be indicated:

- nystagmus or eye movement disorder;
- cognitive impairment precluding safe intravitreal injection without sedation;
- a patient under the age of 18 years;
- a patient unable to tolerate intravitreal injection under local anaesthetic without sedation; or
- endophthalmitis or other inflammation requiring more extensive anaesthesia (eg peribulbar).

Practitioners billing item 42739 must keep clinical notes outlining the basis for the use of anaesthetic.

Item 42740 provides for intravitreal injection of therapeutic substances and/or the removal of vitreous for diagnostic purposes when performed in conjunction with other intraocular surgery including with a service to which Item 42809 (retinal photocoagulation) applies.

TN.8.122 Bone Graft (Items 48200-48242 and 48642-48651)

Bone graft substitute materials can be used for the purpose of bone graft for items 48200-48242 and 48642-48651.

TN.8.123 Vulvoplasty and Labioplasty - (Items 35533 and 35534)

Item 35533 is intended to cover the surgical repair of female genital mutilation or a major congenital anomaly of the uro-gynaecological tract which is not covered by existing MBS items. For example, this item would apply where a patient who has previously received treatment for cloacal extrophy, bladder exstrophy or congenital adrenal hyperplasia requires additional or follow-up treatment.

Item 35534 is intended to cover services for a structural abnormality causing significant functional impairment and is restricted to patients aged 18 years and over.

A detailed clinical history outlining the structural abnormality and the medical need for surgery of the vulva and/or labia must be included in patient notes, as this may be subject to audit.

Medicare benefits are not payable for non-therapeutic cosmetic services.

TN.8.124 Treatment of Wrist and Finger Fractures - (Items 47301 to 47319, and 47361 to 47373)

- For the purposes of these items, fixation includes internal and external.
- Regarding item 47362, major regional anaesthesia includes bier block.

TN.8.125 Removal of Skin Lesions - Necessary Excision Diameter - (Items 31356 to 31376)

The necessary excision diameter (or defect size) refers to the lesion size plus a clinically appropriate margin of healthy tissue required with the intent of complete surgical excision. Measurements should be taken prior to excision. Margin size should be determined in line with NHMRC guidelines:

Clinical practice guide - Basal cell carcinoma, squamous cell carcinoma (and related lesions)-a guide to clinical management in Australia. November 2008. Cancer Council Australia and; Clinical Practice Guidelines for the Management of Melanoma in Australia and New Zealand (2008).

For the purpose of Items 31356 to 31376 the defect size is calculated by the average of the width and the length of the skin lesion and an appropriate margin. The necessary excision diameter is calculated as shown in the Factsheet at this link: [Determining lesion size for MBS item selection](#).

Practitioners must retain copies of histological reports and any other supporting evidence (patient notes, photographs etc). Photographs should include scale.

An episode of care includes both the excision and closure for the same defect, even when excision and closure occur at separate attendances.

Definitive surgical excision for items 31371 to 31376 means surgical removal with adequate margins as part of the curative management of the malignancies specified in these items.

An incomplete surgical excision of a malignant skin lesion with curative intent should be billed as a malignant skin lesion excision item even when further surgery is needed. Wide excision of the primary tumour bed following local excision of a primary melanoma, appendageal carcinoma, malignant connective tissue or merkel cell carcinoma of the skin may be claimed using item 31371, 31372, 31373, 31374, 31375 or 31376, depending on the location of the malignancy and the size of the excision diameter.

For Items 31356 to 31370, a malignant skin lesion is defined as a basal cell carcinoma; a squamous cell carcinoma (including keratoacanthoma); a cutaneous deposit of lymphoma; or a cutaneous metastasis from an internal malignancy.

TN.8.126 Flap Repair - (Item 45202)

Practitioners must only perform a muscle or skin flap repair where clinical need can be clearly evidenced (i.e. where a patient has severe pre-existing scarring, severe skin atrophy, sclerodermoid changes or where the defect is contiguous with a free margin).

Clinical evidence may be supported by patient notes, photographs of the affected area and pathology reports.

TN.8.127 Interpretation of femoroacetabular impingement (FAI) restriction (items 48424, 49303, 49366)

Patients presenting with hip dysplasia, Perthes Disease and Slipped Upper Femoral Epiphysis (SUFE) are eligible for treatment under items 49366, 49303 and 48424.

TN.8.132 Transcatheter occlusion of left atrial appendage for stroke prevention (item 38276)

Explanatory Note

A contraindication to lifelong anticoagulation is defined as:

- i) a previous major bleeding complication experienced whilst undergoing treatment with oral anticoagulation therapy,
- ii) a blood dyscrasia, or
- iii) a vascular abnormality predisposing to potentially life threatening haemorrhage

The procedure is performed as a hospital service.

TN.8.133 Endoscopic upper gastrointestinal strictures (item 30475)

Endoscopic upper GI stricture services 41819 and 41820 have been consolidated under item 30475. This consolidated item will allow any endoscopic technique to be performed for oesophageal through to gastroduodenal procedures and will include imaging intensification if done. The fee is the same as item 41819 which higher than item 30475 but lower than 41820.

TN.8.134 Application of items 32084, 32087, 32090 and 32093

If a service to which item 32084, 32087, 32090 or 32093 applies is provided by a practitioner to a patient on more than one occasion on a day, the second service is taken to be a separate service for the purposes of the item if the second service is provided under a second episode of anaesthesia or other sedation.

TN.8.135 Transcatheter Aortic Valve Implantation (Item 38495)

Item 38495 applies only to a service for Transcatheter Aortic Valve Implantation (TAVI) for the treatment of symptomatic severe aortic stenosis, that is to be provided in a TAVI Hospital by a TAVI Practitioner on a TAVI patient.

TAVI Hospital

For item 38495 a TAVI Hospital means a hospital, as defined by subsection 121-5(5) of the Private Health Insurance Act 2007, that is clinically accepted as being a suitable hospital in which the service described in Item 38495 may be performed.

The Transcatheter Aortic Valve Implantation - Rules for the Accreditation of TAVI Practitioners developed by Cardiac Accreditation Services Limited provides guidance on what are considered by the sector as minimum requirements that must be met in order to be a clinically acceptable facility that is suitable for TAVI procedures to be performed at.

Transcatheter Aortic Valve Implantation - Rules for the Accreditation of TAVI Practitioners can be accessed via www.tavi.org.au.

TAVI Practitioner

For item 38495 a TAVI Practitioner is either a cardiothoracic surgeon or interventional cardiologist who is accredited by Cardiac Accreditation Services Limited.

Accreditation by Cardiac Accreditation Services Limited must be valid prior to the service being undertaken in order for benefits to be payable under item 38495.

The process for accreditation and re-accreditation is outlined in the *Transcatheter Aortic Valve Implantation - Rules for the Accreditation of TAVI Practitioners*, issued by Cardiac Accreditation Services Limited, and is available on the Cardiac Accreditation Services Limited website, www.tavi.org.au.

Cardiac Accreditation Services Limited is a national body comprising representatives from the Australian & New Zealand Society of Cardiac & Thoracic Surgeons (ANZSCTS) and the Cardiac Society of Australia and New Zealand (CSANZ).

TAVI Patient

A TAVI Patient means a patient who, as a result of a TAVI Case Conference, has been assessed as having an unacceptably high risk for surgical aortic valve replacement and is recommended as being suitable to receive the service described in item 38495.

A TAVI Case Conference is a process by which:

- (a) there is a team of 3 or more participants, where:
 - (i) the first participant is a cardiothoracic surgeon; and
 - (ii) the second participant is an interventional cardiologist; and
 - (iii) the third participant is a specialist or consultant physician who does not perform a service described in Item 38495 for the patient being assessed; and
 - (iv) either the first or the second participant is also a TAVI Practitioner; and
- (b) the team assesses a patient's risk and technical suitability to receive the service described in Item 38495, taking into account matters such as:
 - (i) the patient's risk and technical suitability for a surgical aortic valve replacement; and
 - (ii) the patient's cognitive function and frailty; and
- (c) the result of the assessment is that the team makes a recommendation about whether or not the patient is suitable to receive the service described in Item 38495; and
- (d) the particulars of the assessment and recommendation are recorded in writing.

While benefits are payable for an eligible TAVI Case Conference under Items 6080 and 6081, a claim for these services does not have to be made in order for a benefit to be paid under Item 38495. Item 38495 is only payable once per patient in a five year period.

TN.8.136 Corneal Collagen Cross Linking (Item 42652)

Evidence of progression in patients over the age of twenty five is determined by the patient history including an objective change in tomography or refraction over time. Evidence of progression in patients aged twenty five years or younger is determined by patient history including an objective change in tomography or refraction over time and/or posterior elevation data and objective documented progression at a subclinical level.

TN.8.137 Thyroidectomy and hemithyroidectomy procedures (items 30296, 30306, and 30310)

Total thyroidectomy or total hemithyroidectomy are the most appropriate procedures in the majority of circumstances when a thyroidectomy is required. The preferred procedure for thyrotoxicosis is total thyroidectomy (item 30296). Item 30310 is to be used only in uncommon circumstances where a subtotal or partial thyroidectomy is indicated and includes a subtotal lobectomy, nodulectomy, or isthmusectomy or equivalent partial thyroidectomy.

TN.8.138 Re-exploratory thyroid surgery (item 30297)

Item 30297 is for re-exploratory thyroid surgery where prior thyroid surgery and associated scar tissue increases the complexity of surgery. For completion hemithyroidectomy on the contralateral side to a previous hemithyroidectomy for thyroid cancer, item 30306 is the appropriate item.

TN.8.139 Personal performance of a Synacthen Stimulation Test (item 30097)

A 0900h serum cortisol (0830-0930) less than 100 nmol/L indicates adrenal deficiency and a Synacthen Test is not required.

A 0900h serum cortisol (0830-0930) greater than 400 nmol/L indicates adrenal sufficiency and a Synacthen Test is not required. An exception to this is when testing women on oral contraception where cortisol levels may be higher due to increases in cortisol-binding globulin and this threshold may not exclude women with adrenal insufficiency.

TN.8.140 Excision of graft material - Items 35581 and 35582

For items 35581 and 35582 the size of the excised graft material must be histologically tested and confirmed.

TN.8.141 Application of items 51011 to 51171 (Sub-group 17)

Spinal surgery items 51011 to 51171 cannot be performed in conjunction with any other item (outside of subgroup 17) in Group T8 of the MBS (surgical operation items 30001 to 50952), when that surgical item is related to spinal surgery.

Meaning of Motion Segment

Motion segment is defined as including all anatomical structures (including traversing and exiting nerve roots) between and including the top of the pedicle above to the bottom of the pedicle below.

Combined Anterior and Posterior Surgery

Combined anterior/ posterior surgery items 51061, 51062, 51063, 51064, 51065 and 51066 cannot be claimed with any item between 51020 and 51045 (i.e. items for spinal instrumentation, posterior bone graft and/or anterior column fusion).

Interpretation of Spinal Fusion

Lumbar spinal fusion may not be claimed for chronic low back pain for which a diagnosis has not been made.

TN.8.142 Spinal Decompression - Items 51011 to 51015

Items 51011 to 51015 are for services which include discectomy, decompression of central spinal canal by laminectomy or partial corpectomy (vertebral spurs and osteophytes; less than 50% of the vertebral body), and decompression of the subfacetal recess, the exit foramen and far lateral (intertransverse) space.

For decompression procedures, only one item is selected from 51011 to 51015.

For posterolateral spinal fusion without instrumentation, if a decompression procedure is combined with the fusion, two items numbers can be selected: one from 51011 to 51015 and one from 51031 to 51036.

For posterolateral spinal fusion with instrumentation, two item numbers can be selected: one from 51020 to 51026 and one from 51031 to 51036. If decompression is also performed, three items can be selected: one from 51011 to 51015, one from 51020 to 51026 and one from 51031 to 51036.

For instrumented spinal fusion with interbody and posterolateral bone graft (with or without cages) and decompression, four item numbers can be selected: one from one from 51011 to 51015, one from 51020 to 51026, one from 51031 to 51036 and one from 51041 to 51045.

If more than 50% of a vertebral body is resected (piecemeal vertebrectomy) an item from 51051 to 51059 can be selected in addition to an item from 51011 to 51015.

Items 51011 to 51015 can be used when the purpose of the laminectomy is exposure or posterior spinal release.

TN.8.143 Spinal Instrumentation (cervical, thoracic and lumbar) - Items 51020 to 51026

Items 51020 to 51026 are intended for spinal instrumentation at any level. The appropriate item is determined by the number of motion segments instrumented, barring item 51020 which applies to one vertebra.

For posterolateral spinal fusion with instrumentation, two item numbers are selected: one from 51020 to 51026 and one from 51031 to 51036. If decompression is also performed, three items are selected: one from 51011 to 51015, one from 51020 to 51026 and one from 51031 to 51036.

For instrumented spinal fusion with interbody and posterolateral bone graft (with or without cages) and decompression, four item numbers are selected: one from one from 51011 to 51015, one from 51020 to 51026, one from 51031 to 51036 and one from 51041 to 51045.

TN.8.144 Posterior and/or Posterolateral (intertransverse or facet joint) bone graft (cervical, thoracic and lumbar) - Items 51031 to 51036

Items 51031 to 51036 are for services which include local morcellized, artificial or harvested bone graft with or without bone morphogenic protein (BMP).

For posterolateral spinal fusion without instrumentation, if a decompression is combined with the fusion, two items numbers are selected: one from 51011 to 51015 and one from 51031 to 51036.

For posterolateral spinal fusion with instrumentation, two item numbers are selected: one from 51020 to 51026 and one from 51031 to 51036. If decompression is also performed, three items are selected: one from 51011 to 51015, one from 51020 to 51026 and one from 51031 to 51036.

For instrumental spinal fusion with interbody and posterolateral bone graft (with or without cages) and decompression, four item numbers are selected: one from one from 51011 to 51015, one from 51020 to 51026, one from 51031 to 51036 and one from 51041 to 51045.

TN.8.145 Anterior column fusion, with or without implant, or limited vertebrectomy (less than 50%) and anterior fusion (cervical, thoracic and lumbar) - Items 51041 to 51045

Items 51041 to 51045 are for services which include placement of local morcellized, artificial, harvested bone graft, bone morphogenic protein (BMP) and prosthetic devices into the intervertebral space. Artificial bone grafting materials must be used in accordance with the manufacturer's instructions.

Items 51041 to 51045 are to be selected irrespective of surgical approach (anterior, direct lateral or posterior via open or minimally invasive techniques).

For instrumented spinal fusion with interbody and posterolateral bone graft (with or without cages) and decompression, four item numbers are selected: one from one from 51011 to 51015, one from 51020 to 51026, one from 51031 to 51036 and one from 51041 to 51045.

For and instrumented anterior cervical decompression and fusion, (with or without cage) three items are selected: one from 51011 to 51015, one from 51020 to 51026, and one from 51041 to 51045.

Items 51041 to 51045 cannot be claimed with any item between 51051 and 51059 if performed at the same motion segment.

If an assisting surgeon is used at any time during the procedure, then 51160 or 51165 should be used in isolation by the assisting surgeon. If the assisting surgeon needs to perform complex non-spinal surgery, they may use a more appropriate item from outside the spinal surgery schedule.

TN.8.146 Spinal Osteotomy and/or vertebrectomy - Items 51051 to 51059

Items 51051 to 51059 are intended for spinal osteotomy and/or vertebrectomy at any level.

For the purpose of items 51054, 51055 and 51056, the definition of piecemeal or subtotal excision is the removal of at least 50% of the vertebral body.

Items 51051 to 51059 cannot be claimed with any item between 51041 and 51045 if performed at the same motion segment.

TN.8.147 Anterior and Posterior (combined) Spinal fusion under one anaesthetic via separate incisions - Items 51061 to 51066

Only one of these items should be billed for any appropriate combined anterior and posterior surgeries which are completed under one anaesthetic. The appropriate item is determined by the number of motion segments to which grafting and fusion occur.

These items cannot be claimed with any item between 51020 to 51026, 51031 to 51036 and 51041 to 51045.

If a laminectomy is included, an item from 51011 to 51015 can also be used appropriate to the level of decompression.

If spinal osteotomy or vertebrectomy (>50%) is performed as part of the combined anterior/posterior approach, it is appropriate to claim one item between 51051 to 51056 in addition to an item between 51061 to 51066.

TN.8.148 Odontoid Screw fixation – Item 51103

This item is not for use when another item is claimed for the management of the odontoid fracture.

TN.8.149 Application of items 51160 and 51165

If the spine surgeon performs their own exposure to the thoracic or lumbar spine then 51160 or 51165 can be added to the claim for the overall surgery. If an assisting surgeon is used at any time during the procedure, then 51160 or 51165 should be used in isolation by the assisting surgeon. If the assisting surgeon needs to perform complex non-spinal surgery, they may use a more appropriate item but not in combination with 51160 or 51165. If an exposure surgeon claims a number from any section of the MBS schedule, the spinal surgeon cannot claim 51160 or 51165.

TN.8.150 Correction of Developmental Breast Abnormality - (Items 45060 to 45062)

Full clinical details must be documented in patient notes, including pre-operative photographic and / or diagnostic imaging evidence as specified in the item descriptor which demonstrates the clinical need for the service, as this may be subject to audit.

Volumetric measurement of the breasts should be performed using a technique which has been reported in a published study.

TN.8.151 Mohs surgery service caseload

Services under items 31000, 31001 and 31002 should make up at least 90% of a Mohs surgeon's caseload of items 31000-31005 annually.

TN.9.1 Assistance at Operations - (Items 51300 to 51318)

Items covering operations which are eligible for benefits for surgical assistance have been identified by the inclusion of the word "Assist." in the item description. Medicare benefits are not payable for surgical assistance associated with procedures which have not been so identified.

The assistance must be rendered by a medical practitioner other than the surgeon, the anaesthetist or the assistant anaesthetist.

Where more than one practitioner provides assistance to a surgeon no additional benefits are payable. The assistance benefit payable is the same irrespective of the number of practitioners providing surgical assistance.

NOTE: The Benefit in respect of assistance at an operation is not payable unless the assistance is rendered by a medical practitioner other than the anaesthetist or assistant anaesthetist. The amount specified is the amount payable whether the assistance is rendered by one or more medical practitioners.

Assistance at Multiple Operations

Where surgical assistance is provided at two or more operations performed on a patient on the one occasion the multiple operation formula is applied to all the operations to determine the surgeon's fee for Medicare benefits

purposes. The multiple-operation formula is then applied to those items at which assistance was rendered and for which Medicare benefits for surgical assistance is payable to determine the abated fee level for assistance. The abated fee is used to determine the appropriate Schedule item covering the surgical assistance (ie either Item 51300 or 51303).

Multiple Operation Rule - Surgeon	Multiple Operation Rule - Assistant
Item A - \$300@100%	Item A (Assist.) - \$300@100%
Item B - \$250@50%	Item B (No Assist.)
Item C - \$200@25%	Item C (Assist.) - \$200@50%
Item D - \$150@25%	Item D (Assist.) - \$150@25%

The derived fee applicable to Item 51303 is calculated on the basis of one-fifth of the abated Schedule fee for the surgery which attracts an assistance rebate.

Surgeons Operating Independently

Where two surgeons operate independently (ie neither assists the other or administers the anaesthetic) the procedures they perform are considered as two separate operations, and therefore, where a surgical assistant is engaged by each, or one of the surgeons, benefits for surgical assistance are payable in the same manner as if the surgeons were operating separately.

TN.9.2 Benefits Payable under Item 51300

Medicare benefits are payable under item 51300 for assistance rendered at any operation identified by the word "Assist." for which the fee does not exceed the fee threshold specified in the item descriptor, or at a series or combination of operations identified by the word "Assist." for which the aggregate Schedule fee threshold specified in the item descriptor has not been exceeded.

TN.9.3 Benefits Payable Under Item 51303

Medicare benefits are payable under item 51303 for assistance rendered at any operation identified by the word "Assist." for which the fee exceeds the fee threshold specified in the item descriptor or at a series or combination of operations identified by the word "Assist." for which the aggregate Schedule fee exceeds the threshold specified in the item descriptor.

TN.9.4 Benefits Payable Under Item 51309

Medicare benefits are payable under item 51309 for assistance rendered at any operation identified by the word "Assist." or a series or combination of operations identified by the word "Assist." and assistance at a birth involving Caesarean section.

Where assistance is provided at a Caesarean section birth and at a procedure or procedures which have not been identified by the word "Assist.", benefits are payable under item 51306.

TN.9.5 Assistance at Cataract and Intraocular Lens Surgery - (Item 51318)

The reference to "previous significant surgical complication" covers vitreous loss, rupture of posterior capsule, loss of nuclear material into the vitreous, intraocular haemorrhage, intraocular infection (endophthalmitis), cystoid macular oedema, corneal decompensation or retinal detachment.

TN.10.1 Relative Value Guide For Anaesthetics - (Group T10) **Overview of the RVG**

The RVG groups anaesthesia services within anatomical regions. These items are listed in the MBS under Group T10, Subgroups 1-16 Anaesthesia for radiological and other therapeutic and diagnostic services are grouped separately under Subgroup 17. Also included in the RVG format are certain additional monitoring and therapeutic services, such as blood pressure monitoring (item 22012) and central vein catheterisation (item 22020) when performed in association with the administration of anaesthesia. These services are listed at subgroup 19. The RVG also provides for assistance at anaesthesia under certain circumstances. These items are listed at subgroup 26.

Details of the billing requirements for the RVG are available from the Department of Human Services website.

The RVG is based on an anaesthesia unit system reflecting the complexity of the service and the total time taken for the service. Each unit has been assigned a dollar value.

Under the RVG, the MBS fee for anaesthesia in connection with a procedure is comprised of up to three components:

1. The basic units allocated to each anaesthetic procedure, reflecting the complexity of the procedure (an item in the range 20100-21997);
2. The time unit allocation reflecting the total time of the anaesthesia (an item in the range 23010-24136); and
3. Where appropriate, modifying units recognising certain added complexities in anaesthesia (an item/s in the range 25000-25020).

Assistance at anaesthesia

To establish the fee for the assistant service items 25200 and 25205, both services have been allocated a number of base units. The total time that the assistant anaesthetist was in active attendance on the patient is then added, along with modifiers as appropriate to determine the MBS fee.

Whole body perfusion

Where whole body perfusion is performed, the MBS fee is determined by adding together the following:

1. The base units allocated to the service (item 22060);
2. The time unit allocation reflecting the total time of the perfusion (an item in the range 23010 - 24136); and
3. Where appropriate, modifying units recognising certain added complexities in perfusion (an item/s in the range 25000 – 25020).

TN.10.2 Eligible Services

Generally, a Medicare benefit is only payable for anaesthesia which is performed in connection with an "eligible" service. An "eligible" service is defined as a clinically relevant professional service which is listed in the Schedule and which has been identified as attracting an anaesthetic fee.

TN.10.3 RVG Unit Values

Basic Units

The RVG basic unit allocation represents the complexity of the anaesthetic procedure relative to the anatomical site and physiological impact of the surgery.

Time Units

The number of time units is calculated from the total time of the anaesthesia service, the assistant at anaesthesia service or the whole body perfusion service:

- *for anaesthesia*, time is considered to begin when the anaesthetist commences exclusive and continuous care of the patient for anaesthesia. Time ends when the anaesthetist is no longer in professional attendance, that is, when the patient is safely placed under the supervision of other personnel;
- *for assistance at anaesthesia*, time is taken to be the period that the assistant anaesthetist is in active attendance on the patient during anaesthesia; and
- *for perfusion*, perfusion time begins with the commencement of anaesthesia and finishes with the closure of the chest.

For up to and including the first - 2 hours of time, each 15 minutes (or part thereof) constitutes 1 time unit. For time beyond 2 hours, each time unit equates to 10 minutes (or part thereof).

For statistical purposes, a separate MBS item applies to every 5 minute increment for anaesthetic services between 15 minutes and 2 hours duration. For or these services, the appropriate 5 minute item number should be included on accounts.

Modifying Units (25000 - 25050)

Modifying units have been included in the RVG to recognise added complexities in anaesthesia or perfusion, associated with the patient's age, physical status or the requirement for emergency surgery. These cover the following clinical situations:

ASA physical status indicator 3 - A patient with severe systemic disease that significantly limits activity (item 25000). This would include: severely limiting heart disease; severe diabetes with vascular complications or moderate to severe degrees of pulmonary insufficiency.

Some examples of clinical situations to which ASA 3 would apply are:

- a patient with ischaemic heart disease such that they encounter angina frequently on exertion thus significantly limiting activities;
- a patient with chronic airflow limitation who gets short of breath such that the patient cannot complete one flight of stairs without pausing;
- a patient who has suffered a stroke and is left with a residual neurological deficit to the extent that is significantly limits normal activity, such as hemiparesis; or
- a patient who has renal failure requiring regular dialysis.

ASA physical status indicator 4 - A patient with severe systemic disease which is a constant threat to life (item 25005). This covers patients with severe systemic disorders that are already life-threatening, not always correctable by an operation. This would include: patients with heart disease showing marked signs of cardiac failure; persistent angina or advanced degrees of pulmonary, hepatic, renal or endocrine insufficiency.

ASA physical status indicator 4 would be characterised by the following clinical examples:

- a person with coronary disease such that they get angina daily on minimum exertion thus severely curtailing their normal activities;
- a person with end stage emphysema who is breathless on minimum exertion such as brushing their hair or walking less than 20 metres; or
- a person with severe diabetes which affects multiple organ systems where they may have one or more of the following examples:
- severe visual impairment or significant peripheral vascular disease such that they may get intermittent claudication on walking less than 20 metres; or

- severe coronary artery disease such that they suffer from cardiac failure and/or angina whereby they are limited to minimal activity.

ASA physical status indicator 5 - a moribund patient who is not expected to survive for 24 hours with or without the operation (item 25010). This would include: a burst abdominal aneurysm with profound shock; major cerebral trauma with rapidly increasing intracranial pressure or massive pulmonary embolus.

The following are some examples that would equate to ASA physical status indicator 5

- a burst abdominal aneurysm with profound shock;
- major cerebral trauma with increasing intracranial pressure; or
- massive pulmonary embolus.
- **NOTE:** It should be noted that the Medicare Benefits Schedule does NOT include modifying units for patients assessed as ASA physical status indicator 2. Some examples of ASA 2 would include:
 - a patient with controlled hypertension which has no affect on the patient's normal lifestyle;
 - a patient with coronary artery disease that results in angina occurring on substantial exertion but not limiting normal activity; or
 - a patient with insulin dependant diabetes which is well controlled and has minimal effect on normal lifestyle.
- Where the patient is less than 12 months or age or 70 years or greater (item 25015).
- For anaesthesia, assistance at anaesthesia or a perfusion service in association with an *emergency procedure (item 25020).
- For anaesthesia or assistance at anaesthesia in association with an *after hours emergency procedure (items 25025 and 25030).
- For a perfusion service in association with *after hours emergency surgery (item 25050).

* **NOTE:** It should be noted that the emergency modifier and the after hours emergency modifiers cannot both be claimed in the one anaesthesia assistance at anaesthesia or perfusion episode.

It should also be noted that modifiers are not stand alone services and can only be claimed in association with anaesthesia, assistance at anaesthesia or with a perfusion service covered by item 22060.

Definition of Emergency

For the purposes of both the emergency modifier and the after hours emergency modifiers, emergency is defined as existing where the patient requires immediate treatment without which there would be significant threat to life or body part.

Definition of After Hours

For the purposes of the after hours emergency modifier items, the after hours period is defined as being the period from 8pm to 8am on any weekday or at any time on a Saturday, a Sunday or a public holiday. Benefit for the After Hours Emergency Modifiers is only payable where more than 50% of the time for the emergency anaesthesia, the assistance at emergency anaesthesia or the perfusion service is provided in the after hours period. In situations where less than the 50% of the time for the service falls in the after hours period, the emergency modifier rather than the after hours emergency modifier applies. For information about deriving the fee for the service where the after hours emergency modifier applies.

TN.10.4 Deriving the Schedule Fee under the RVG

The Schedule fee for each component of anaesthesia (base items, time items and modifier items) in the RVG Schedule is derived by applying the unit value to the total number of anaesthesia units for each component. For example:

ITEM	DESCRIPTION		SCHEDULE FEE
RVG	Anaesthesia Service	Units	SCHEDULE FEE (Units x \$ 19.45)
20840	Anaesthesia for resection of perforated bowel	6	\$116.70
23200	Time - 4 hours 40 minutes	24	\$466.80
25000	Modifier - Physical status	1	\$19.45
22012	Central Venous Pressure Monitoring	3	\$58.35

After Hours Emergency Services

When deriving the fee for the after hours emergency modifier for anaesthesia or assistance at anaesthesia, the 50% loading applies to the anaesthesia or assistance service from Group T10 and to any additional clinically relevant therapeutic or diagnostic service from Group T10, Subgroup 18, provided during the anaesthesia episode. For example:

ITEM	DESCRIPTION	UNITS	SCHEDULE FEE (Units x \$19.45)
20840	Anaesthesia for resection of perforated bowel	6	\$ 116.70
23190	Time - 4 hours 40 minutes	24	\$466.80
25000	Modifier - Physical status	1	\$19.45
22012	Central Venous Pressure Monitoring	3	\$58.35
	TOTAL UNITS	34	Schedule fee = \$661.30
25025	Anaesthesia After Hours Emergency Modifier		Schedule Fee \$661.30 x 50% = \$330.65

Definition of Radical Surgery for the RVG

Where the term radical appears in an item description, it refers to an extensive surgical procedure, performed for the treatment of malignancy. It usually denotes extensive block dissection not only of the malignant tissue, but also of the surrounding tissue, particularly fat and lymphatic drainage systems. See notes T10.18 and T10.22 which clarify the definitions of the words "extensive" and "radical" used in items 20192 and 20474.

Multiple Anaesthesia Services

Where anaesthesia is provided for services covered by multiple items in the RVG, Medicare benefit is only payable for the RVG item with the highest basic unit value. However, the time component should include the total anaesthesia time taken for all services. For example:

ITEM	DESCRIPTION	UNITS	SCHEDULE FEE
20790	Anaesthesia for Cholecystectomy	8	\$155.60
20752	Incisional Hernia	6	(lower value - fee not payable) \$116.70
23111	Time - 2hrs 30mins	11	\$213.95
25015	Physical Status - Over 70	1	\$19.45

Prolonged Anaesthesia

Under the RVG, the previous rules that related to prolonged anaesthesia no longer apply. Where anaesthesia is prolonged beyond that which an anaesthetist would normally encounter for a particular service, the RVG provides for the anaesthetist to claim the total anaesthesia time for the procedure/s.

TN.10.5 Minimum Requirements for Claiming Benefits under Items in the RVG (including sedation)

Medicare benefits for RVG services (including sedation) are only payable where both the staffing and the facility in which the service was rendered meets the following minimum guidelines. These guidelines are based on protocols established by the Australian and New Zealand College of Anaesthetists (ANZCA).

Staffing

- Techniques intended to produce loss of consciousness must not be used unless an anaesthetist is present to care exclusively for the patient;
- Where the patient is a young child, is elderly or has any serious medical condition (such as significant cardio-respiratory disease or danger of airway compromise), an anaesthetist should be present to administer sedation and monitor the patient;
- In all other cases, an appropriately trained medical practitioner, other than the proceduralist, is required to be in exclusive attendance on the patient during the procedure, to administer sedation and to monitor the patient; and
- There must be sufficient equipment (including oxygen, suction and appropriate medication), to enable resuscitation should it become necessary.

Facilities

The procedure must be performed in a location which is adequate in size and staffed and equipped to deal with a cardiopulmonary emergency. This must include:

- An operating table, trolley or chair which can be readily tilted;
- Adequate uncluttered floor space to perform resuscitation, should this become necessary;
- Adequate suction and room lighting;
- A supply of oxygen and suitable devices for the administration of oxygen to a spontaneously breathing patient;
- A self inflating bag suitable for artificial ventilation together with a range of equipment for advance airway management;
- Appropriate drugs for cardiopulmonary resuscitation;
- A pulse oximeter; and
- Ready access to a defibrillator.

These requirements apply equally to dental anaesthesia or sedation services provided under items in Group T10, Subgroup 20 of the RVG.

TN.10.6 Account Requirements

Before a benefit will be paid for the administration of anaesthesia, or for the services of an assistant anaesthetist, a number of details additional to those set out at paragraph 7.1 of the General Explanatory Notes of the Medicare Benefits Schedule are required on the anaesthetist's account:

- **the anaesthetist's account** must show the name/s of the medical practitioner/s who performed the associated operation/s. In addition, where the after hours emergency modifier applies to the anaesthesia service, the account must include the start time, the end time and total time of the anaesthetic.
- **the assistant anaesthetist's account** must show the names/s of the medical practitioners who performed the associated operation/s, as well as the name of the principal anaesthetist. In addition, where the after hours emergency modifier applies, the assistant anaesthetist's account must record the start time, the end time and the total time for which he or she was providing professional attention to the patient during the anaesthetic.
- **the perfusionist's account** must record the start time, end time and total time of the perfusion service where the after hours emergency modifier is claimed.

TN.10.7 General Information

The Health Insurance Act provides that where anaesthesia is administered to a patient, the premedication of the patient in preparation for anaesthesia is deemed to form part of the administration of anaesthesia. The administration of anaesthesia also includes the pre-anaesthesia consultation with the patient in preparation for that administration, except where such consultation entails a separate attendance carried out at a place other than an operating theatre or an anaesthesia induction room. The pre-anaesthesia consultation for a patient should be performed in association with a clinically relevant service.

Except in special circumstances, benefit is not payable for the administration of anaesthesia listed in Subgroups 1-18, unless the anaesthesia is administered by a medical practitioner other than the medical practitioner who renders the medical service in connection with which anaesthesia is administered.

Fees and benefits for anaesthesia services under the RVG cover all essential components in the administration of the anaesthesia service. Separate benefit may be attracted, however, for complementary services such as central venous pressure and direct arterial pressure monitoring (see note T10.9).

It should be noted that additional benefit is not payable for intravenous infusion or electrocardiographic monitoring, provision for which has been made in the value determined for the anaesthetic units.

The Medicare benefit derived under the RVG for the administration of anaesthesia is the benefit payable for that service irrespective of whether one or more than one medical practitioner administers it. However, benefit is provided under Subgroup 24 for the services of one assistant anaesthetist (who must not be either the surgeon or assistant surgeon (see Note 10.9)

Where a regional nerve block or field nerve block is administered by a medical practitioner other than the practitioner carrying out the operation, the block is assessed as an anaesthesia item according to the advice in paragraph T10.4. When a block is carried out in cases not associated with an operation, such as for intractable pain or during labour, the service falls under Group T7.

When a regional nerve block or field nerve block covered by an item in Group T7 of the Schedule is administered by a medical practitioner in the course of a surgical procedure undertaken by him/her, then such a block will attract benefit under the appropriate item in Group T7.

It should be noted that where a procedure is carried out with local infiltration or digital block as the means of anaesthesia, that anaesthesia is considered to be part of the procedure and an additional benefit is therefore not payable.

It may happen that the professional service for which the anaesthesia is administered does not itself attract a benefit because it is part of the after-care of an operation. This does not, however, affect the benefit payable for the anaesthesia service. Benefit is payable for anaesthesia administered in connection with such a professional service (or combination of services) even though no benefit is payable for the associated professional service.

The administration of epidural anaesthesia during labour is covered by Item 18216 or 18219 in Group T7 of the Schedule whether administered by the medical practitioner undertaking the confinement or by another medical practitioner. Subsequent "top-ups" are covered by Item 18222 or 18225.

TN.10.8 Additional Services Performed in Connection with Anaesthesia - Subgroup 19

Included in the RVG format are a number of additional or complimentary services which may be provided in connection with anaesthesia such as pulmonary artery pressure monitoring (item 22012) and intra-arterial cannulation (item 22025).

These items (with the exception of peri-operative nerve blocks (22030-22050)) and perfusion services (22055-22075) have also been retained in the MBS in the non-RVG format, for use by practitioners who provide these services other than in association with anaesthesia.

Where an anaesthetist provides an additional (clinically relevant) service during anaesthesia that is not one listed in Subgroup 19 (excluding intravenous infusion or electrocardiographic monitoring) the relevant non-RVG item should be claimed.

Items 22012 and 22014

Benefits are payable under items 22012 and 22014 only once for each type of pressure, up to a maximum of 4 pressures per patient per calendar day, and irrespective of the number of practitioners involved in monitoring the pressures.

TN.10.9 Assistance in the Administration of Anaesthesia

The RVG provides for a separate benefit to be paid for the services of an assistant anaesthetist in connection with an operation or series of operations in specified circumstances, as outlined below. This benefit is payable only in respect of one assistant anaesthetist who must not be the surgeon or assistant surgeon.

Therapeutic and Diagnostic services covered by Subgroup 19 items (such as blood transfusion, pressure monitoring, insertion of CVC, etc) are payable only once per patient per anaesthetic episode. Where these services are provided by the assistant anaesthetist these services are eligible for Medicare benefits only where the same service is not also claimed by the primary anaesthetist.

Assistance at anaesthesia in connection with emergency treatment (Item 25200)

Item 25200 provides for assistance at anaesthesia where the patient is in imminent danger of death. Situations where imminent danger of death requiring an assistant anaesthetist might arise include: complex airway problems, anaphylaxis or allergic reactions, malignant hyperpyrexia, neonatal and complicated paediatric anaesthesia, massive blood loss and subsequent resuscitation, intra-operative cardiac arrest, critically ill patients from intensive care units or inability to wean critically ill patients from pulmonary bypass.

Assistance in the administration of elective anaesthesia (Item 25205)

A separate benefit is payable under Item 25205 for the services of an assistant anaesthetist in connection with elective anaesthesia in the circumstances outlined in the item descriptor. This benefit is only payable in respect of one assistant anaesthetist who must not be the surgeon or assistant surgeon.

For the purposes of Item 25205, a 'complex paediatric case' involves one or more of the following:-

- (i) the need for invasive monitoring (intravascular or transoesophageal); or
- (ii) organ transplantation; or
- (iii) craniofacial surgery; or
- (iv) major tumour resection; or

- (v) separation of conjoint twins.

TN.10.10 Perfusion Services - (Items 22055 to 22075)

Perfusion services covered by items 22055-22075 have been included in the RVG format.

As with anaesthesia, where whole body perfusion is performed, the Schedule fee is determined on the base units allocated to the service (item 22060), the total time for the perfusion, and modifying units, as appropriate, i.e.

- (a) the basic units allocated to whole body perfusion under item 22060:

22060	WHOLE BODY PERFUSION, CARDIAC BYPASS , where the heart-lung machine or equivalent is continuously operated by a medical perfusionist, other than a service associated with anaesthesia to which an item in Subgroup 21 applies. (20 basic units) (See para T10.10 of explanatory notes to this Category)
-------	--

- (b) plus, the time unit allocation reflecting the total time of the perfusion (an item in the range 23010 - 24136), for example:

23033	41 MINUTES TO 45 MINUTES (3 basic units)
-------	--

plus, where appropriate

- (c) modifying units recognising certain added complexities in perfusion (an item/s in the range 25000 - 25020), for example:

25015	ANAESTHESIA, PERFUSION OR ASSISTANCE AT ANAESTHESIA - where the patient's age is up to one year or 70 years or greater (1 basic unit)
-------	--

The time component for item 22060 is defined as beginning with the commencement of anaesthesia and finishing with the closure of the chest.

Items 22065 and 22070 may only be used in association with item 22060.

Medicare benefits are not payable for perfusion unless the perfusion is performed by a medical practitioner other than the medical practitioner who renders the associated medical service in Group T8 or the medical practitioner who administers the anaesthesia listed in the RVG in Group T10.

The medical practitioner providing the service must comply with the training requirements in the Australian and New Zealand College of Anaesthetists (ANZCA) *Guidelines for Major Extracorporeal Perfusion* (PS27 2015).

Benefits are not payable if another person primarily and/or continuously operates the HLM.

TN.10.12 Discontinued Procedure - (Item 21990)

Item 21990 applies when a patient has been anaesthetised but the proposed procedure has been abandoned prior to surgery commencing.

Claims should include notation of the surgery or procedure which had been proposed.

Under the Health Insurance Act 1973 the Chief Executive Medicare does not require claims for this item to be accompanied by details of the proposed surgery and the reasons why the operation was discontinued. However, practitioners must maintain a clinical record of this information, which may be subject to audit.

TN.10.13 Anaesthesia in Connection with a Procedure not Identified as Attracting a Medicare Benefit for Anaesthesia - (Item 21997)

Payment of benefit for Item 21997 is not restricted to the service being performed in connection with a surgical service in Group T8. Item 21997 may be performed with any item in the Medicare Benefits Schedule that has not been identified as attracting a Medicare benefit for anaesthesia (including attendances) in circumstances where anaesthesia is considered clinically necessary.

TN.10.14 Anaesthesia in Connection with a Dental Service - (Items 22900 and 22905)

Items 22900 and 22905 cover the administration of anaesthesia in connection with a dental service that is not a service covered by an item in the Medicare Benefits Schedule i.e removal of teeth and restorative dental work. Therefore, the requirement that anaesthesia be performed in association with an 'eligible' service (as defined in point T10.2) does not apply to dental anaesthesia items 22900 and 22905.

TN.10.15 Anaesthesia in Connection with Cleft Lip and Cleft Palate Repair - (Items 20102 and 20172)

Anaesthesia associated with cleft lip and cleft palate repair is covered in Subgroup 1 of the RVG Schedule, under items 20102 and 20172.

TN.10.16 Anaesthesia in Connection with an Oral and Maxillofacial Service - (Category 4 of the Medicare Benefits Schedule)

Benefit for anaesthesia provided by a medical practitioner in association with an Oral and Maxillofacial service (Category 4 of the Medicare Benefits Schedule) is derived using the RVG. Benefit for anaesthesia for oral and maxillofacial services should be claimed under the appropriate RVG item from Subgroup 1 or 2.

TN.10.17 Intra-operative Blocks for Post Operative Pain - (Items 22031 to 22050)

Benefits are only payable for intra-operative nerve blocks performed for the management of post-operative pain that are specifically catered for under items 22031 to 22050.

TN.10.18 Anaesthesia in Connection with Extensive Surgery on Facial Bones - (Item 20192)

The term 'extensive' in relation to this item is defined as major facial bone surgery or reconstruction including major resection or osteotomies or osteectomies of mandibles and/or maxillae, surgery for prognathism or surgery for Le Fort II or III fractures.

TN.10.19 Intrathecal or Epidural Injection for Control of Post-operative Pain - Initial - (Item 22031)

Benefits are payable under item 22031 for the initial intrathecal or epidural injection of a therapeutic substance/s, in association with anaesthesia and surgery, for the control of post-operative pain. Benefit is not payable for subsequent intra-operative intrathecal and epidural injection (item 22036) in the same anaesthetic episode. Where subsequent infusion is provided post operatively, to maintain analgesia, benefit would be payable under items 18222 or 18225.

TN.10.20 Intrathecal or Epidural Injection for Control of Post-operative Pain - Subsequent - (Item 22036)

Benefits are payable under item 22036 for subsequent intrathecal or epidural injection of a therapeutic substance/s, in association with anaesthesia and surgery, performed intra-operatively, for postoperative pain management, where the catheter is already in-situ. Benefits are not payable under this item where the initial injection was performed intra-operatively, under item 22031, in the same anaesthetic episode.

TN.10.21 Regional or Field Nerve Blocks for Post-operative Pain - (Items 22040 - 22050)

Benefits are payable under Items 22040 to 22050 in addition to the general anaesthesia for the related procedure.

TN.10.22 Anaesthesia for Radical Procedures on the Chest Wall - (Item 20474)

Radical procedures on the chest wall referred to in item 20474 would include procedures such as pectus excavatum.

TN.10.23 Anaesthesia for Extensive Spine or Spinal Cord Procedures - (Item 20670)

This item covers major spinal surgery involving multiple levels of the spinal cord and spinal fusion where performed. Procedures covered under this item would include the Harrington Rod technique. Surgery on individual spinal levels would be covered under items 20600, 20620 and 20630.

TN.10.24 Anaesthesia for Femoral Artery Embolectomy - (Item 21274)

Item 21274 covers anaesthesia for femoral artery embolectomy. Grafts involving intra-abdominal vessels would be covered under item 20880.

TN.10.25 Anaesthesia for Cardiac Catheterisation - (Item 21941)

Item 21941 does not include either central vein catheterisation or insertion of right heart balloon catheter. Anaesthesia for these procedures is covered under item 21943.

TN.10.26 Anaesthesia for 2 Dimensional Real Time Transoesophageal Echocardiography - (Item 21936)

Benefits are payable for anaesthesia in connection with 2 dimensional real time transoesophageal echocardiography, (including intra-operative echocardiography) which includes doppler techniques, real time colour flow mapping and recording onto video tape or digital medium.

TN.10.27 Anaesthesia for Services on the Upper and Lower Abdomen - (Subgroups 6 and 7)

Establishing whether an RVG anaesthetic item pertains to the upper or lower abdomen, depends on whether the majority of the associated surgery was performed in the region above or below the umbilicus.

Some examples of upper abdomen would be:

- laparoscopy on upper abdominal viscera;
- laparoscopy with operative focus superior to the umbilical port;
- surgery to the liver, gallbladder and ducts, stomach, pancreas, small bowel to DJ flexure;
- the kidneys in their normal location (as opposed to pelvic kidney); or
- spleen or bowel (where it involves a diaphragmatic hernia or adhesions to gallbladder bed).

Some examples of lower abdomen would be:

- abdominal wall below the umbilicus;
- laparoscopy on lower abdominal viscera;
- laparoscopy with operative focus inferior to the umbilical port;
- surgery on the jejunum, ileum, or colon;
- surgery on the appendix; or
- surgery associated with the female reproductive system.

TN.10.28 Anaesthesia for Microvascular Free Tissue Flap Surgery - (Items 20230, 20355, 20475, 20704, 20804, 20905, 21155, 21275, 21455, 21535, 21685, 21785 and 21865)

Benefits are only payable where complete free tissue flap surgery is undertaken involving microsurgical arterial and venous anastomoses. Benefits do not apply for microsurgical rotation flaps or for re-implementation of digits or either the hand or the foot.

TN.10.29 Anaesthesia for Endoscopic Ureteric Surgery - Including Laser Procedure - (Item 20911)

Benefits are not payable under item 20911 for diagnostic ureteroscopy.

TN.11.1 Botulinum Toxin - (Items 18350 to 18379)

The Therapeutic Goods Administration (TGA) assesses each indication for the therapeutic use of botulinum toxin on an individual basis. There are currently three botulinum toxin agents with TGA registration (Botox®, Dysport® and Xeomin®). Each has undergone a separate evaluation of its safety and efficacy by the TGA as they are neither bioequivalent, nor dose equivalent. When claiming under an item for the injection of botulinum toxin, only the botulinum toxin agent specified in the item can be used. Benefits are not payable where an agent other than that specified in the item is used.

The TGA assesses each indication for the therapeutic use of botulinum toxin by assessment of clinical evidence for its use in paediatric or adult patients. Where an indication has been assessed for adult use, data has generally been assessed using patients over 12 years of age. Paediatric indications have been assessed using data from patients under 18 years of age. Botulinum toxin should only be administered to patients under the age of 18 where an item is for a paediatric indication, and patients over 12 years of age where the item is for an adult indication, unless otherwise specified.

Items for the administration of botulinum toxin can only be claimed by a medical practitioner who is recognised as an eligible medical practitioner for the relevant indication under the arrangements under Section 100 of the *National Health Act 1953* (the Act) relating to the use and supply of botulinum toxin. The specialist qualifications required to administer botulinum toxin vary across the indications for which the medicine is listed on the PBS, and are detailed within the relevant PBS restrictions available at: www.pbs.gov.au/browse/section100-mf

Item 18354 for the treatment of equinus, equinovarus or equinovalgus is limited to a maximum of 4 injections per patient on any day (2 per limb). Accounts should be annotated with the limb which has been treated. Item 18292 may not be claimed for the injection of botulinum toxin, but may be claimed where a neurolytic agent (such as phenol) is used, in addition to botulinum toxin injection(s), to treat the obturator nerve in patients with a dynamic foot deformity.

Treatment under item 18375 or 18379 can only continue if the patient achieves at least a 50% reduction in urinary incontinence episodes from baseline from the start of week 6 through to the end of week 12 after the first treatment. The term 'continue' means the patient can be retreated under item 18375 or 18379 at some point after the 12 week period (for example; 6 to 12 months after the first treatment). This requirement is in line with the PBS listing for the supply of the medicine for this indication under Section 100 of the *Act*.

Item 18362 for the treatment of severe primary axillary hyperhidrosis allows for a maximum number of 3 treatments per patient in a 12 month period, with no less than 4 months to elapse between treatments.

Botulinum toxin which is not supplied and administered in accordance with the arrangements under Section 100 of the *Act* is not required to be provided free of charge to patients. Where a charge is made for the botulinum toxin administered, it must be separately listed on the account and not billed to Medicare. Since 1 September 2015, PBS patient co-payments have applied to botulinum toxin supplied and administered in accordance with the arrangements under Section 100 of the *Act*.

The Department of Human Services (DHS) has developed a [Health Practitioner Guideline to substantiate that a patient had a pre-existing condition at the time of the service](#) which is located on the DHS website.

TR.8.1 Mechanical thrombectomy - (Item 35414)

For the purposes of this item, *eligible stroke centre* means a facility that:

- (a) has a designated stroke unit;
- (b) is equipped and has staff available or on call so that it is capable of providing the following to a patient on a 24-hour basis:
 - (i) the services of a specialist or consultant physician who has the training required under paragraph (b) of item 35414;
 - (ii) diagnostic imaging services using advanced imaging techniques, which must include computed tomography, computed tomography angiography, digital subtraction angiography, magnetic resonance imaging, and magnetic resonance angiography; and
 - (iii) care from a team of health practitioners which includes a stroke physician, a neurologist, a neurosurgeon, a radiologist, an anaesthetist, an intensive care unit specialist, a medical imaging technologist, and a nurse;
- (c) has dedicated endovascular angiography facilities; and
- (d) has written procedures for assessing and treating patients who have, or may have, experienced a stroke.

Note: A health practitioner may fulfil the role of more than one of the types of health practitioner specified in paragraph (b)(iii). For example, a neurologist may also be a stroke physician.

Conjoint Committee for Recognition of Training in Interventional Neuroradiology (CCINR)

CCINR comprises representatives from the Australian and New Zealand Society of Neuroradiology (ANZSNR), the Neurosurgical Society of Australasia (NSA) and the Australian and New Zealand Association of Neurologists (ANZAN). For the purposes of this item, specialists or consultant physicians performing this procedure must have training recognised by CCINR, and the Department of Human Services notified of that recognition.

arteriovenous malformation, excision of	39803		23580, 23590, 23600, 23610, 23620, 23630, 23640, 23650
arteriovenous, dissection, ligation	34112, 34115, 34118		23660, 23670, 23680, 23690, 23700, 23710, 23720, 23730
arteriovenous, dissection, repair	34121, 34124, 34127		23740, 23750, 23760, 23770, 23780, 23790, 23800, 23810
	34130		23820, 23830, 23840, 23850, 23860, 23870, 23880, 23890
arteriovenous, external, insertion/removal	34500, 34506		23900, 23910, 23920, 23930, 23940, 23950, 23960, 23970
arteriovenous, ligation cervical vessel/s	39812		23980, 23990, 24100-24136

assistance, modifiers 25000, 25005, 25010, 25015, 25020
25025, 25030
Assisted reproductive technologies 13200, 13203, 13206
13209, 13212, 13215, 13218, 13221
atherectomy, peripheral 35312
Atherectomy, peripheral arterial 35312
atresia, auditory canal reconstruction 45662
Atresia, choanal, repair/correction 45645-45646
atresia/corrosive stricture, replacement for 43903
Atrial chamber/s, operations for arrhythmia 38512, 38515
Atticotomy 41533, 41536
auditory canal, correction of 41521
Auditory canal, external 41524
auditory meatus, removal of exostoses 41518
augmentation 38766
Augmentation mammoplasty 45524, 45527-45528
Aural polyp, removal of 41506
aural, removal of 41506, 41509
Autoconjunctival transplant 42641
Avulsion, penis, repair of 37411
Axilla, lymph glands, excision of 30332
Axillary hyperhidrosis, excision for 30180, 30183
Axillary hyperhidrosis, vessel, ligation/exploration, other 34103
Axillofemoral graft, infected, excision of 34172

B

Baker's cyst, excision of 30114
Baker's, excision of 30114
Balloon catheter, right heart, insertion of 13818
balloon dilatation of 41832
Balloon enteroscopy 30680, 30682, 30684, 30686
balloon pump, insertion of 38362, 38609
balloon pump, removal of 38612-38613
bands or lingual tonsils, removal of 41804
Bariatric Surgery 31569, 31572, 31575, 31578, 31581, 31584
Bariatric surgery, surgical reversal of 31584
Bartholin's abscess, incision of 35520
Bartholin's, cautery destruction of 35517
Bartholin's, excision of 35513
Bartholin's, incision of 35520
Bartholin's, marsupialisation of 35517
base tumour, removal, infra-temporal 41581
Bat ear or similar deformity, correction of 45659
bed, reconstruction of laceration 46486
benign lesion 31500, 31503
benign, of soft tissue, removal 31350
Bicornuate uterus, plastic reconstruction for 35680
bicornuate, plastic reconstruction for 35680
Bile duct, common, radical resection 30461, 30463-30464
Biliary atresia, paediatric, portoenterostomy for 43978
biliary dilatation 30495
biliary drainage 30440, 30451, 30495
biliary stenting 30492
biliary/renal tract, extraction of 30450
biopsies, multiple, with infracolic omentectomy 35726
biopsy 30409, 30411-30412
biopsy (closed) 36561
biopsy of 30075, 30081, 30084, 30087, 42676
biopsy of for suspected malignancy 35620
biopsy of prostate 37212, 37218
biopsy of solid tumour, vacuum-assisted, image guided 31530

biopsy of vertebra 30093
biopsy of with hysteroscopy 35630
biopsy of, with cystoscopy 36836
biopsy of, with IUD insertion for idiopathic menorrhagia 35502
Biopsy, aggressive bone/deep tissue tumour 50200-50201
biopsy, by cardiac catheterisation 38275
biopsy, deep organ, imaging guided 30094
biopsy, using ABBI 31539, 31545
bladder stress, suprapubic operation 37044
Bladder, aspiration of, by needle 37041
bladder, cystoscopic removal of 36833
bladder, diathermy/resection with cystoscopy 36840, 36845
bladder, endoscopic incision/resection 36854
bladder, laser destruction with cystoscopy 36840
bladder, removal of 36863
Bladder, stress incontinence, sling procedure 37040, 37338
blepharospasm 18369-18370, 18372, 18374
blood pressure monitoring 13876
body tumour, resection of 34148, 34151, 34154
bone conduction hearing system 41603-41604
bone graft to 50644
bone grafting for pseudarthrosis 46405
bone grafting of phalanx for 46402, 46405
bone marrow 30081, 30084, 30087
bone, benign, requiring allograft, resection of 50230
Bone, cysts, injection into or aspiration of 47900
bone, fracture, treatment of 45981, 47762, 47765, 47768
47771
bone, injection into or aspiration of 47900
bone, innocent, excision of 30241
bone, malignant, operations for 50200-50201, 50203, 50206
50209, 50212, 50215, 50218, 50221, 50224, 50227, 50230
50233, 50236, 50239
bone, operation on, for osteomyelitis 43509, 43518
bone, osteectomy or osteotomy of 48424, 48427
bone, reconstruction of 45788
bone, removal of styloid process of 30244
bone, resection for removal of tumour 41584, 41587
bones, bone grafting, pseudarthrosis 46402, 46405
bones, fracture, treatment of 47735, 47738, 47741
bones, operation for osteomyelitis 46462
bones, osteotomy/osteectomy 46396, 46399
Botulinum toxin, injection for 18350-18351, 18353-18354
18360, 18362, 18365-18366, 18368-18370, 18372, 18374
18377, 18379
Boutonniere deformity, reconstruction of 46444, 46447
bowel intubation 30488
bowel strictureplasty 30564
Bowel, colectomy, total 30608, 30622, 32009, 32012, 32015
32018, 32021
bowel, endoscopic examination of 32095
Brachial fistula 43832
Brachial plexus, exploration of 39333
Brachial, removal of 30287
Brachycephaly, cranial vault reconstruction for 45785
Brachytherapy planning 15536
brain, operations for 39703
Branchial cyst, removal of 30286-30287
branchial, removal of 30286, 30289
breast 31530, 31533, 31548
Breast, biopsy, fine needle, imaging guided 31533
breast, correction of (unilateral) 45556

breast, exploration and drainage 31551
 Breast, malignant tumour, targeted intraoperative radiotherapy 15900
 Breast, malignant tumour, complete local excision 31516
 breast, removal and/or replacement 45548, 45551
 45553-45554
 Broad ligament cyst/tumour, excision/removal 35713, 35717
 broad ligament, excision of 35713, 35717
 broad ligament, removal of 35713, 35717
 Brodie's abscess, operation for 43515
 bronchogenic, thoracotomy and excision 43912
 Bronchial tree, intrathoracic operation on, other 38456
 Bronchoscopy, as an independent procedure 41889
 Bronchus, dilatation of stricture and stent insertion 41905
 bronchus, removal of 41895
 Broviac catheter, insertion of, for chemotherapy 34527-34528
 34540
 Bubonocele operation 30614
 Bunion, excision of 47933
 Burch colpo suspension 37044
 Burns, dressing of (not involving grafting) 30003, 30006
 30010, 30014
 Burr-hole craniotomy, intracranial haemorrhage 39600
 burr-hole for intracranial haemorrhage 39600
 Burst abdomen, repair of 30403
 by open exposure of the trachea 41881
 bypass 30460, 30466-30467, 38627
 bypass for venous stenosis or occlusion 34812
 bypass grafting, occlusive arterial disease 32700, 32703
 32708, 32710-32712, 32715, 32718, 32721, 32724, 32730
 32733, 32736, 32739, 32742, 32745, 32748, 32751, 32754
 32757, 32760, 32763
 Bypass, extracranial to intracranial 39818
 bypass, for occlusive arterial disease 32700, 32703, 32708
 32710-32712, 32715, 32718, 32721, 32724, 32730, 32733
 32736, 32739, 32742, 32745, 32748, 32751, 32754, 32757
 32760, 32763

C

Caecostomy, 30375, 30637
 Caesarean section 16520, 16522
 calcaneal spur, excision of 49818
 Calcaneal spur, of foot, excision of 49818
 Calcanean bursa, excision of 30111
 Calcaneum fracture, treatment of 47606, 47609, 47612, 47615
 47618
 Calculus, biliary, extraction of 30454-30455, 30457-30458
 Caldwell-Luc operation 41710
 Calf, decompression fasciotomy of 47975, 47978, 47981
 canal external, blind sac closure 41564
 canal stenosis, correction of, with meatoplasty 41521
 canaliculus, immediate repair of 42605
 Cancer of skin/mucous membrane, removal 30196, 30202
 cancer, treatment of 30196, 30202
 Cannulae, membrane oxygenation 38627
 cannulation for cardiopulmonary bypass 38603
 cannulation for infusion chemotherapy, open 34524
 cannulation of, in a neonate 13300
 Cannulation, arterial, for infusion chemotherapy 34524
 Canthoplasty 42590
 Capsulectomy 42719, 42731

capsulotomy 42788
 Capsulotomy, laser 42788
 Carbon dioxide laser resurfacing, face or neck 45025-45026
 Carbuncle, incision and drainage, with GA 30223
 cardiac 38200, 38203, 38206, 38209, 38212-38213, 38215
 38218, 38220, 38222
 Cardiac by-pass, whole body perfusion 22060
 cardiac, excision of 38670, 38673, 38677, 38680
 Cardiopexy, antireflux operation 30530
 Cardioplegia, retrograde administration of 22070
 Cardiopulmonary bypass, cannulation for 38600, 38603
 Cardiotocography, antenatal (restriction) 16514
 Cardioversion 13400
 care, independent of confinement 16500
 Carotid artery, aneurysm, graft replacement 33100
 carotid body, resection of 34148, 34151, 34154
 carotid-cavernous, obliteration of 39815
 carpal bone 46324-46325
 Carpal bone, replacement arthroplasty 46324-46325
 Carpometacarpal joint, arthrodesis of 46303
 carpus 48406, 48409
 Carpus dislocation, treatment of 47030, 47033
 carpus, operation for 46462
 caruncle, cauterisation of 35523
 caruncle, excision of 35527
 Caruncle, urethral, cauterisation of 35523
 Cataract, juvenile, removal of 42716
 catheter, insertion and fixation of 13109
 catheter, insertion of 39140
 catheter, insertion of for infusion device 39125, 39128
 Catheter, peritoneal insertion and fixation 13109
 catheter, removal of 13110, 34530, 34540
 catheterisation 38200, 38203, 38206, 38209, 38212-38213
 38215, 38218, 38220, 38222
 catheterisation - for myocardial biopsy 38275
 catheterisation of 36800, 38200, 38203, 38206
 catheterisation with cystoscopy 36818, 36824
 Catheterisation, bladder, independent procedure 36800
 catheterisation, peripheral 35317, 35319-35321
 cauterisation of, for ectropion or entropion 42581
 cauterisation of, other than by chemical means 35608
 Cauterisation, angioma (restriction applies) 45027
 Cautery, conjunctiva, including treatment of pannus 42677
 caval filter, insertion of 35330
 cavernous fistula, obliteration of 39815
 Cavernous sinus, tumour or vascular lesion, excision 39660
 cavity and/or post nasal space, examination of 41653
 cavity, aspiration of 38800, 38803
 cavity, packing for arrest of haemorrhage 41677
 cavity, reconstruction of 45590
 Cavopulmonary shunt, creation of 38733, 38736
 Cellulitis, incision with drainage, under GA 30223
 Central cannulation for cardiopulmonary bypass 38600
 central ducts, excision for benign condition 31557
 central vein 13318-13319, 13815
 central vein, for haemodialysis or parenteral nutrition 34538
 central vein, subcutaneous tunnel 34527-34528
 central vein, tunnelled cuffed 34538
 central vein, tunnelled cuffed catheter 34538
 central, catheterisation 13318-13319, 13815
 central, catheterisation, subcutaneous tunnel 34527-34528
 cephalic version 16501

Cerebello-pontine angle tumour	41575-41576, 41578-41579	closure of	30103, 30562
cerebello-pontine angle, removal of	41575-41576	closure of and repair of musculoaponeurotic layer	45570
41578-41579		closure of, in conjunction with free tissue transfer or breast reconstruction	45569
Cerebral palsy, hips or knees, application of cast under GA	50390	closure of, with rectal resection	32060, 32063, 32066
Cerebrospinal fluid drain, lumbar, insertion of	40018	closure of, without resection of bowel	30562
cervical	30294	closure or plastic repair of	30293
cervical, neonatal oesophageal atresia	43858	Club hand, radial, centralisation/radialisation	50399
cervix	35608, 35646	coalition, excision of	50333
Cervix, amputation or repair of	35618	Coccyx, excision of	30672
cervix, cone	35618	Cochlear implant, insertion with mastoidectomy	41617
cervix, punch	35608	Cochleotomy, or repair of round window	41614
cervix, removal of	35611	Coeliac artery, decompression of	34142
cervix-residual, removal of, abdominal approach	35612	coeliac, decompression of	34142
cervix-residual, removal of, vaginal approach	35613	coil, insertion of	37223
Chalazion, extirpation of	42575	Colectomy, subtotal, of large intestine	32004-32005
chamber, operation for arrhythmia	38518	collateral or cruciate ligament repair	49503, 49506
chemical peel	45019	collection of blood for	13709
Chemical peel, full face	45019	collection of, for transfusion	13709
Chemotherapy 13915, 13918, 13921, 13924, 13927, 13930, 13933		collection of, in infants, for pathology	13312
13936, 34529, 34534		Colonic atresia, neonatal, laparotomy for	43816
chemotherapy, cannulation for	34521, 34524	Colonic stent, insertion of	32023
Chest, or limb, decompression escharotomy	45054	colonic, total, intra-operative	32186
Chloasma, full face chemical peel	45019	colonoscopy	32084, 32087, 32090, 32093
Choanal atresia, repair/correction	45645-45646	Colonoscopy, fiberoptic	32084, 32087, 32090, 32093
cholangio-pancreatography	30484	Colorectal strictures, endoscopic dilatation of	32094
Cholangiogram, percutaneous transhepatic	30440	colostomy	30375
cholangiography or pancreatography	30439	Colostomy, closure of	30562, 30639
Cholangiography, operative	30439	Colotomy	30375
Cholangiopancreatography	30484	Colpoperineorrhaphy	35571, 35573
Cholecystectomy	30443, 30445-30446, 30448-30449	colpopexy	35597
Cholecystoduodenostomy	30460, 31472	Colpopexy, sacral	35597
Cholecystoenterostomy	30460, 31472	colposcopic examination of	35614
Cholecystostomy	30375	colposcopy with biopsy and diathermy	35646
Choledochal cyst, resection of	43972, 43975	Colposcopy, using Hinselmann-type instrument	35614
choledochal, resection of	43972, 43975	Colpotomy	35572
Choledochoduodenostomy	30460-30461	compartment repair, anterior	35570
Choledochointerostomy	30460-30461	compartment repair, anterior/posterior	35573
Choledochogastrostomy	30461	compartment repair, posterior	35571
Choledochojejunostomy	30460-30461	complicated by previous surgery	37444
Choledochoscopy	30442, 30452	complicated operative	35638, 35641
Choledochotomy	30454-30455, 30457	composite (chondro-cutaneous/mucosal)	45656
Chondro-cutaneous or chondro-mucosal graft	45656	composite graft to	45656
Chondroplasty of knee	49503, 49506	Composite graft to nose, ear or eyelid	45656
Chordee, correction of	37417	conduit, revision of	36609
Chorionic villus sampling	16603	Condylectomy	45611, 48406, 48424
cicatricial flexion contracture of, correction	50112	Condylectomy/condylotomy	45863
Cicatricial flexion/extension contracture, joint, correction	50112	cone biopsy of	35618
Ciliary body and/or iris, excision of tumour	42767	Cone biopsy of cervix	35618
Circulatory support device, management of	13851, 13854	Confinement	16515, 16518-16520, 16522
Circumcision	30649, 30654, 30658	congenital abnormalities, amputation of phalanges	50396
Cisternal puncture	39003	congenital abnormalities, splitting of phalanges	50396
clavicle	48406, 48409	Congenital absence of vagina, reconstruction for	35565
Clavicle, dislocation, treatment of	47003, 47006	congenital deficiency, treatment of	50411, 50414, 50417
claw or hammer toe, correction of	49848, 49851	50423	
Claw toe, correction of	49848	congenital deformity, post-op manipulation, plaster	50348
Cleft lip, operations for	45677, 45680, 45683, 45686, 45689	congenital dislocation, open reduction	50351
45692, 45695, 45698, 45701, 45704		congenital dislocation, reconstruction of quadriceps	50420
Clitoris, amputation of, medically indicated	35530	congenital pseudarthrosis, resection, fixation	50354
Clitoroplasty, reduction, ambiguous genitalia	37845, 37848	congenital, vertebral resection and fusion for	50640
Clival tumour, removal of	39653-39654, 39656, 39658	conjunctiva	42676
Cloaca, persistent, correction of	43969	Conjunctiva, cautery of	42677
Cloacal exstrophy, neonatal, operation for	43882		

device for delivery of therapeutic agents	14221, 14224	division of, with laparoscopy	30393
14227, 14230, 14233, 14236, 14239, 14242		division of, with laparotomy	30376, 30378-30379
device for drug delivery, loading of	13939, 13942, 13945	Dohlnan's operation	41773
device, automated, spinal, insertion of	39125-39128	Donald-Fothergill operation	35577
device, insertion, central vein catheterisation	34527-34529, 34534	Donor haemapheresis	13755
device, intra-uterine, removal under GA	35506	donor, continuous perfusion of	22055
device, introduction of, for idiopathic menorrhagia	35502	Double vagina, excision of septum	35566
device, removal of	34530	drainage by insertion of glass tube	42608
diagnostic	30390	drainage of deep abscess, imaging guided	30224
dialysis in hospital	13100, 13103	drainage of empyema, without rib resection	38806, 38809
Diaphragm, plication of for eventration	43915	drainage of, transthoracic	38450
Diaphragmatic hernia, neonatal, repair of	43837, 43840	drainage tube exchange, imaging guided	30451
diaphragmatic, neonatal, repair of	43837, 43840	drainage tube, exchange of	30225
diaphragmatic, repair of	30600-30601, 43838	drainage tube, exchange of, imaging guided	36649
Diaphyseal aclasia, removal of lesion/s from bone	50426	dressing and removal of, requiring GA	30055
Diastematomyelia, tethered cord, release of	40112	dressing of, requiring GA	30055
diathermy of	35608, 35646, 37318	Drez lesion, operation for	39124
Diathermy of bladder tumours	36840, 36845	Drill biopsy of lymph gland/deep tissue/organ	30078
diathermy or visual laser destruction of	37224	drill decompression of head/neck or both	47982
diathermy/visual laser for lesion of prostate	37224	drill, lymph gland, deep tissue/organ	30078
Digit, amputation of	46464-46465, 46468, 46471, 46474, 46477	Drug delivery device, loading of	13939, 13942, 13945
46480		drug delivery system	39125-39126, 39128, 39133
digital nail, removal of	46513, 46516	drug delivery system for spasticity management	14227
Digital nail, toe, removal of	47904, 47906	14230, 14233, 14236, 14239, 14242	
digital, of finger or thumb, removal of	46513, 46516	drum perforation, excision of rim	41644
digital, of toe, removal of	47904, 47906	duct, common, repair of	30472
digits, flexor/extensor contracture, correction	46492	duct, endoscopic stenting of	30491
dilatation	36821	duct, meatotomy or marsupialisation	30266
dilatation of	41822, 41825, 41828, 41831	duct, patent vitello, excision of	43945
dilatation of colorectal strictures	32094	duct, removal of calculus	30266
dilatation of, as an independent procedure	35554	duct, repair of,	30246
dilatation with cystoscopy	36812	Duct, salivary gland, diathermy/dilatation	30262
dilatation, endoscopic	30494	Ducts submandibular, removal of	30255
dilatation, percutaneous	30495	ducts, relocation of	30255
Direct flap repair	45209, 45212, 45215, 45218, 45221, 45224	ducts, Roux-en-Y bypass	30466-30467
direct, indirect or local, revision of	45239-45240	ductus arteriosus, division/ligation	38700, 38703
discontinuation of surgical procedure on medical groups	30001	Duodenal atresia, duodeno-duodenostomy/jejunostomy	43807
disease, neonatal, laparotomy for	43819	duodenal, perforated, suture of	30375
disease, paediatric, operations for	43990, 43993, 43996	Duodenoduodenostomy for duodenal atresia/stenosis	43807
43999		Duodenojejunostomy for duodenal atresia/stenosis	43807
Disimpaction of faeces under GA	32153	Duodenoscopy	30473, 30478
dislocation, acetabulum fracture, treatment	47495, 47498	duplication of digits, amputation of phalanges	50396
dislocation, congenital, treatment of	50349, 50352	duplication of digits, splitting of phalanges	50396
dislocation, congenital, treatment of including paediatric	50650, 50654, 50658	Dupuytren's contracture, operations for	46366, 46369, 46372
dislocation, treatment of	41686, 47009, 47012, 47015	46375, 46378, 46381, 46384, 46387, 46390, 46393	
47018, 47021, 47024, 47027, 47030, 47033, 47036, 47039		Dupuytren's, subcutaneous fasciotomy for	46366
47042, 47045, 47048, 47051, 47054, 47057, 47060, 47063		dynamic equinus foot deformity	18354
47066, 47069, 47072		Dysthyroid eye disease, decompression of orbit	42545
dislocations, treatment of	47000	dystopia, correction of	45776, 45779
Dissection, lymph nodes of neck	30618, 31423, 31426, 31429		
31432, 31435, 31438			
distal, devascularisation of	32200		
distal, excision of ganglion/mucous cyst	46495		
distal, for osteomyelitis	46459		
diverticulum of, excision or obliteration	37020		
Diverticulum, bladder, excision/obliteration	37020		
diverticulum, excision of	37372		
divided, repair of	36573		
division of adhesions	30393, 35637		
division of suture, eye	42794		
division of suture, laser	42794		

E

E.C.T.	14224
ear, complex total reconstruction of	45660-45661
Ear, composite graft to	45656
ear, exploration of	41629
ear, insertion of tube for drainage of	41632
ear, operation for abscess or inflammation of	41626
ear, removal of	41500, 41503
Eclampsia, treatment of	16509
Ectopic bladder, 'turning-in' operation	37842
ectopic, 'turning-in' operation	37842

ectropion or entropion, correction of	45626	Enterotomy, intra-operative, for endoscopy	30568
Ectropion, correction of	45626	Entropion, correction of	45626
elbow	49100, 49106, 49118, 49121	enucleation of	42506, 42509-42510
Elbow, arthrodesis of	49106	Enucleation of eye	42506, 42509
electrical stimulation of	13400	Epicondylitis, open operation for	47903
electrocoagulation diathermy	35644-35645	Epididymal cyst, excision of	37601
electrocoagulation, of cervix	35644-35645	epididymal, removal of	37601
Electroconvulsive therapy	14224	Epididymectomy	37613
electrode placement	40709, 40712	Epidural blood patch	18233
Electrode(s), epidural, insertion by laminectomy	39139	epidural electrode, insertion	39130
electrode, insertion	39130, 39139	epidural electrodes, management of	39131
electrode, management, adjustment etc.	39131	epidural implant, removal	39136
Electrolysis epilation, for trichiasis	42587-42588	epidural, for pain management, removal of	39136
electrophysiological studies	38209, 38212-38213	epidural, insertion of	39140
Electrophysiological studies, cardiac	38209, 38212-38213	epidural, percutaneous insertion of	39130
Embolectomy	33803, 33806	epidural, percutaneous, management of	39131
embolectomy of	33800, 33803, 33806	Epigastric hernia, repair of	30621
Embolus, removal from artery of neck	33800	Epilation electrolysis, for trichiasis	42587-42588
Empysema, lobar, neonatal, thoracotomy & lung resection	43861	Epilepsy, operations for	40700-40709, 40712
Empyema, intercostal drainage of	38806, 38809	Epiphyseal arrest	48500, 48503, 48506, 48509
Enbloc resection of tumour	50212, 50215, 50218, 50221, 50224 50227	epiphyseodesis	48500, 48503, 48506
Encephalocele, excision and closure of	40109	Epiphysiodesis, femur/fibula/tibia	48500, 48503, 48506
Endarterectomy	33500, 33506, 33509, 33512, 33515, 33518 33521, 33524, 33527, 33530, 33533, 33536, 33539, 33542	Epiphysiolysis, to prevent closure of plate	48512
endarterectomy	33509, 33521	Epispadias, repair of	37836, 37839, 37842
endarterectomy of	33500, 33506, 33509, 33512, 33515, 33518 33521, 33524, 33527, 33530, 33533, 33536, 33539, 33542	Epistaxis, treatment of	41656, 41677
endarterectomy, open operation	38505	Epithelial debridement for corneal ulcer/erosion	42650
Endobronchial tumour, endoscopic laser resection	41901	epithelial debridement for corneal ulcer/erosion	42650
endobronchial ultrasound, lung tumours	30710	epithelial debridement for keratoplasty	42651
Endocarditis, operative management of	38493	equinovarus, procedures for	50315, 50318, 50321, 50324 50327, 50330
Endocrine tumour, exploration of	30578, 30580-30581	erection device, revision or removal of	37432
endocrine, exploration of	30578, 30580-30581	ESWL	36546
Endolymphatic sac, transmastoid decompression	41590	Ethmoidal artery, transorbital ligation of	41725
endometrial	35616	ethmoidal, external operation on	41749
Endometrial biopsy for suspected malignancy	35620	ethmoidal, transorbital ligation of	41725
endometrial, for suspected malignancy	35620	Ethmoidectomy, fronto-nasal	41731
Endometriosis, laparoscopic ablation	35638	Etonogestral, subcutaneous implant, removal of	30062
Endometrium, ablation of, endoscopic	35622	eustachian tube	41755
endoscopic	30485, 36854	Eustachian tube, catheterisation of	41755
Endoscopic biliary dilatation	30494	Evacuation of retained products of conception	16564
endoscopic examination and ablation by microwave or thermal		Eventration, plication of diaphragm for	43915
balloon	35616	Evisceration of globe of eye	42512, 42515
endoscopic examination with cystoscopy	36812	examination of intestinal conduit/reservoir	36860
endoscopic gastrostomy	30481-30482	examination of small bowel	30569, 32095
endoscopic laser ablation	37207-37208	examination under GA, paediatric	44101-44102
Endoscopic ultrasound fine needle aspiration	30696	examination, under GA	32171
Endoscopy with balloon dilatation gastric stricture	30475	excavatum, repair or radical correction	38457-38458
enlargement of, using intestine	37047	excision of	30099, 30103, 30226, 30229, 30443, 30445-30446 30448-30449, 30583, 37000, 37014, 45030, 45033 45035-45036
entero-	30515	excision of infected by-pass graft	34157
Enterocoele, repair of	35571	excision of lip, eyelid or ear, full thickness	45665
Enterocolitis, acute neonatal necrotising, laparotomy	43828 43831	excision of rectal tumour	32103-32104, 32106
Enterocolostomy	30515	excision of tumour of	42764
Enterocutaneous fistula, radical repair of	30382	excision of under GA (not involving grafting)	30017, 30020
enterocutaneous, radical resection	30382	excision of, in oral & maxillofacial region	45801, 45803 45805, 45807, 45809
Enteroenterostomy	30515	excision of, oral & maxillofacial region	45801, 45803 45805, 45807, 45809
enterogenous, thoracotomy and excision	43912	excision of, with melanoma	31340
enterostomy	30375	excision of, with melanoma	31340
Enterostomy, closure of	30562	excision, repair, without cardiopulmonary bypass	38453
enterotomy	30375		

excision, tumours of face/neck	30190	Fasciectomy, for Dupuytren's Contracture	46369, 46372, 46375
Exenteration of orbit of eye	42536	46378, 46381, 46384, 46387, 46390, 46393	
Exomphalos, neonatal, operations for	43870, 43873	Fasciotomy, forearm or calf	47975, 47978, 47981
Exostoses in external auditory meatus, removal	41518	fasciotomy, hand	47981
Exostosis, excision of	47933, 47936	feeding jejunostomy	31462
expander, insertion of	45566	femoral bypass, saphenous vein anastomosis	34809
expander, removal of	45568	Femoral hernia, repair of	30609, 30614
expansion, intra-operative	45572	Femoral hernia, vessel, ligation/exploration, other	34103
exploration of	36537, 36612, 39330	femoral or inguinal, repair of	30609, 30614, 43841
exploration of, for hyperparathyroidism	30318, 30320	Femoro-femoral crossover bypass grafting	32718
exploration/drainage, operating theatre	31551	femoro-femoral, infected, excision of	34172
exploratory	30373	femur	48424, 48427
exstrophy closure	37050	Femur, bone graft to	48200, 48203
exstrophy of, repair of	37842	Fetal blood sampling	16606
Exstrophy, cloacal, neonatal, operation for	43882	Feto-amniotic shunt, insertion of	16627
extension, percutaneous gastrostomy tube	31460	Fibreoptic bronchoscopy	41898
extensive, multiple injections of hydrocortisone	30210	fibreoptic examination of	41764
Extensor tendon of hand or wrist, repair of	46420, 46423	fibreoptic, with examination of larynx	41764
extensor tendon of, repair of	46420, 46423	Fibrinolysis	42791
extensor tendon of, tenolysis of	46450	fibrinolysis	42791
External auditory canal, reconstruction	41524, 45662	fibula	48406, 48409
external auditory canal, reconstruction	45662	Fibula, congenital deficiency, transfer fibula to tibia	50423
external auditory, removal of keratosis obturans	41509	field setting	15500, 15503, 15506, 15509, 15512-15513
External cephalic version	16501	15515	
external operation on	41876	Filtering and allied operations for glaucoma	42746
external, complex total reconstruction of	45660-45661	Fimbrial cyst, removal of	35713, 35717
Extra digit, amputation of	46464	fimbrial, excision of	35713, 35717
extra, amputation of	46464	Finger, amputation of	46465, 46468, 46471, 46474, 46477
extra-ocular, ruptured, repair of	42854	46480, 46483	
Extracardiac conduit, insertion/replacement	38757, 38760	finger, open repair of text test	46441
Extracorporeal shock wave lithotripsy	36546	finger, with intra-articular fracture, open reduction	46442
Extracranial to intracranial bypass	39818, 39821	finger/hand	46300, 46303, 46306-46307, 46309, 46312, 46315
extraction	42698	46318, 46321, 46327, 46330	
extraction and insertion of artificial lens	42702	finger/hand, debridement of	46336
extremity, reoperation for control of	33848	first, resection of portion	34136
Eye, capsulotomy, laser	42788	Fissure in ano, operation for	32150
eye, decompression of	42545	fissure, operation for, including excision	32150
eye, exenteration of	42536	fistula extremity, surgically created, closure	34130
eye, exploration of	42530, 42533	fistula in ano, excision of	32156
eye, removal tumour/foreign body	42539, 42542-42543	Fistula, alimentary, repair of	35596, 37834
eye, skin graft to	42524	fistula, closure of	37038, 37333, 37336, 37833
Eyeball, repair of perforating wound	42551, 42554, 42557	fistula, dissection and ligation/repair	34112, 34115
Eyebrow, elevation of	42872	34118, 34121, 34124, 34127	
Eyelashes, ingrowing, operation for	45626	fistula, excision/repair	32156, 32159, 32162, 32165
Eyelid closure in facial nerve paralysis, implant insertion	42869	fistula, ligation of cervical vessel/s	39812
face or neck, revision of (restriction applies)	45506	fistula, readjustment of Seton	32166
45512		fistula, removal of	30289
		fistula, repair of	30269
		fistula, repair or closure of	35596, 37029, 37333
		fistula, stenosis of, correction of	34518
		Fixation, external, removal of	47948, 47951
		fixation, orthopaedic, removal	47948, 47951
		flap for velo-pharyngeal incompetence	45716
		flap repair	45000, 45003, 45006, 45009, 45012, 45200
		45203, 45206	
		flap revision	45239-45240
		flap, delay of	45015
		flap, infected, craniectomy for	39906
		flexor tendon of, repair of	46423, 46426, 46429, 46432
		46435	
		flexor tendon of, tenolysis of	46453
		flexor tendon sheath, open operation	46522

Face, injections of poly-L-Lactic acid	14201
Face, repair of complex fractures	45753-45754
face/neck, laser excision	30190
Facet joint denervation by percutaneous neurotomy	39118
Facial, nerve, decompression of	41569
facio-hypoglossal or facio-accessory, anastomosis of	39503
facio-hypoglossal/accessory nerve	39503
Facio-hypoglossal/accessory nerve, anastomosis of	39503
Faecal incontinence, sacral nerve stimulation for	32213-32218
Fallopian tubes, catheterisation, with hysteroscopy	35633
Fallopscopy, unilateral/bilateral	35710
Fascia, deep, repair of, for herniated muscle	30238

Flexor tendon, hand, repair of	46426, 46429, 46432, 46435	23770, 23780, 23790, 23800, 23810, 23820, 23830, 23840
flexor/extensor contracture, correction of	46492	23850, 23860, 23870, 23880, 23890, 23900, 23910, 23920
flexor/extensor, digits of hand, correction of	46492	23930, 23940, 23950, 23960, 23970, 23980, 23990
Flexorplasty to restore elbow function	50405	24100-24136, 25000, 25005, 25010, 25015, 25020, 25025
flexorplasty/tendon transfer to restore function	50405	25030, 25050, 25200, 25205
floor repair, laparoscopic or abdominal	35595	for arachnoidal cyst 39718
Fluid Filled Cavity, drainage of	16624	for cardiopulmonary bypass 38600, 38603
fluid filled cavity, drainage of	16624	for congenital cystadenomatoid malformation 43861
fluid reservoir, insertion of	39018	for congenital lobar emphysema 43861
focal spasticity	18360	for control of post-operative haemorrhage 30385, 33845
following gynaecological surgery, under GA	35759	for cordotomy or myelotomy 39124
following intraocular procedures	42857	for drainage 30394
foot	49815, 49833, 49836-49839, 49842, 49845	for grading of lymphoma 30384
foot deformities due to spasticity	18354	for gross intra-peritoneal sepsis 30396
Foot, amputation or disarticulation of	44359, 44361, 44364	for implantable bone conduction hearing system 41603-41604
For anaesthesia	20100, 20102, 20104, 20120, 20124, 20140	for intussusception, paediatric 43933, 43936
20142-20148, 20160, 20162, 20164, 20170, 20172, 20174		for neonatal conditions 43801, 43804, 43807, 43810, 43813

thoracic, repair/replacement procedures	38550, 38553	total, of wrist	49224
38556, 38559, 38562, 38565, 38568, 38571		total, with excision rectum/anastomosis	32051, 32054
Thoracoplasty	38427, 38430	32057	
Thoracoscopy	38436	total, with excision rectum/ileostomy	32015, 32018, 32021
Thoracotomy	38418, 38421, 38424	total, with ileo-rectal anastomosis	32012
thorax	20400-20406, 20410, 20420, 20440, 20450, 20452	total, with ileostomy	32009
20470, 20472, 20474		Trabeculectomy for glaucoma	42746
Threatened abortion, treatment of	16505	trabeculoplasty	42782
threatened, ligation of cervix	16511	trabeculoplasty, laser	42782
threatened, treatment of	16505	Trabeculectomy, laser, of eye	42782
Three snip operation	42617	Trachea, dilatation of stricture and stent insertion	41905
thrombectomy of	33803, 33806, 33810-33812	trachea, removal of	41886
Thrombectomy of arteriovenous access device	34515	Tracheal excision, repair, with cardiopulmonary bypass	38455
thrombosis, incision of	32147	tracheal, dilatation of, with bronchoscopy	41904
Thrombosis, peri-anal, incision of	32147	Trachelorrhaphy	35618
Thrombus, removal of	33803, 33806, 33812	Tracheo-oesophageal fistula, division and repair	43900
Thumb, digital nail, removal of	46513, 46516	tracheo-oesophageal, division and repair	43900
Thymectomy	38456	Tracheomalacia, aortopexy for	43909
Thymoma, malignant, removal from mediastinum	38456	Tracheoplasty or laryngoplasty with tracheostomy	41879
Thymus, removal of by thoracotomy or sternotomy	38446	transanal endoscopic microsurgery	32103-32104, 32106
Thyroglossal cyst and/or fistula, removal of	30314, 30326	Transanal ethmoidectomy with radical antrostomy	41713
Thyroglossal, radical removal of	30326	transantral vidian, with antrostomy	41713
thyroglossal, radical removal of	30314	transantral, of maxillary artery	41707
thyroglossal, removal of	30314	transantral, with radical antrostomy	41713
thyroid, removal of	30310	transection for portal hypertension	30606
Thyroidectomy	30296-30297, 30299-30300, 30302-30303, 30306	transection, with re-anastomosis to trigone	37053
30310		transfer for facial nerve paralysis	45578
tibia	48418, 48421	transfer of abdominal musculature to greater trochanter	50387
Tibia, bone graft to	48206, 48209	transfer of adductors to ischium	50387
Tibial vessel, ligation/exploration not otherwise covered	34106	transfer of tissue	45562-45565
tibialis tendon transfer	50339, 50342	transfer of tissue, anastomosis artery/vein	45502
Tic douloureux, injection for	39100	Transfusion	13703, 13706
tie, repair of	30278, 30281	transfusion	13703, 13706
tissue or organ, biopsy of	30075, 30078	transfusion, fetal	16609, 16612, 16615
tissue, accessory, excision of	31560	transfusion, paediatric/neonatal	13306, 13309
Tissue, expansion for breast reconstruction	45539, 45542	transhepatic cholangiogram, imaging guided	30440
tissue, repair of recent wound of	30026, 30029, 30032	Transillumination, ocular	42821
30035, 30038, 30042, 30045, 30049		transillumination	42821
to femoral bypass grafting	32715	Translabyrinthine vestibular nerve section	41593
to haemorrhoids with rubber band ligation	32135	transluminal balloon	35300, 35303
to prepare bypass site for anastomosis	33554	Transluminal balloon angioplasty	35300, 35303
to retina, independent procedure	42818	Transmastoid decompression of endolymphatic sac	41590
Toe, amputation or disarticulation of	44338, 44342, 44346	Transmetacarpal amputation of hand	44325
44350, 44354, 44358		Transmetatarsal amputation of foot	44364
toe, fracture, treatment of	47663, 47666, 47672, 47678	Transorbital ligation of ethmoidal arteries	41725
Toenail, ingrowing, excision or resection for	47915-47916	transplant	36503, 36506, 36509
47918		transplant (Hummelsheim type), for squint	42848
toilet, using operating microscope	41647	transplant to restore valvular function	34821

transplantation		47966	tumour, malignant, operations for	50200-50201, 50203
transplantation of	36597, 42653, 42656, 42662, 42665		50206, 50209, 50212, 50215, 50218, 50221, 50224, 50227	
Transplantation, cornea		42653, 42656	50230, 50233, 50236, 50239	
transposition of		39321	tumour, radical or debulking operation for	35720
Transposition of digit		46507	tumour, removal of	30520
transposition with hysterectomy for malignancy		35729	tumour, removal of by urethrectomy	37330
transposition/transfer, vascular pedicle		46507	tumour, transtympanic, removal of	41620
Transpupillary thermotherapy		42811	tumour/s, diathermy/resection	36840, 36845
Transthoracic drainage of pericardium		38450	tumour/s, laser destruction with cystoscopy	36840
Transtympanic removal of glomus tumour		41620	tumours destruction by radiofrequency ablation	50950
Transurethral injection for urinary incontinence		37339	50952	
transurethral microwave thermotherapy	37230, 37233		tumours, destruction of by cryotherapy	30419
Transvenous electrode/s, permanent, insertion of		38350	tunnel release	39331
transvenous, insertion of	38256, 38356		turbinates	41674
traumatic wounds	30026, 30029, 30032, 30035, 30038, 30042 30045, 30049		Turbinates, cauterisation or diathermy of	41674
traumatic, suture of	30026, 30029, 30032, 30035, 30038 30042, 30045, 30049		Turbinectomy	41689
Treacher Collins Syndrome, peri-orbital correction of		45773	Turriccephaly, cranial vault reconstruction for	45785
treatment of including paediatric	50600, 50604, 50608 50612, 50616, 50620, 50624, 50628, 50632, 50636, 50640 50644, 50650, 50654, 50658		Tympani, paracentesis of	41626
treatment of paediatric		50508, 50512	Tympanic membrane, micro-inspection of	41650
treatment, eye	42782, 42785, 42788, 42791, 42794 42801-42802, 42805-42806		Tympanum, perforation, cauterisation or diathermy	41641
Trepphine of frontal sinus		41743		
Trichiasis, treatment of		42587-42588		
Trichoepitheliomas, face/neck, removal by laser excision		30190		
Trigeminal gangliotomy, radiofrequency/balloon/glycerol		39109		
trigeminal, primary branch, injection with alcohol etc		39100		
Trigger finger, correction of		46363		
trigger, correction of		46363		
trunk, internal (interfascicular), neurolysis of		39312		
trunk, microsurgical repair		39306, 39309		
trunk, nerve graft to		39315		
tube, indwelling, gastrostomy for fixation		30375		
Tubed pedicle or indirect flap		45230		
tuberosity, reduction of		45829		
tubes, hydrotubation of		35703, 35709		
tubes, implantation of, into uterus		35694, 35697		
tubes, insufflation of, for patency (Rubin test)		35706		
tubes, microsurgical anastomosis		35700		
tubes, Rubin test for patency		35706		
tubes, sterilisation		35688		
tubes, sterilisation with Caesarean section		35691		
Tuboplasty		35694, 35697		
tubuerous, tubular or constricted breast, treatment by		45060-45062		
tubuerous, tubular or constricted, correction of		45060-45062		
tumour site, re-excision		31515		
Tumour, adrenal gland, excision of other, removal of		30324		
31220, 31225				
Tumour, benign of soft tissue removal		30611		
tumour, benign, resection of		50230		
tumour, biopsy and/or decompression		39706		
tumour, burr-hole biopsy for		39703, 39706		
tumour, craniotomy and removal of		39709, 39712		
tumour, craniotomy for removal		39712		
tumour, excision of	30251, 32099, 32102-32104, 32106 32108, 38670, 38673, 38677, 38680, 39700			
tumour, innocent, excision of		30241		
tumour, laser photocoagulation of		42806		

Ureteroscopy 36803, 36806, 36809
 ureterostomy, closure of 36621
 Ureterostomy, cutaneous, closure of 36621
 urethra 35570, 35573, 37318
 urethra or urethral caruncle 35523
 Urethra, cauterisation of 35523
 urethra, excision of 37369
 urethra, removal of 37318
 urethra, repair of 37306, 37309
 urethral 37321
 Urethral abscess, drainage of 30223, 37816, 37828
 urethral fistula repair 37833
 Urethral sling, division or removal of 37340-37341
 urethral, closure of 37833
 urethral, dilatation of 37303
 urethral, excision of 35527, 37372
 urethral, reconstruction 37375
 Urethrectomy 37330
 urethro-rectal 37336
 urethro-vaginal 37333
 Urethrocoele, repair of 35570
 Urethropexy (Marshall-Marchetti operation) 35599, 37044
 Urethroplasty 37342-37343, 37345, 37348, 37351
 Urethroscopy, as an independent procedure 37315
 Urethrostomy 37324
 Urethrotomy, external or internal 37324
 Urinary conduit or reservoir, endoscopic examination 36860
 urinary conduit, revision 36609
 urinary reservoir, continent, formation 36606
 urinary sphincter, insertion 37381, 37384, 37387
 urinary sphincter, revision/removal 37390
 urinary, artificial, insertion 37381, 37384, 37387
 urinary, artificial, revision or removal 37390
 Urogenital sinus, vaginal reconstruction for 35565
 urogenital, vaginal reconstruction for 35565
 using Minitrach or similar device 41884
 Uterine adenomyoma, excision of 35649
 uterine, abdominal 35649
 uterine, laparoscopic 35638
 Utero-sacral ligaments, laparoscopic division 35638
 uterus (D and C) 35640
 Uterus, acute inversion, vaginal correction 16570
 uterus, removal of 35640
 UVB therapy 14050
 Uvula, excision of 41810
 Uvulectomy and partial palatotomy 41787
 Uvulopalatopharyngoplasty 41786
 Uvulotomy 41810

V

Vagina, artificial formation of 35565
 vagina, simple, removal of 35557
 vaginal compartment repair 35571, 35573
 vaginal compartment repair of 35571
 Vaginal correction of acute inversion of uterus 16570
 vaginal repair 35570-35573, 35577-35578
 vaginal, excision of 35557
 vaginal, excision of, for correction of double vagina 35566
 vaginal, repair of 35568-35573, 35577-35578, 35595-35597
 Vaginectomy, radical, for malignancy 35561-35562, 35564
 Vaginoplasty for congenital adrenal hyperplasia 37851

Vagotomy 30496-30497, 30499-30500, 30502-30503
 Vallecular cysts, removal of 41813
 vallecular, removal of 41813
 Valve annuloplasty, heart 38475, 38477-38478
 valve leaflet/s, decalcification of 38483
 valve replacement 38488-38489
 valve, open valvotomy of 38487
 valve, plication or repair to restore competency 34818
 valve, repair 38480-38481
 valves, destruction of 37854
 Valvotomy for pulmonary stenosis 38456
 valvuloplasty or septostomy 38270
 Valvuloplasty, balloon or septostomy 38270
 Varicocele, surgical correction of 30635
 varicose veins 32520, 32522-32523, 32526, 32528-32529
 varicose, multiple injections 32500
 varicose, operations for 32500
 Vas deferens, operations on 37616, 37619, 37623
 Vasectomy 37623
 Vasoepididymostomy (unilateral) 37616, 37619
 Vasotomy 37623
 Vasovasotomy 37616, 37619
 vault reconstruction 45785
 vein catheterisation 13318-13319, 13815
 vein catheterisation in a neonate 13300
 vein catheterisation, via subcutaneous tunnel 34527-34528
 vein puncture in infants, blood collection 13312
 Vein, anastomosis, microsurgical 45502
 Vein, great, ligation or exploration not otherwise covered 34103
 vein, thrombectomy 33810-33811
 Veins, major, access as part of re-operation 35202
 veins, multiple injections 32500
 veins, operations for 32500, 32504, 32507-32508, 32511
 32514, 32517
 Velopharyngeal incompetence, flap or pharyngoplasty 45716
 vena cava, for congenital heart disease 38721, 38724
 Vena cava, inferior, operations on 34800, 34803
 vena caval filter, insertion of 35330
 Venography, operative 35200
 Venous anastomosis, not otherwise covered 32766, 32769
 venous catheterisation 35317, 35319-35320
 venous, operations for 34812, 34815
 Ventilation, mechanical, intensive care 13857, 13881-13882
 Ventral hernia following closure exomphalos, repair of 43939
 ventral or incisional, repair of 30403, 30405
 ventral, following closure exomphalos, repair of 43939
 ventricle, puncture of 39006
 Ventricular aneurysm, plication of 38506
 ventricular assist 38627
 Ventricular septal defect, transcatheter closure 38274
 ventricular septal rupture, repair of 38509
 Ventriculo-cisternostomy 40000
 ventriculostomy 40012
 Ventriculostomy, third 40012
 Vermilionectomy 45668-45669
 Version, external cephalic 16501
 vertebra, needle 30093
 Vertebra, needle biopsy of 30093
 vertical, congenital, reconstruction 50336
 Vesical fistula, cutaneous, operation for 37023
 vesical fistula, operation for 37023
 vesical, cutaneous, operation for 37023

Vesico-intestinal fistula, closure of	37038
vesico-intestinal, closure of	37038
vesico-ureteric, correction	36588
vesico-vaginal, closure of	37029
Vesicostomy, cutaneous, establishment of	37026
vesicostomy, establishment of	37026
Vesicovaginal fistula, closure of	37029
vessel, ligation/exploration, other	34106
vessels, anastomosis/repair	38727, 38730
vessels, by-pass grafting to	32730, 32733
Vestibular nerve section, retrolabyrinthine	41596
vestibular, section of, via posterior fossa	39500
Vestibuloplasty, unilateral or bilateral	45837
vidian neurectomy	41713
Vidian neurectomy, transantral, with antrostomy	41713
Villus, chorionic, sampling	16603
Viscera, abdominal, operation involving laparotomy	30387
viscera, operations involving laparotomy	30387
Viscus, ruptured, simple repair of	30375
viscus, simple repair of	30375
Vitello intestinal duct, patent, excision of	43945
Vitrectomy	42719, 42725
Vitreolysis of lens material	42791
vitrealysis, laser, of lens material	42791
vitrealysis/corticolysis	42791
Vulvulus, reduction of	30375
Vulva, biopsy of, with colposcopy	35615
Vulval warts, removal under GA or nerve block	35507-35508
vulval/vaginal, removal, GA or nerve block	35507-35508
Vulvectomy, hemi	35536
Vulvoplasty, for localised gigantism	35534
Vulvoplasty, for repair of female genital mutilation or anomalies
